Pyogenic — see condition**Pyohydronephrosis** N13.6**Pyometra, pyometrium, pyometritis** — see Endometritis**Pyomyositis** (tropical) — see Myositis, infective**Pyonephritis** N12**Pyonephrosis** N13.6

- tuberculous A18.11

Pyo-oophoritis — see Salpingo-oophoritis**Pyo-ovarium** — see Salpingo-oophoritis**Pyopericarditis, pyopericardium** I30.1**Pyophlebitis** — see Phlebitis**Pyopneumopericardium** I30.1**Pyopneumothorax** (infective) J86.9

- with fistula J86.0
- tuberculous NEC A15.6

Pyosalpinx, pyosalpingitis — see also Salpingo-oophoritis**Pyothorax** J86.9

- with fistula J86.0
- tuberculous NEC A15.6

Pyoureter N28.89

- tuberculous A18.11

Pyramidolalidionigril syndrome G20**Pyrexia** (of unknown origin) R50.9

- atmospheric T67.01 **■**
- during labor NEC O75.2
- heat T67.01 **■**
- newborn P81.9
 - environmentally-induced P81.0
- persistent R50.9
- puerperal O86.4

Pyroglobulinemia **NEC** E88.09**Pyromania** F63.1**Pyrosis** R12**Puria** (bacterial) (sterile) R82.81**Q****Q fever** A78

- with pneumonia A78

Quadracuspid aortic valve Q23.8**Quadrilateral fever** A78**Quadruparesis** — see Quadriplegia

- meaning muscle weakness M62.81

Quadriplegia G82.50

- complete
 - C1-C4 level G82.51
 - C5-C7 level G82.53
- congenital (cerebral) (spinal) G80.8
- spastic G80.0
- embolic (current episode) I63.4- **■**
- functional R53.2
- incomplete
 - C1-C4 level G82.52
 - C5-C7 level G82.54
- thrombotic (current episode) I63.3- **■**
- traumatic — code to injury with seventh character S
 - current episode — see Injury, spinal (cord), cervical

Quadruplet, pregnancy — see Pregnancy, quadruplet**Quarrelsome** F60.3**Queensland fever** A77.3**Quervain's disease** M65.4

- thyroid E06.1

Queyrat's erythroplasia D07.4

- penis D07.4

- specified site — see Neoplasm, skin, in situ

- unspecified site D07.4

Quincke's disease or edema T78.3 **■**

- hereditary D84.1

Quinsy (gangrenous) J36**Quintan fever** A79.0**Quintuplet, pregnancy** — see Pregnancy, quintuplet**R****Rabbit fever** — see Tularemia**Rabies** A82.9

- contact Z20.3
- exposure to Z20.3
- inoculation reaction — see Complications, vaccination
- sylvatic A82.0
- urban A82.1

Rachischisis — see Spina bifida**Rachitic** — see also condition

- deformities of spine (late effect) (sequelae) E64.3
- pelvis (late effect) (sequelae) E64.3
- with disproportion (fetopelvic) Q33.0
- causing obstructed labor O65.0

Rachitis, rachitism (acute) (tarda) — see also Rickets

- renal N25.0
- sequelae E64.3

Radial nerve — see condition**Radiation**

- burn — see Burn
- effects NOS T66 **■**
- sickness NOS T66 **■**
- therapy, encounter for Z51.0

Radiculitis (pressure) (vertebrogenic) — see Radiculopathy**Radiculomyelitis** — see also Encephalitis

- toxic, due to
 - Clostridium tetani A35
 - Corynebacterium diphtheriae A36.82

Radiculopathy M54.10

- cervical region M54.12
- cervicothoracic region M54.13
- due to
 - disc disorder
 - C3 M50.11
 - C4 M50.11
 - C5 M50.121
 - C6 M50.122
 - C7 M50.123
- displacement of intervertebral disc — see Disorder, disc, with, radiculopathy

- leg M54.1- **■**

- lumbar region M54.16
- lumbosacral region M54.17
- occipito-atlanto-axial region M54.11
- postherpetic B02.29
- sacroccygeal region M54.18
- syphilitic A52.11
- thoracic region (with visceral pain) M54.14
- thoracolumbar region M54.15

Radiodermal burns (acute, chronic, or occupational) — see Burn**Radiodermatitis** L58.9

- acute L58.0
- chronic L58.1

Radiotherapy session Z51.0**RAEB** (refractory anemia with excess blasts) D46.2- **■****Rage, meaning rabies** — see Rabies**Ragpicker's disease** A22.1**Ragsorter's disease** A22.1**Raillietiniasis** B71.8**Railroad neurosis** F48.8**Railway spine** F48.8**Raised** — see also Elevated

- antibody titer R76.0

Rake teeth, tooth M26.39**Rales** R09.89**Ramifying renal pelvis** Q63.8**Ramsay-Hunt disease or syndrome** — see also Hunt's disease B02.21

- meaning dyssynergia cerebellaris myoclonica G11.19

Ranula K11.6

- congenital Q38.4

Rape

- adult

- confirmed T74.21 **■**
- suspected T76.21 **■**
- alleged, observation or examination, ruled out
 - adult Z04.41
 - child Z04.42

- child

- confirmed T74.22 **■**
- suspected T76.22 **■**

Rapid

- feeble pulse, due to shock, following injury T79.4 **■**
- heart (beat) R00.0
- psychogenic F45.8
- second stage (delivery) O62.3
- time-zone change syndrome G47.25

Rarefaction, bone — see Disorder, bone, density and structure, specified NEC**Rash** (toxic) R21

- canker A38.9
- diaper L22
- drug (internal use) L27.0
 - contact — see also Dermatitis, due to, drugs, external L25.1
- following immunization T88.1 **■**
- food — see Dermatitis, due to, food
- heat L74.0
- napkin (psoriasisiform) L22
- nettle — see Urticaria
- pustular L08.0
- rose R21
 - epidemic B06.9
- scarlet A38.9
- serum — see also Reaction, serum T80.69 **■**
- wandering tongue K14.1

Rasmussen aneurysm — see Tuberculosis, pulmonary**Rasmussen encephalitis** G04.81**Rat-bite fever** A25.9

- due to Streptobacillus moniliformis A25.1

- spirochetal (morsus muris) A25.0

Rathke's pouch tumor D44.3**Raymond (-Céstan) syndrome** I65.8**Raynaud's disease, phenomenon or syndrome** (secondary) I73.00

- with gangrene (symmetric) I73.01

RDS (newborn) (type I) P22.0

- type II P22.1

Reaction — see also Disorder

- withdrawing, child or adolescent F93.8
- adaptation — see Disorder, adjustment
- adjustment (anxiety) (conduct disorder) (depressive-ness) (distress) — see Disorder, adjustment
- with
 - mutism, elective (child) (adolescent) F94.0
- adverse
 - food (any) (ingested) NEC T78.1 **■**
 - anaphylactic — see Shock, anaphylactic, due to food
- affective — see Disorder, mood
- allergic — see Allergy
- anaphylactic — see Shock, anaphylactic
- anaphylactoid — see Shock, anaphylactic
- anesthesia — see Anesthesia, complication
- antitoxin (prophylactic) (therapeutic) — see Complications, vaccination
- anxiety F41.1
- Arthur — see Arthur's phenomenon
- asthenic F48.8
- combat and operational stress F43.0
- compulsive F42.8
- conversion F44.9

Reaction — *continued*

crisis, acute F43.0
 deoxyribonuclease (DNA) (DNase) hypersensitivity D69.2
 depressive (single episode) F32.9
 affective (single episode) F31.4
 recurrent episode F33.9
 neurotic F34.1
 psychoneurotic F34.1
 psychotic F32.3
 recurrent — see Disorder, depressive, recurrent
 dissociative F44.9
 drug NEC T88.7 **✓**
 addictive — see Dependence, drug
 transmitted via placenta or breast milk — see Absorption, drug, addictive, through placenta
 allergic — see Allergy, drug
 lichenoid L43.2
 newborn P93.8
 gray baby syndrome P93.0

Note: The list below gives the code number for neoplasms by anatomical site. For each site there are six possible code numbers according to whether the neoplasm in question is malignant, benign, in situ, of uncertain behavior, or of unspecified nature. The description of the neoplasm will often indicate which of the six columns is appropriate; e.g., malignant melanoma of skin, benign fibroadenoma of breast, carcinoma in situ of cervix uteri. Where such descriptors are not present, the remainder of the Index should be consulted where guidance is given to the appropriate column for each morphological (histological) variety listed; e.g., Mesonephroma — see Neoplasm, malignant; Embryoma — see also Neoplasm, uncertain behavior; Disease, Bowen's — see Neoplasm, skin, in situ. However, the guidance in the Index can be overridden if one of the descriptors mentioned above is present; e.g., malignant adenoma of colon is coded to C18.9 and not to D12.6 as the adjective "malignant" overrides the Index entry "Adenoma — see also Neoplasm, benign, by site." Codes listed with a dash -, following the code have a required additional character for laterality. The tabular list must be reviewed for the complete code.

ICD-10-CM Tabular List of Diseases and Injuries

Chapter 1. Certain Infectious and Parasitic Diseases (A00–B99), U07.1

Chapter-specific Guidelines with Coding Examples

The chapter-specific guidelines from the ICD-10-CM Official Guidelines for Coding and Reporting have been provided below. Along with these guidelines are coding examples, contained in the shaded boxes, that have been developed to help illustrate the coding and/or sequencing guidance found in these guidelines.

a. Human immunodeficiency virus (HIV) infections

1) Code only confirmed cases

Code only confirmed cases of HIV infection/illness. This is an exception to the hospital inpatient guideline Section II, H.

In this context, "confirmation" does not require documentation of positive serology or culture for HIV; the provider's diagnostic statement that the patient is HIV positive, or has an HIV-related illness is sufficient.

Patient admitted with anemia with possible HIV infection

D64.9 Anemia, unspecified

Explanation: Only the anemia is coded in this scenario because it has not been confirmed that an HIV infection is present. This is an exception to the guideline Section II, H for hospital inpatient coding.

2) Selection and sequencing of HIV codes

(a) Patient admitted for HIV-related condition

If a patient is admitted for an HIV-related condition, the principal diagnosis should be B20, Human immunodeficiency virus [HIV] disease followed by additional diagnosis codes for all reported HIV-related conditions.

(b) Patient with HIV disease admitted for unrelated condition

If a patient with HIV disease is admitted for an unrelated condition (such as a traumatic injury), the code for the unrelated condition (e.g., the nature of injury code) should be the principal diagnosis. Other diagnoses would be B20 followed by additional diagnosis codes for all reported HIV-related conditions.

Unstable angina, native coronary artery atherosclerosis, HIV

I25.110 Atherosclerotic heart disease of native coronary artery with unstable angina pectoris

B20 Human immunodeficiency virus [HIV] disease

Explanation: The arteriosclerotic coronary artery disease and the unstable angina are not related to HIV, so those conditions are reported first using a combination code, and HIV is reported secondarily.

(c) Whether the patient is newly diagnosed

Whether the patient is newly diagnosed or has had previous admissions/encounters for HIV conditions is irrelevant to the sequencing decision.

(d) Asymptomatic human immunodeficiency virus

Z21, Asymptomatic human immunodeficiency virus [HIV] infection status, is to be applied when the patient without any documentation of symptoms is listed as being "HIV positive," "known HIV," "HIV test positive," or similar terminology. Do not use this code if the term "AIDS" is used or if the patient is treated for any HIV-related illness or is described as having any condition(s) resulting from his/her HIV positive status; use B20 in these cases.

Patient admitted with acute appendicitis. Status positive HIV test on Atripla, with no prior symptoms

K35.80 Unspecified acute appendicitis

Z21 Asymptomatic human immunodeficiency virus [HIV] infection status

Explanation: Code Z21 is sequenced second since documentation indicates that the patient has had a positive HIV test but has been asymptomatic. Being on medication for HIV is not an indication that code B20 is used instead of Z21. Unless there has been documentation that the patient has had current or prior symptoms or HIV-related complications, code B20 is not used. The appendicitis is not an AIDS-related complication and is sequenced first.

(e) Patients with inconclusive HIV serology

Patients with inconclusive HIV serology, but no definitive diagnosis or manifestations of the illness, may be assigned code R75, Inconclusive laboratory evidence of human immunodeficiency virus [HIV].

(f) Previously diagnosed HIV-related illness

Patients with any known prior diagnosis of an HIV-related illness should be coded to B20. Once a patient has developed an HIV-related illness, the patient should always be assigned code B20 on every subsequent admission/encounter. Patients previously diagnosed with any HIV illness (B20) should never be assigned to R75 or Z21, Asymptomatic human immunodeficiency virus [HIV] infection status.

(g) HIV infection in pregnancy, childbirth and the puerperium

During pregnancy, childbirth or the puerperium, a patient admitted (or presenting for a health care encounter) because of an HIV-related illness should receive a principal diagnosis code of O98.7-, Human immunodeficiency [HIV] disease complicating pregnancy, childbirth and the puerperium, followed by B20 and the code(s) for the HIV-related illness(es). Codes from Chapter 15 always take sequencing priority.

Patients with asymptomatic HIV infection status admitted (or presenting for a health care encounter) during pregnancy, childbirth, or the puerperium should receive codes of O98.7- and Z21.

(h) Encounters for testing for HIV

If a patient is being seen to determine his/her HIV status, use code Z11.4, Encounter for screening for human immunodeficiency virus [HIV]. Use additional codes for any associated high-risk behavior.

If a patient with signs or symptoms is being seen for HIV testing, code the signs and symptoms. An additional counseling code Z71.7, Human immunodeficiency virus [HIV] counseling, may be used if counseling is provided during the encounter for the test.

When a patient returns to be informed of his/her HIV test results and the test result is negative, use code Z71.7, Human immunodeficiency virus [HIV] counseling.

If the results are positive, see previous guidelines and assign codes as appropriate.

b. Infectious agents as the cause of diseases classified to other chapters

Certain infections are classified in chapters other than Chapter 1 and no organism is identified as part of the infection code. In these instances, it is necessary to use an additional code from Chapter 1 to identify the organism. A code from category B95, Streptococcus, Staphylococcus, and Enterococcus as the cause of diseases classified to other chapters, B96, Other bacterial agents as the cause of diseases classified to other chapters, or B97, Viral agents as the cause of diseases classified to other chapters, is to be used as an additional code to identify the organism. An instructional note will be found at the infection code advising that an additional organism code is required.

E. coli UTI

N39.0 Urinary tract infection, site not specified

B96.20 Unspecified Escherichia coli [E.coli] as the cause of diseases classified elsewhere

Explanation: An instructional note under the code for the urinary tract infection indicates to code also the specific organism.

c. Infections resistant to antibiotics

Many bacterial infections are resistant to current antibiotics. It is necessary to identify all infections documented as antibiotic resistant. Assign a code from category Z16, Resistance to antimicrobial drugs, following the infection code only if the infection code does not identify drug resistance.

d. Sepsis, severe sepsis, and septic shock

1) Coding of sepsis and severe sepsis

(a) Sepsis

For a diagnosis of sepsis, assign the appropriate code for the underlying systemic infection. If the type of infection or causal organism is not further specified, assign code A41.9, Sepsis, unspecified organism.

A code from subcategory R65.2, Severe sepsis, should not be assigned unless severe sepsis or an associated acute organ dysfunction is documented.

(i) Negative or inconclusive blood cultures and sepsis

Negative or inconclusive blood cultures do not preclude a diagnosis of sepsis in patients with clinical evidence of the condition; however, the provider should be queried.

(ii) Urosepsis

The term urosepsis is a nonspecific term. It is not to be considered synonymous with sepsis. It has no default code in the Alphabetic Index. Should a provider use this term, he/she must be queried for clarification.

(iii) Sepsis with organ dysfunction

If a patient has sepsis and associated acute organ dysfunction or multiple organ dysfunction (MOD), follow the instructions for coding severe sepsis.

(iv) Acute organ dysfunction that is not clearly associated with the sepsis

If a patient has sepsis and an acute organ dysfunction, but the medical record documentation indicates that the acute organ dysfunction is related to a medical condition other than the sepsis, do not assign a code from subcategory R65.2, Severe sepsis. An acute organ dysfunction must be associated with the sepsis in order to assign the severe sepsis code. If the documentation is not clear as to whether an acute organ dysfunction is related to the sepsis or another medical condition, query the provider.

Sepsis and acute respiratory failure due to COPD exacerbation

A41.9 Sepsis, unspecified organism

J44.1 Chronic obstructive pulmonary disease with (acute) exacerbation

J96.00 Acute respiratory failure, unspecified whether with hypoxia or hypercapnia

Explanation: Although acute organ dysfunction is present in the form of acute respiratory failure, severe sepsis (R65.2) is not coded in this example, as the acute respiratory failure is attributed to the COPD exacerbation rather than the sepsis. Sequencing of these codes would be determined by the circumstances of the admission.

(b) Severe sepsis

The coding of severe sepsis requires a minimum of 2 codes: first a code for the underlying systemic infection, followed by a code from subcategory R65.2, Severe sepsis. If the causal organism is not documented, assign code A41.9, Sepsis, unspecified organism, for the infection. Additional code(s) for the associated acute organ dysfunction are also required.

Due to the complex nature of severe sepsis, some cases may require querying the provider prior to assignment of the codes.

2) Septic shock**(a) Septic shock generally refers to circulatory failure associated with severe sepsis, and therefore, it represents a type of acute organ dysfunction.**

For cases of septic shock, the code for the systemic infection should be sequenced first, followed by code R65.21, Severe sepsis with septic shock or code T81.12, Postprocedural septic shock. Any additional codes for the other acute organ dysfunctions should also be assigned. As noted in the sequencing instructions in the Tabular List, the code for septic shock cannot be assigned as a principal diagnosis.

Sepsis with septic shock

A41.9 Sepsis, unspecified organism

R65.21 Severe sepsis with septic shock

Explanation: Documentation of septic shock automatically implies severe sepsis as it is a form of acute organ dysfunction. Septic shock is not coded as the principal diagnosis; it is always preceded by the code for the systemic infection.

3) Sequencing of severe sepsis

If severe sepsis is present on admission, and meets the definition of principal diagnosis, the underlying systemic infection should be assigned as principal diagnosis followed by the appropriate code from subcategory R65.2 as required by the sequencing rules in the Tabular List. A code from subcategory R65.2 can never be assigned as a principal diagnosis.

When severe sepsis develops during an encounter (it was not present on admission), the underlying systemic infection and the appropriate code from subcategory R65.2 should be assigned as secondary diagnoses.

Severe sepsis may be present on admission, but the diagnosis may not be confirmed until sometime after admission. If the documentation is not clear whether severe sepsis was present on admission, the provider should be queried.

4) Sepsis or severe sepsis with a localized infection

If the reason for admission is sepsis or severe sepsis and a localized infection, such as pneumonia or cellulitis, a code(s) for the underlying systemic infection should be assigned first and the code for the localized infection should be assigned as a secondary diagnosis. If the patient has severe sepsis, a code from subcategory R65.2 should also be assigned as a secondary diagnosis. If the patient is admitted with a localized infection, such as pneumonia, and sepsis/severe sepsis doesn't develop until after admission, the localized infection should be assigned first, followed by the appropriate sepsis/severe sepsis codes.

Patient presents with acute renal failure due to severe sepsis from *Pseudomonas pneumonia*

A41.52 Sepsis due to *Pseudomonas*

J15.1 Pneumonia due to *Pseudomonas*

R65.20 Severe sepsis without septic shock

N17.9 Acute kidney failure, unspecified

Explanation: If all conditions are present on admission, the systemic infection (sepsis) is sequenced first followed by the codes for the localized infection (pneumonia), severe sepsis and any organ dysfunction. If only the pneumonia was present on admission with the sepsis and resulting renal failure developing later in the admission, then the pneumonia would be sequenced first.

5) Sepsis due to a postprocedural infection**(a) Documentation of causal relationship**

As with all postprocedural complications, code assignment is based on the provider's documentation of the relationship between the infection and the procedure.

(b) Sepsis due to a postprocedural infection

For infections following a procedure, a code from T81.40, to T81.43 Infection following a procedure, or a code from O86.00 to O86.03, Infection of obstetric surgical wound, that identifies the site of the infection should be coded first, if known. Assign an additional code for sepsis following a procedure (T81.44) or sepsis following an obstetrical procedure (O86.04). Use an additional code to identify the infectious agent. If the patient has severe sepsis, the appropriate code from subcategory R65.2 should also be assigned with the additional code(s) for any acute organ dysfunction.

For infections following infusion, transfusion, therapeutic injection, or immunization, a code from subcategory T80.2, Infections following infusion, transfusion, and therapeutic injection, or code T88.0-, Infection following immunization, should be coded first, followed by the code for the specific infection. If the patient has severe sepsis, the appropriate code from subcategory R65.2 should also be assigned, with the additional code(s) for any acute organ dysfunction.

(c) Postprocedural infection and postprocedural septic shock

If a postprocedural infection has resulted in postprocedural septic shock, assign the codes indicated above for sepsis due to a postprocedural infection, followed by code T81.12-, Postprocedural septic shock. Do not assign code R65.21, Severe sepsis with septic shock. Additional code(s) should be assigned for any acute organ dysfunction.

Septic shock following abdominal procedure with intramuscular abscess

T81.42XA Infection following a procedure, deep incisional surgical site, initial encounter

T81.44XA Sepsis following a procedure, initial encounter

A41.9 Sepsis, unspecified organism

T81.12XA Postprocedural septic shock, initial encounter

Explanation: The first code reported identifies the site of the postprocedural infection with intramuscular abscess coded to "deep incisional surgical site." If sepsis occurred as a result of the postprocedural infection, code T81.44- should be coded as a secondary diagnosis, followed by a code for the specific type of sepsis. Postprocedural septic shock is captured by code T81.12- and not with code R65.21. If any other acute organ dysfunction was documented as associated with the postprocedural sepsis, additional codes could be assigned to represent those conditions.

6) Sepsis and severe sepsis associated with a noninfectious process (condition)

In some cases, a noninfectious process (condition) such as trauma, may lead to an infection which can result in sepsis or severe sepsis. If sepsis or severe sepsis is documented as associated with a noninfectious condition, such as a burn or serious injury, and this condition meets the definition for principal diagnosis, the code for the noninfectious condition should be sequenced first, followed by the code for the resulting infection. If severe sepsis is present, a code from subcategory R65.2 should also be assigned with any associated organ dysfunction(s) codes. It is not necessary to assign a code from subcategory R65.1, Systemic inflammatory response syndrome (SIRS) of non-infectious origin, for these cases.

If the infection meets the definition of principal diagnosis, it should be sequenced before the non-infectious condition. When both the associated non-infectious condition and the infection meet the definition of principal diagnosis, either may be assigned as principal diagnosis.

Only one code from category R65, Symptoms and signs specifically associated with systemic inflammation and infection, should be assigned. Therefore, when a non-infectious condition leads to an infection resulting in severe sepsis, assign the appropriate code from subcategory R65.2, Severe sepsis. Do not additionally assign a code from subcategory R65.1, Systemic inflammatory response syndrome (SIRS) of non-infectious origin. See Section I.C.18, *SIRS due to non-infectious process*

Patient admitted with multiple third-degree burns of right upper arm develops severe MSSA sepsis with septic shock, three days into admission

T22.391A Burn of third degree of multiple sites of right shoulder and upper arm limb, except wrist and hand, initial encounter

A41.01 Sepsis due to Methicillin susceptible Staphylococcus aureus

R65.21 Severe sepsis with septic shock

Explanation: Severe sepsis is coded rather than SIRS from R65 because it is documented as a severe systemic infectious response with septic shock to a noninfectious condition. The code for the systemic infection is not used as the principal diagnosis because it was not present on admission. The patient was admitted for the burn injury.

7) Sepsis and septic shock complicating abortion, pregnancy, childbirth, and the puerperium

See Section I.C.15, *Sepsis and septic shock complicating abortion, pregnancy, childbirth and the puerperium*

8) Newborn sepsis

See Section I.C.16, *f. Bacterial sepsis of Newborn*

e. Methicillin resistant Staphylococcus aureus (MRSA) conditions**1) Selection and sequencing of MRSA codes****(a) Combination codes for MRSA infection**

When a patient is diagnosed with an infection that is due to methicillin resistant *Staphylococcus aureus* (MRSA), and that infection has a combination code that includes the causal organism (e.g., sepsis, pneumonia) assign the appropriate combination code for the condition (e.g., code A41.02, Sepsis due to Methicillin resistant *Staphylococcus aureus* or code J15.212, Pneumonia due to Methicillin resistant *Staphylococcus aureus*). Do not assign code B95.62, Methicillin resistant *Staphylococcus aureus* infection as the cause of diseases classified elsewhere, as an additional code, because the combination code includes the type of infection and the MRSA organism. Do not assign a code from subcategory Z16.11, Resistance to penicillins, as an additional diagnosis.

See Section C.1, *for instructions on coding and sequencing of sepsis and severe sepsis.*

(b) Other codes for MRSA infection

When there is documentation of a current infection (e.g., wound infection, stitch abscess, urinary tract infection) due to MRSA, and that infection does not have a combination code that includes the causal organism, assign the appropriate code to identify the condition along with code B95.62, Methicillin resistant *Staphylococcus aureus* infection as the cause of diseases classified elsewhere for the MRSA infection. Do not assign a code from subcategory Z16.11, Resistance to penicillins.

(c) Methicillin susceptible Staphylococcus aureus (MSSA) and MRSA colonization

The condition or state of being colonized or carrying MSSA or MRSA is called colonization or carriage, while an individual person is described

as being colonized or being a carrier. Colonization means that MSSA or MRSA is present on or in the body without necessarily causing illness. A positive MRSA colonization test might be documented by the provider as "MRSA screen positive" or "MRSA nasal swab positive".

Assign code Z22.322, Carrier or suspected carrier of Methicillin resistant *Staphylococcus aureus*, for patients documented as having MRSA colonization. Assign code Z22.321, Carrier or suspected carrier of Methicillin susceptible *Staphylococcus aureus*, for patients documented as having MSSA colonization. Colonization is not necessarily indicative of a disease process or as the cause of a specific condition the patient may have unless documented as such by the provider.

(d) MRSA colonization and infection

If a patient is documented as having both MRSA colonization and infection during a hospital admission, code Z22.322, Carrier or suspected carrier of Methicillin resistant *Staphylococcus aureus*, and a code for the MRSA infection may both be assigned.

f. Zika virus infections**1) Code only confirmed cases**

Code only a confirmed diagnosis of Zika virus (A92.5, Zika virus disease) as documented by the provider. This is an exception to the hospital inpatient guideline Section II, H. In this context, "confirmation" does not require documentation of the type of test performed; the provider's diagnostic statement that the condition is confirmed is sufficient. This code should be assigned regardless of the stated mode of transmission.

If the provider documents "suspected", "possible" or "probable" Zika, do not assign code A92.5. Assign a code(s) explaining the reason for encounter (such as fever, rash, or joint pain) or Z20.821, Contact with and (suspected) exposure to Zika virus.

A 45-year-old female recently returned from a Caribbean vacation complaining of fever, headache, joint and muscle aches and is admitted for suspected influenza. Infectious Disease consult diagnoses Zika virus. Patient discharged with Zika virus disease and instructions for hydration, rest, acetaminophen, and follow-up with Infectious Disease.

A92.5 Zika virus disease

Explanation: Although only a confirmed diagnosis should be coded, when a provider documents a diagnosis of Zika virus, code A92.5 Zika virus disease, is reported whether or not there is any indication of the type of tests performed. If the patient is pregnant, code first a code from category O98.5- Other viral diseases complicating pregnancy, childbirth and the puerperium, followed by code (A92.5) for the confirmed Zika virus. See also guideline 1.C.15.a.1.

g. Coronavirus infections**1) COVID-19 infection (infection due to SARS-CoV-2)****(a) Code only confirmed cases**

Code only a confirmed diagnosis of the 2019 novel coronavirus disease (COVID-19) as documented by the provider or documentation of a positive COVID-19 test result. For a confirmed diagnosis, assign code U07.1, COVID-19. This is an exception to the hospital inpatient guideline Section II, H. In this context, "confirmation" does not require documentation of a positive test result for COVID-19; the provider's documentation that the individual has COVID-19 is sufficient.

If the provider documents "suspected", "possible", "probable", or "inconclusive" COVID-19, do not assign code U07.1. Instead, code the signs and symptoms reported. See guideline 1.C.1.g.1.g.

An elderly patient who is a former smoker is admitted with a productive cough, fatigue, and chest discomfort. CXR and PFTs indicate acute bronchitis. Treatment includes cough suppressants and anti-inflammatory medication, along with isolation precautions. The provider documents acute bronchitis likely due to COVID-19. Laboratory tests were inconclusive.

J20.9 Acute bronchitis, unspecified**Z87.891 History of tobacco dependence**

Explanation: Because the COVID-19 diagnosis was documented as likely by the provider, code U07.1 cannot be assigned. Instead a code explaining the reason for the encounter is used, in this case the acute bronchitis. Code J20.9 Acute bronchitis, unspecified, is used because the causative organism, specifically that which causes COVID-19, is not confirmed. Without further documentation of COVID-19 or another causative organism being present, code J20.8 Acute bronchitis due to other specified organisms, does not apply.

A 75-year-old male from a nursing home presents with shortness of breath and fever of 102.7. Patient was diagnosed with pneumonia, confirmed on CXR. Laboratory tests come back positive for COVID-19.

U07.1 COVID-19

J12.89 Other viral pneumonia

Explanation: The provider does not need to explicitly link the test result to the respiratory condition, nor does the provider need to explicitly document a diagnosis of COVID-19; the positive test result alone can be used to assign code U07.1. This advice is limited to laboratory tests for COVID-19 only. The significance of all other laboratory test results must be documented by the provider. According to guideline I.C.1.b, code U07.1 should be sequenced before the pneumonia code (J12.89).

(b) Sequencing of codes

When COVID-19 meets the definition of principal diagnosis, code U07.1, COVID-19, should be sequenced first, followed by the appropriate codes for associated manifestations, except when another guideline requires that certain codes be sequenced first, such as obstetrics, sepsis, or transplant complications.

The patient presents with acute hypoxic respiratory failure due to sepsis from COVID-19 related pneumonia.

A41.89 Other specified sepsis

U07.1 COVID-19

J12.89 Other viral pneumonia

J96.01 Acute respiratory failure with hypoxia

R65.20 Severe sepsis without septic shock

Explanation: If all conditions are present on admission, the systemic infection (sepsis) is sequenced first, followed by the code(s) for the localized infection (COVID-19 and pneumonia). The acute respiratory failure (acute organ dysfunction) is clearly documented as being associated with the sepsis, and therefore a severe sepsis code from subcategory R65.2- can also be assigned. If the sepsis had developed later in the admission, with or without any associated respiratory failure, the COVID-19 code would be sequenced first.

For a COVID-19 infection that progresses to sepsis, see Section I.C.1.d. Sepsis, Severe Sepsis, and Septic Shock

See Section I.C.15.s. for COVID-19 infection in pregnancy, childbirth, and the puerperium

See Section I.C.16.h. for COVID-19 infection in newborn

For a COVID-19 infection in a lung transplant patient, see Section I.C.19.g.3.a. Transplant complications other than kidney.

(c) Acute respiratory manifestations of COVID-19

When the reason for the encounter/admission is a respiratory manifestation of COVID-19, assign code U07.1, COVID-19, as the principal/first-listed diagnosis and assign code(s) for the respiratory manifestation(s) as additional diagnoses.

The following conditions are examples of common respiratory manifestations of COVID-19.

(i) Pneumonia

For a patient with pneumonia confirmed as due to COVID-19, assign codes U07.1, COVID-19, and J12.89, Other viral pneumonia.

(ii) Acute bronchitis

For a patient with acute bronchitis confirmed as due to COVID-19, assign codes U07.1, and J20.8, Acute bronchitis due to other specified organisms. Bronchitis not otherwise specified (NOS) due to COVID-19 should be coded using code U07.1 and J40, Bronchitis, not specified as acute or chronic.

(iii) Lower respiratory infection

If the COVID-19 is documented as being associated with a lower respiratory infection, not otherwise specified (NOS), or an acute respiratory infection, NOS, codes U07.1 and J22, Unspecified acute lower respiratory infection, should be assigned.

If the COVID-19 is documented as being associated with a respiratory infection, NOS, codes U07.1 and J98.8, Other specified respiratory disorders, should be assigned.

(iv) Acute respiratory distress syndrome

For acute respiratory distress syndrome (ARDS) due to COVID-19, assign codes U07.1, and J80, Acute respiratory distress syndrome.

(v) Acute respiratory failure

For acute respiratory failure due to COVID-19, assign code U07.1, and code J96.0-, Acute respiratory failure.

(d) Non-respiratory manifestations of COVID-19

When the reason for the encounter/admission is a non-respiratory manifestation (e.g., viral enteritis) of COVID-19, assign code U07.1, COVID-19, as the principal/first-listed diagnosis and assign code(s) for the manifestation(s) as additional diagnoses.

(e) Exposure to COVID-19

For asymptomatic individuals with actual or suspected exposure to COVID-19, assign code Z20.828, Contact with and (suspected) exposure to other viral communicable diseases.

For symptomatic individuals with actual or suspected exposure to COVID-19 and the infection has been ruled out, or test results are inconclusive or unknown, assign code Z20.828, Contact with and (suspected) exposure to other viral communicable diseases. See guideline I.C.21.c.1, Contact/Exposure, for additional guidance regarding the use of category Z20 codes.

If COVID-19 is confirmed, see guideline I.C.1.g.1.a.

(f) Screening for COVID-19

During the COVID-19 pandemic, a screening code is generally not appropriate. For encounters for COVID-19 testing, including preoperative testing, code as exposure to COVID-19 (guideline I.C.1.g.1.e).

Coding guidance will be updated as new information concerning any changes in the pandemic status becomes available.

(g) Signs and symptoms without definitive diagnosis of COVID-19

For patients presenting with any signs/symptoms associated with COVID-19 (such as fever, etc.) but a definitive diagnosis has not been established, assign the appropriate code(s) for each of the presenting signs and symptoms such as:

- R05 Cough
- R06.02 Shortness of breath
- R50.9 Fever, unspecified

If a patient with signs/symptoms associated with COVID-19 also has an actual or suspected contact with or exposure to COVID-19, assign Z20.828, Contact with and (suspected) exposure to other viral communicable diseases, as an additional code.

(h) Asymptomatic individuals who test positive for COVID-19

For asymptomatic individuals who test positive for COVID-19, see guideline I.C.1.g.1.a. Although the individual is asymptomatic, the individual has tested positive and is considered to have the COVID-19 infection.

(i) Personal history of COVID-19

For patients with a history of COVID-19, assign code Z86.19, Personal history of other infectious and parasitic diseases.

(j) Follow-up visits after COVID-19 infection has resolved

For individuals who previously had COVID-19 and are being seen for follow-up evaluation, and COVID-19 test results are negative, assign codes Z09, Encounter for follow-up examination after completed treatment for conditions other than malignant neoplasm, and Z86.19, Personal history of other infectious and parasitic diseases.

(k) Encounter for antibody testing

For an encounter for antibody testing that is not being performed to confirm a current COVID-19 infection, nor is a follow-up test after resolution of COVID-19, assign Z01.84, Encounter for antibody response examination.

Follow the applicable guidelines above if the individual is being tested to confirm a current COVID-19 infection.

For follow-up testing after a COVID-19 infection, see guideline I.C.1.g.1.j.

Chapter 1. Certain Infectious and Parasitic Diseases (A00-B99)

INCLUDES diseases generally recognized as communicable or transmissible
Use additional code to identify resistance to antimicrobial drugs (Z16.-)
EXCLUDES 1 certain localized infections — see body system-related chapters
carrier or suspected carrier of infectious disease (Z22.-)
infectious and parasitic diseases complicating pregnancy, childbirth and the puerperium (O98.-)
infectious and parasitic diseases specific to the perinatal period (P35-P39)
influenza and other acute respiratory infections (J00-J22)

This chapter contains the following blocks:

A00-A09 Intestinal infectious diseases
A15-A19 Tuberculosis
A20-A28 Certain zoonotic bacterial diseases
A30-A49 Other bacterial diseases
A50-A64 Infections with a predominantly sexual mode of transmission
A65-A69 Other spirochetal diseases
A70-A74 Other diseases caused by chlamydiae
A75-A79 Rickettsioses
A80-A89 Viral and prion infections of the central nervous system
A90-A99 Arthropod-borne viral fevers and viral hemorrhagic fevers
B00-B09 Viral infections characterized by skin and mucous membrane lesions
B10 Other human herpesviruses
B15-B19 Viral hepatitis
B20 Human immunodeficiency virus [HIV] disease
B25-B34 Other viral diseases
B35-B49 Mycoses
B50-B64 Protozoal diseases
B65-B83 Helminthiasis
B85-B89 Pediculosis, acariasis and other infestations
B90-B94 Sequelae of infectious and parasitic diseases
B95-B97 Bacterial and viral infectious agents
B99 Other infectious diseases

Intestinal infectious diseases (A00-A09)

✓⁴ A00 Cholera

DEF: Acute infection of the bowel due to vibrio cholerae that presents with profuse diarrhea, cramps, and vomiting, resulting in severe dehydration, electrolyte imbalance, and death. It is spread through ingestion of food or water contaminated with feces of infected persons.

A00.0 Cholera due to *Vibrio cholerae* 01, biovar cholerae CC

Classical cholera

A00.1 Cholera due to *Vibrio cholerae* 01, biovar eltor CC

Cholera eltor

A00.9 Cholera, unspecified CC

✓⁴ A01 Typhoid and paratyphoid fevers

DEF: Typhoid fever: Acute generalized illness caused by *Salmonella typhi*. Clinical features include fever, headache, abdominal pain, cough, toxemia, leukopenia, abnormal pulse, rose spots on the skin, bacteremia, hyperplasia of intestinal lymph nodes, mesenteric lymphadenopathy, and Peyer's patches in the intestines.

DEF: Paratyphoid fever: Prolonged febrile illness, caused by *Salmonella* serotypes other than *S. typhi*, especially *S. enterica* serotypes paratyphi A, B, and C.

✓⁵ A01.0 Typhoid fever

Infection due to *Salmonella typhi*

B99.8 Other infectious disease HIV

B99.9 Unspecified infectious disease

Chapter 2. Neoplasms (C00–D49)

Chapter-specific Guidelines with Coding Examples

The chapter-specific guidelines from the ICD-10-CM Official Guidelines for Coding and Reporting have been provided below. Along with these guidelines are coding examples, contained in the shaded boxes, that have been developed to help illustrate the coding and/or sequencing guidance found in these guidelines.

General guidelines

Chapter 2 of the ICD-10-CM contains the codes for most benign and all malignant neoplasms. Certain benign neoplasms, such as prostatic adenomas, may be found in the specific body system chapters. To properly code a neoplasm, it is necessary to determine from the record if the neoplasm is benign, in-situ, malignant, or of uncertain histologic behavior. If malignant, any secondary (metastatic) sites should also be determined.

Primary malignant neoplasms overlapping site boundaries

A primary malignant neoplasm that overlaps two or more contiguous (next to each other) sites should be classified to the subcategory/code .8 ('overlapping lesion'), unless the combination is specifically indexed elsewhere. For multiple neoplasms of the same site that are not contiguous such as tumors in different quadrants of the same breast, codes for each site should be assigned.

A 73-year-old white female with a large rapidly growing malignant tumor in the left breast extending from the upper outer quadrant into the axillary tail

C50.812 Malignant neoplasm of overlapping sites of left female breast

Explanation: Because this is a single large tumor that overlaps two contiguous sites, a single code for overlapping sites is assigned.

A 52-year old white female with two distinct lesions of the right breast, one (0.5 cm) in the upper outer quadrant and a second (1.5 cm) in the lower outer quadrant; path report indicates both lesions are malignant

C50.411 Malignant neoplasm of upper-outer quadrant of right female breast

C50.511 Malignant neoplasm of lower-outer quadrant of right female breast

Explanation: This patient has two distinct malignant lesions of right breast in adjacent quadrants. Because the lesions are not contiguous, two codes are reported.

Malignant neoplasm of ectopic tissue

Malignant neoplasms of ectopic tissue are to be coded to the site of origin mentioned, e.g., ectopic pancreatic malignant neoplasms involving the stomach are coded to malignant neoplasm of pancreas, unspecified (C25.9).

The neoplasm table in the Alphabetic Index should be referenced first. However, if the histological term is documented, that term should be referenced first, rather than going immediately to the Neoplasm Table, in order to determine which column in the Neoplasm Table is appropriate. For example, if the documentation indicates "adenoma," refer to the term in the Alphabetic Index to review the entries under this term and the instructional note to "see also neoplasm, by site, benign." The table provides the proper code based on the type of neoplasm and the site. It is important to select the proper column in the table that corresponds to the type of neoplasm. The Tabular List should then be referenced to verify that the correct code has been selected from the table and that a more specific site code does not exist.

See Section I.C.21. Factors influencing health status and contact with health services, Status, for information regarding Z15.0, codes for genetic susceptibility to cancer.

a. Treatment directed at the malignancy

If the treatment is directed at the malignancy, designate the malignancy as the principal diagnosis.

The only exception to this guideline is if a patient admission/encounter is solely for the administration of chemotherapy, immunotherapy or external beam radiation therapy, assign the appropriate Z51.-- code as the first-listed or principal diagnosis, and the diagnosis or problem for which the service is being performed as a secondary diagnosis.

b. Treatment of secondary site

When a patient is admitted because of a primary neoplasm with metastasis and treatment is directed toward the secondary site only, the secondary neoplasm is designated as the principal diagnosis even though the primary malignancy is still present.

Patient with primary prostate cancer with metastasis to lungs admitted for wedge resection of mass in right lung

C78.01 Secondary malignant neoplasm of right lung

C61 Malignant neoplasm of prostate

Explanation: Since the admission is for treatment of the lung metastasis, the secondary lung metastasis is sequenced before the primary prostate cancer.

c. Coding and sequencing of complications

Coding and sequencing of complications associated with the malignancies or with the therapy thereof are subject to the following guidelines:

1) Anemia associated with malignancy

When admission/encounter is for management of an anemia associated with the malignancy, and the treatment is only for anemia, the appropriate code for the malignancy is sequenced as the principal or first-listed diagnosis followed by the appropriate code for the anemia (such as code D63.0, Anemia in neoplastic disease).

Patient is admitted for treatment of anemia in advanced colon cancer

C18.9 Malignant neoplasm of colon, unspecified

D63.0 Anemia in neoplastic disease

Explanation: Even though the admission was solely to treat the anemia, this guideline indicates that the code for the malignancy is sequenced first.

2) Anemia associated with chemotherapy, immunotherapy and radiation therapy

When the admission/encounter is for management of an anemia associated with an adverse effect of the administration of chemotherapy or immunotherapy and the only treatment is for the anemia, the anemia code is sequenced first followed by the appropriate codes for the neoplasm and the adverse effect (T45.1X5, Adverse effect of antineoplastic and immunosuppressive drugs).

A 56-year-old Hispanic male with grade II follicular lymphoma involving multiple lymph node sites referred for blood transfusion to treat anemia due to chemotherapy

D64.81 Anemia due to antineoplastic chemotherapy

C82.18 Follicular lymphoma grade II, lymph nodes of multiple sites

T45.1X5A Adverse effect of antineoplastic and immunosuppressive drugs, initial encounter

Explanation: The code for the anemia is sequenced first followed by the code for the malignant neoplasm and lastly the code for the adverse effect.

When the admission/encounter is for management of an anemia associated with an adverse effect of radiotherapy, the anemia code should be sequenced first, followed by the appropriate neoplasm code and code Y84.2, Radiological procedure and radiotherapy as the cause of abnormal reaction of the patient, or of later complication, without mention of misadventure at the time of the procedure.

A 55-year-old male with a large malignant rectal tumor has been receiving external radiation therapy to shrink the tumor prior to planned surgery. He is admitted today for a blood transfusion to treat anemia related to radiation therapy.

D64.89 Other specified anemias

C20 Malignant neoplasm of rectum

Y84.2 Radiological procedure and radiotherapy as the cause of abnormal reaction of the patient, or of later complication, without mention of misadventure at the time of the procedure

Explanation: The code for the anemia is sequenced first, followed by the code for the malignancy, and lastly the code for the abnormal reaction due to radiotherapy.

3) Management of dehydration due to the malignancy

When the admission/encounter is for management of dehydration due to the malignancy and only the dehydration is being treated (intravenous rehydration), the dehydration is sequenced first, followed by the code(s) for the malignancy.

4) Treatment of a complication resulting from a surgical procedure

When the admission/encounter is for treatment of a complication resulting from a surgical procedure, designate the complication as the principal or first-listed diagnosis if treatment is directed at resolving the complication.

d. Primary malignancy previously excised

When a primary malignancy has been previously excised or eradicated from its site and there is no further treatment directed to that site and there is no evidence of any existing primary malignancy at that site, a code from category Z85, Personal history of malignant neoplasm, should be used to indicate the former site of the malignancy. Any mention of extension, invasion, or metastasis to another site is coded as a secondary malignant neoplasm to that site. The secondary site may be the principal or first-listed diagnosis with the Z85 code used as a secondary code.

History of breast cancer, left radical mastectomy 18 months ago with no current treatment; bronchoscopy with lung biopsy shows metastatic disease in the right lung

C78.01 Secondary malignant neoplasm of right lung

Z85.3 Personal history of malignant neoplasm of breast

Explanation: The patient has undergone a diagnostic procedure that revealed metastatic breast cancer in the right lung. The code for the secondary (metastatic) site is sequenced first followed by a personal history code to identify the former site of the primary malignancy.

e. Admissions/encounters involving chemotherapy, immunotherapy and radiation therapy

1) Episode of care involves surgical removal of neoplasm

When an episode of care involves the surgical removal of a neoplasm, primary or secondary site, followed by adjunct chemotherapy or radiation treatment during the same episode of care, the code for the neoplasm should be assigned as principal or first-listed diagnosis.

2) Patient admission/encounter solely for administration of chemotherapy, immunotherapy and radiation therapy

If a patient admission/encounter is solely for the administration of chemotherapy, immunotherapy or external beam radiation therapy assign code Z51.0, Encounter for antineoplastic radiation therapy, or Z51.11, Encounter for antineoplastic chemotherapy, or Z51.12, Encounter for antineoplastic immunotherapy as the first-listed or principal diagnosis. If a patient receives more than one of these therapies during the same admission more than one of these codes may be assigned, in any sequence.

The malignancy for which the therapy is being administered should be assigned as a secondary diagnosis.

If a patient admission/encounter is for the insertion or implantation of radioactive elements (e.g., brachytherapy) the appropriate code for the malignancy is sequenced as the principal or first-listed diagnosis. Code Z51.0 should not be assigned.

3) Patient admitted for radiation therapy, chemotherapy or immunotherapy and develops complications

When a patient is admitted for the purpose of external beam radiotherapy, immunotherapy or chemotherapy and develops complications such as uncontrolled nausea and vomiting or dehydration, the principal or first-listed diagnosis is Z51.0, Encounter for antineoplastic radiation therapy, or Z51.11, Encounter for antineoplastic chemotherapy, or Z51.12, Encounter for antineoplastic immunotherapy followed by any codes for the complications.

When a patient is admitted for the purpose of insertion or implantation of radioactive elements (e.g., brachytherapy) and develops complications such as uncontrolled nausea and vomiting or dehydration, the principal or first-listed diagnosis is the appropriate code for the malignancy followed by any codes for the complications.

A patient with prostate cancer was admitted for brachytherapy seed implantation and consequently developed urinary retention.

C61 Malignant neoplasm of prostate

R33.9 Retention of urine, unspecified

Explanation: A code for the malignancy should be listed as the principal diagnosis when insertion of a radioactive element is the reason for admission, even when a complication related to that radioactive element occurs. Codes describing the complications should be listed as secondary codes.

f. Admission/encounter to determine extent of malignancy

When the reason for admission/encounter is to determine the extent of the malignancy, or for a procedure such as paracentesis or thoracentesis, the primary malignancy or appropriate metastatic site is designated as the principal or first-listed diagnosis, even though chemotherapy or radiotherapy is administered.

Patient with left lung cancer with malignant pleural effusion admitted for paracentesis and initiation/administration of chemotherapy

C34.92 Malignant neoplasm of unspecified part of left bronchus or lung

J91.0 Malignant pleural effusion

Z51.11 Encounter for antineoplastic chemotherapy

Explanation: The lung cancer is sequenced before the chemotherapy in this instance because the paracentesis for the malignant effusion is also being performed. An instructional note under the malignant effusion instructs that the lung cancer be sequenced first.

g. Symptoms, signs, and abnormal findings listed in Chapter 18 associated with neoplasms

Symptoms, signs, and ill-defined conditions listed in Chapter 18 characteristic of, or associated with, an existing primary or secondary site malignancy cannot be used to replace the malignancy as principal or first-listed diagnosis, regardless of the number of admissions or encounters for treatment and care of the neoplasm.

See Section I.C.21. Factors influencing health status and contact with health services, Encounter for prophylactic organ removal.

h. Admission/encounter for pain control/management

See Section I.C.6, for information on coding admission/encounter for pain control/management.

i. Malignancy in two or more noncontiguous sites

A patient may have more than one malignant tumor in the same organ. These tumors may represent different primaries or metastatic disease, depending on the site. Should the documentation be unclear, the provider should be queried as to the status of each tumor so that the correct codes can be assigned.

j. Disseminated malignant neoplasm, unspecified

Code C80.0, Disseminated malignant neoplasm, unspecified, is for use only in those cases where the patient has advanced metastatic disease and no known primary or secondary sites are specified. It should not be used in place of assigning codes for the primary site and all known secondary sites.

Patient who has had no medical care for many years is seen today and diagnosed with carcinomatosis

C80.0 Disseminated malignant neoplasm, unspecified

Explanation: Carcinomatosis NOS is an "includes" note under this code. Should seldom be used but is available for use in cases such as this.

k. Malignant neoplasm without specification of site

Code C80.1, Malignant (primary) neoplasm, unspecified, equates to Cancer, unspecified. This code should only be used when no determination can be made as to the primary site of a malignancy. This code should rarely be used in the inpatient setting.

l. Sequencing of neoplasm codes**1) Encounter for treatment of primary malignancy**

If the reason for the encounter is for treatment of a primary malignancy, assign the malignancy as the principal/first-listed diagnosis. The primary site is to be sequenced first, followed by any metastatic sites.

2) Encounter for treatment of secondary malignancy

When an encounter is for a primary malignancy with metastasis and treatment is directed toward the metastatic (secondary) site(s) only, the metastatic site(s) is designated as the principal/first-listed diagnosis. The primary malignancy is coded as an additional code.

Patient has primary colon cancer with metastasis to rib and is evaluated for possible excision of portion of rib bone

C79.51 Secondary malignant neoplasm of bone

C18.9 Malignant neoplasm of colon, unspecified

Explanation: The treatment for this encounter is focused on the metastasis to the rib bone rather than the primary colon cancer, thus indicating that the bone metastasis is sequenced as the first-listed code.

3) Malignant neoplasm in a pregnant patient

When a pregnant woman has a malignant neoplasm, a code from subcategory O9A.1-, Malignant neoplasm complicating pregnancy, childbirth, and the puerperium, should be sequenced first, followed by the appropriate code from Chapter 2 to indicate the type of neoplasm.

A 30-year-old pregnant female in second trimester evaluated for thyroid malignancy

O9A.112 Malignant neoplasm complicating pregnancy, second trimester

C73 Malignant neoplasm of thyroid gland

Explanation: Codes from chapter 15 describing complications of pregnancy are sequenced as first-listed codes, further specified by codes from other chapters such as neoplastic, unless the pregnancy is documented as incidental to the condition. See also guideline I.C.15.a.1.

4) Encounter for complication associated with a neoplasm

When an encounter is for management of a complication associated with a neoplasm, such as dehydration, and the treatment is only for the complication, the complication is coded first, followed by the appropriate code(s) for the neoplasm.

The exception to this guideline is anemia. When the admission/encounter is for management of an anemia associated with the malignancy, and the treatment is only for anemia, the appropriate code for the malignancy is sequenced as the principal or first-listed diagnosis followed by code D63.0, Anemia in neoplastic disease.

Patient with pancreatic cancer is seen for initiation of TPN for cancer-related moderate protein-calorie malnutrition

E44.0 Moderate protein-calorie malnutrition

C25.9 Malignant neoplasm of pancreas, unspecified

Explanation: The encounter is to initiate treatment for malnutrition, a common complication of many types of neoplasms, and is sequenced first.

5) Complication from surgical procedure for treatment of a neoplasm

When an encounter is for treatment of a complication resulting from a surgical procedure performed for the treatment of the neoplasm, designate the complication as the principal/first-listed diagnosis. See the guideline regarding the coding of a current malignancy versus personal history to determine if the code for the neoplasm should also be assigned.

6) Pathologic fracture due to a neoplasm

When an encounter is for a pathological fracture due to a neoplasm, and the focus of treatment is the fracture, a code from subcategory M84.5, Pathological fracture in neoplastic disease, should be sequenced first, followed by the code for the neoplasm.

If the focus of treatment is the neoplasm with an associated pathological fracture, the neoplasm code should be sequenced first, followed by a code from M84.5 for the pathological fracture.

m. Current malignancy versus personal history of malignancy

When a primary malignancy has been excised but further treatment, such as an additional surgery for the malignancy, radiation therapy or chemotherapy is directed to that site, the primary malignancy code should be used until treatment is completed.

Female patient with ongoing chemotherapy after right mastectomy for breast cancer

C50.911 Malignant neoplasm of unspecified site of right female breast

Z90.11 Acquired absence of right breast and nipple

Explanation: Even though the breast has been removed, the breast cancer is still being treated with chemotherapy and therefore is still coded as a current condition rather than personal history.

When a primary malignancy has been previously excised or eradicated from its site, there is no further treatment (of the malignancy) directed to that site, and there is no evidence of any existing primary malignancy at that site, a code from category Z85, Personal history of malignant neoplasm, should be used to indicate the former site of the malignancy.

Codes from subcategories Z85.0–Z85.85 should only be assigned for the former site of a primary malignancy, not the site of a secondary malignancy. **Code Z85.89** may be assigned for the former site(s) of either a primary or secondary malignancy.

See Section I.C.21. Factors influencing health status and contact with health services, History (of)

n. Leukemia, multiple myeloma, and malignant plasma cell neoplasms in remission versus personal history

The categories for leukemia, and category C90, Multiple myeloma and malignant plasma cell neoplasms, have codes indicating whether or not the leukemia has achieved remission. There are also codes Z85.6, Personal history of leukemia, and Z85.79, Personal history of other malignant neoplasms of lymphoid, hematopoietic and related tissues. If the documentation is unclear as to whether the leukemia has achieved remission, the provider should be queried.

See Section I.C.21. Factors influencing health status and contact with health services, History (of)

o. Aftercare following surgery for neoplasm

See Section I.C.21. Factors influencing health status and contact with health services, Aftercare

p. Follow-up care for completed treatment of a malignancy

See Section I.C.21. Factors influencing health status and contact with health services, Follow-up

q. Prophylactic organ removal for prevention of malignancy

See Section I.C. 21, Factors influencing health status and contact with health services, Prophylactic organ removal

r. Malignant neoplasm associated with transplanted organ

A malignant neoplasm of a transplanted organ should be coded as a transplant complication. Assign first the appropriate code from category T86.-, Complications of transplanted organs and tissue, followed by code C80.2, Malignant neoplasm associated with transplanted organ. Use an additional code for the specific malignancy.

Chapter 2. Neoplasms (C00-D49)

NOTE

Functional activity

All neoplasms are classified in this chapter, whether they are functionally active or not. An additional code from Chapter 4 may be used, to identify functional activity associated with any neoplasm.

Morphology [Histology]

Chapter 2 classifies neoplasms primarily by site (topography), with broad groupings for behavior, malignant, in situ, benign, etc. The Table of Neoplasms should be used to identify the correct topography code. In a few cases, such as for malignant melanoma and certain neuroendocrine tumors, the morphology (histologic type) is included in the category and codes.

Primary malignant neoplasms overlapping site boundaries

A primary malignant neoplasm that overlaps two or more contiguous (next to each other) sites should be classified to the subcategory/code .8 ("overlapping lesion"), unless the combination is specifically indexed elsewhere. For multiple neoplasms of the same site that are not contiguous, such as tumors in different quadrants of the same breast, codes for each site should be assigned.

Malignant neoplasm of ectopic tissue

Malignant neoplasms of ectopic tissue are to be coded to the site mentioned, e.g., ectopic pancreatic malignant neoplasms are coded to pancreas, unspecified (C25.9).

AHA: 2017.4Q.103; 2017.1Q.4,5-6,8

This chapter contains the following blocks:

- C00-C14 Malignant neoplasms of lip, oral cavity and pharynx
- C15-C26 Malignant neoplasms of digestive organs
- C30-C39 Malignant neoplasms of respiratory and intrathoracic organs
- C40-C41 Malignant neoplasms of bone and articular cartilage
- C43-C44 Melanoma and other malignant neoplasms of skin
- C45-C49 Malignant neoplasms of mesothelial and soft tissue
- C50 Malignant neoplasms of breast
- C51-C58 Malignant neoplasms of female genital organs
- C60-C63 Malignant neoplasms of male genital organs
- C64-C68 Malignant neoplasms of urinary tract
- C69-C72 Malignant neoplasms of eye, brain and other parts of central nervous system
- C73-C75 Malignant neoplasms of thyroid and other endocrine glands

Use additional code to identify:
exposure to environmental tobacco smoke (Z77.22)
exposure to tobacco smoke in the perinatal period (P96.81)
history of tobacco dependence (Z87.891)
occupational exposure to environmental tobacco smoke (Z57.31)
tobacco dependence (F17.-)
tobacco use (Z72.0)
EXCLUDES 1 Kaposi's sarcoma of lung (C46.5-)
malignant carcinoid tumor of the bronchus and lung (C7A.090)
- AHA:** 2019,1Q,16
TIP: When documented, assign code I31.3 for associated malignant pericardial effusion. If the sole reason for admission is to treat the effusion with no treatment of the lung malignancy rendered, code I31.3 may be sequenced first.
- ✓5ⁿ C34.0 Malignant neoplasm of main bronchus** CC HCC
Malignant neoplasm of carina
Malignant neoplasm of hilus (of lung)
- C34.00 Malignant neoplasm of unspecified main bronchus** CC HCC

- ✓5N** C40.8 Malignant neoplasm of **overlapping sites** of bone and articular cartilage of limb
- C40.80 Malignant neoplasm of overlapping sites of bone and articular cartilage of unspecified limb CC HCC
- C40.81 Malignant neoplasm of overlapping sites of bone and articular cartilage of **right** limb CC HCC
- C40.82 Malignant neoplasm of overlapping sites of bone and articular cartilage of **left** limb CC HCC
- ✓5N** C40.9 Malignant neoplasm of unspecified bones and articular cartilage of limb
- C40.90 Malignant neoplasm of unspecified bones and articular cartilage of unspecified limb CC HCC
- C40.91 Malignant neoplasm of unspecified bones and articular cartilage of **right** limb CC HCC
- C40.92 Malignant neoplasm of unspecified bones and articular cartilage of **left** limb CC HCC
- ✓4N** C41 Malignant neoplasm of **bone and articular cartilage of other and unspecified sites**
- EXCLUDES1** malignant neoplasm of bones of limbs (C40.-)
- malignant neoplasm of cartilage of ear (C49.0)
- malignant neoplasm of cartilage of eyelid (C49.0)
- malignant neoplasm of cartilage of larynx (C32.3)
- malignant neoplasm of cartilage of limbs (C40.-)
- malignant neoplasm of cartilage of nose (C30.0)

- C41.0 Malignant neoplasm of **bones of skull and face** CC HCC
- Malignant neoplasm of maxilla (superior)
- Malignant neoplasm of orbital bone
- EXCLUDES2** carcinoma, any type except intraosseous or odontogenic of:
- maxillary sinus (C31.0)
 - upper jaw (C03.0)
 - malignant neoplasm of jaw bone (lower) (C41.1)
- C41.1 Malignant neoplasm of **mandible** CC HCC
- Malignant neoplasm of inferior maxilla
- Malignant neoplasm of lower jaw bone
- EXCLUDES2** carcinoma, any type except intraosseous or odontogenic of:
- jaw NOS (C03.9)
 - lower (C03.1)
 - malignant neoplasm of upper jaw bone (C41.0)

- C41.2 Malignant neoplasm of **vertebral column** CC HCC
- EXCLUDES1** malignant neoplasm of sacrum and coccyx (C41.4)
- C41.3 Malignant neoplasm of **ribs, sternum and clavicle** CC HCC
- C41.4 Malignant neoplasm of **pelvic bones, sacrum and coccyx** CC HCC
- C41.9 Malignant neoplasm of **bone and articular cartilage, unspecified** CC HCC

Melanoma and other malignant neoplasms of skin (C43-C44)

- ✓4N** C43 Malignant melanoma of **skin**
- EXCLUDES1** melanoma in situ (D03.-)
- EXCLUDES2** malignant melanoma of skin of genital organs (C51-C52, C60.-, C63.-)
- Merkel cell carcinoma (C4A.-)
- sites other than skin - code to malignant neoplasm of the site
- C43.0 Malignant melanoma of **lip** HCC
- EXCLUDES1** malignant neoplasm of vermilion border of lip (C00.0-C00.2)

C43.1–C44.1021

Chapter 2. Neoplasms

ICD-10-CM 2021

- ✓ 5th C43.1 Malignant melanoma of eyelid, including canthus
AHA: 2018,4Q,4
- C43.10 Malignant melanoma of unspecified eyelid, including canthus HCC
- ✓ 6th C43.11 Malignant melanoma of right eyelid, including canthus
C43.111 Malignant melanoma of right upper eyelid, including canthus HCC
C43.112 Malignant melanoma of right lower eyelid, including canthus HCC
- ✓ 6th C43.12 Malignant melanoma of left eyelid, including canthus
C43.121 Malignant melanoma of left upper eyelid, including canthus HCC
C43.122 Malignant melanoma of left lower eyelid, including canthus HCC
- ✓ 5th C43.2 Malignant melanoma of ear and external auricular canal
C43.20 Malignant melanoma of unspecified ear and external auricular canal HCC
C43.21 Malignant melanoma of right ear and external auricular canal HCC
C43.22 Malignant melanoma of left ear and external auricular canal HCC
- ✓ 5th C43.3 Malignant melanoma of other and unspecified parts of face
C43.30 Malignant melanoma of unspecified part of face HCC
C43.31 Malignant melanoma of nose HCC
C43.39 Malignant melanoma of other parts of face HCC
- C43.4 Malignant melanoma of scalp and neck HCC
- ✓ 5th C43.5 Malignant melanoma of trunk
EXCLUDES 1 malignant neoplasm of anus NOS (C21.0)
malignant neoplasm of scrotum (C63.2)
- C43.51 Malignant melanoma of anal skin HCC
Malignant melanoma of anal margin
Malignant melanoma of perianal skin
- C43.52 Malignant melanoma of skin of breast HCC
- C43.59 Malignant melanoma of other part of trunk HCC
- ✓ 5th C43.6 Malignant melanoma of upper limb, including shoulder
C43.60 Malignant melanoma of unspecified upper limb, including shoulder HCC
C43.61 Malignant melanoma of right upper limb, including shoulder HCC
C43.62 Malignant melanoma of left upper limb, including shoulder HCC
- ✓ 5th C43.7 Malignant melanoma of lower limb, including hip
C43.70 Malignant melanoma of unspecified lower limb, including hip HCC
C43.71 Malignant melanoma of right lower limb, including hip HCC
C43.72 Malignant melanoma of left lower limb, including hip HCC
- C43.8 Malignant melanoma of overlapping sites of skin HCC
- C43.9 Malignant melanoma of skin, unspecified HCC
Malignant melanoma of unspecified site of skin
Melanoma (malignant) NOS
- ✓ 4th C4A Merkel cell carcinoma
DEF: Malignant cutaneous cancer predominantly found in elderly patients with sun exposure that usually presents as a flesh-colored or bluish-red lump typically seen on the neck, head, and face.
- C4A.0 Merkel cell carcinoma of lip HCC
EXCLUDES 1 malignant neoplasm of vermilion border of lip (C00.0–C00.2)
- ✓ 5th C4A.1 Merkel cell carcinoma of eyelid, including canthus
AHA: 2018,4Q,4
C4A.10 Merkel cell carcinoma of unspecified eyelid, including canthus HCC
- ✓ 6th C4A.11 Merkel cell carcinoma of right eyelid, including canthus
C4A.111 Merkel cell carcinoma of right upper eyelid, including canthus HCC
C4A.112 Merkel cell carcinoma of right lower eyelid, including canthus HCC
- ✓ 6th C4A.12 Merkel cell carcinoma of left eyelid, including canthus
C4A.121 Merkel cell carcinoma of left upper eyelid, including canthus HCC

- C4A.122 Merkel cell carcinoma of left lower eyelid, including canthus HCC
- ✓ 5th C4A.2 Merkel cell carcinoma of ear and external auricular canal
C4A.20 Merkel cell carcinoma of unspecified ear and external auricular canal HCC
C4A.21 Merkel cell carcinoma of right ear and external auricular canal HCC
C4A.22 Merkel cell carcinoma of left ear and external auricular canal HCC
- ✓ 5th C4A.3 Merkel cell carcinoma of other and unspecified parts of face
C4A.30 Merkel cell carcinoma of unspecified part of face HCC
C4A.31 Merkel cell carcinoma of nose HCC
C4A.39 Merkel cell carcinoma of other parts of face HCC
- C4A.4 Merkel cell carcinoma of scalp and neck HCC
- ✓ 5th C4A.5 Merkel cell carcinoma of trunk
EXCLUDES 1 malignant neoplasm of anus NOS (C21.0)
malignant neoplasm of scrotum (C63.2)
- C4A.51 Merkel cell carcinoma of anal skin HCC
Merkel cell carcinoma of anal margin
Merkel cell carcinoma of perianal skin
- C4A.52 Merkel cell carcinoma of skin of breast HCC
- C4A.59 Merkel cell carcinoma of other part of trunk HCC
- ✓ 5th C4A.6 Merkel cell carcinoma of upper limb, including shoulder
C4A.60 Merkel cell carcinoma of unspecified upper limb, including shoulder HCC
C4A.61 Merkel cell carcinoma of right upper limb, including shoulder HCC
C4A.62 Merkel cell carcinoma of left upper limb, including shoulder HCC
- ✓ 5th C4A.7 Merkel cell carcinoma of lower limb, including hip
C4A.70 Merkel cell carcinoma of unspecified lower limb, including hip HCC
C4A.71 Merkel cell carcinoma of right lower limb, including hip HCC
C4A.72 Merkel cell carcinoma of left lower limb, including hip HCC
- C4A.8 Merkel cell carcinoma of overlapping sites HCC
- C4A.9 Merkel cell carcinoma, unspecified HCC
Merkel cell carcinoma of unspecified site
Merkel cell carcinoma NOS
- ✓ 4th C44 Other and unspecified malignant neoplasm of skin
INCLUDES malignant neoplasm of sebaceous glands
malignant neoplasm of sweat glands
EXCLUDES 1 Kaposi's sarcoma of skin (C46.0)
malignant melanoma of skin (C43.-)
malignant neoplasm of skin of genital organs (C51–C52, C60.-, C63.2)
Merkel cell carcinoma (C4A.-)
- DEF: Basal cell carcinoma: Abnormal growth of skin cells that arises from the deepest layer of the epidermis and may present as an open sore, red patches, pink growth, or scar. Typically caused by sun exposure, it is one of the most common forms of skin cancer.
- DEF: Squamous cell carcinoma: Uncontrolled growth of abnormal skin cells that arises from the outer layers of the skin (epidermis) and may present as an open sore. It is characterized by a firm, red nodule, elevated growth with a central depression, or a flat sore with a scaly crust.
- ✓ 5th C44.0 Other and unspecified malignant neoplasm of skin of lip
EXCLUDES 1 malignant neoplasm of lip (C00.-)
- C44.00 Unspecified malignant neoplasm of skin of lip
- C44.01 Basal cell carcinoma of skin of lip
- C44.02 Squamous cell carcinoma of skin of lip
- C44.09 Other specified malignant neoplasm of skin of lip
- ✓ 5th C44.1 Other and unspecified malignant neoplasm of skin of eyelid, including canthus
EXCLUDES 1 connective tissue of eyelid (C49.0)
AHA: 2018,4Q,4
- ✓ 6th C44.10 Unspecified malignant neoplasm of skin of eyelid, including canthus
C44.101 Unspecified malignant neoplasm of skin of unspecified eyelid, including canthus
- ✓ 7th C44.102 Unspecified malignant neoplasm of skin of right eyelid, including canthus
C44.1021 Unspecified malignant neoplasm of skin of right upper eyelid, including canthus

	C44.1022	Unspecified malignant neoplasm of skin of right lower eyelid, including canthus		✓7N C44.199	Other specified malignant neoplasm of skin of left eyelid, including canthus

Malignant neoplasms of mesothelial and soft tissue (C45–C49)

✓4N C45 Mesothelioma

DEF: Rare type of cancer that forms in the thin layer of protective tissue that covers the majority of internal organs (mesothelium).

C45.0 Mesothelioma of pleura

CC MCC

EXCLUDES 1 other malignant neoplasm of pleura (C38.4)

AHA: 2017.2Q.11

TIP: For pleural mesothelioma that has metastasized to the chest wall, assign this code for the primary site along with C79.89 for metastatic cancer in the chest wall.

C45.1 Mesothelioma of peritoneum

CC MCC

Mesothelioma of cul-de-sac

Mesothelioma of mesentery

Mesothelioma of mesocolon

Mesothelioma of omentum

Mesothelioma of peritoneum (parietal) (pelvic)

EXCLUDES 1 other malignant neoplasm of soft tissue of peritoneum (C48.-)

C45.2 Mesothelioma of pericardium

CC MCC

EXCLUDES 1 other malignant neoplasm of pericardium (C38.0)

C45.7 Mesothelioma of other sites

MCC

C45.9 Mesothelioma, unspecified HCC**✓4M C46 Kaposi's sarcoma**

Code first any human immunodeficiency virus [HIV] disease (B20)

DEF: Malignant neoplasm that causes patches of abnormal tissue to grow under the skin, in the lining of the mouth, nose, and throat, in lymph nodes, or in other visceral organs. Kaposi's sarcoma is caused by human herpesvirus8 (HHV8).**C46.0 Kaposi's sarcoma of skin** HIV CC HCC**C46.1 Kaposi's sarcoma of soft tissue** HIV CC HCC

✓ 4th **C83** Non-follicular lymphoma

EXCLUDES 1 personal history of non-Hodgkin lymphoma (Z85.72)

✓ 5th **C83.0** Small cell B-cell lymphoma

Lymphoplasmacytic lymphoma

Nodal marginal zone lymphoma

Non-leukemic variant of B-CLL

Splenic marginal zone lymphoma

EXCLUDES 1 chronic lymphocytic leukemia (C91.1)

mature T/NK-cell lymphomas (C84.-)

Waldenström macroglobulinemia (C88.0)

DEF: Nonfollicular lymphoma that is rare, slow growing, and usually found in the older population.

C83.00 Small cell B-cell lymphoma, unspecified site HIV CC MCC

C83.01 Small cell B-cell lymphoma, lymph nodes of head, face, and neck HIV CC MCC

C83.02 Small cell B-cell lymphoma, intrathoracic lymph nodes HIV CC MCC

C83.03 Small cell B-cell lymphoma, intra-abdominal lymph nodes HIV CC MCC

C83.04 Small cell B-cell lymphoma, lymph nodes of axilla and upper limb HIV CC MCC

C83.05 Small cell B-cell lymphoma, lymph nodes of inguinal region and lower limb HIV CC MCC

C83.06 Small cell B-cell lymphoma, intrapelvic lymph nodes HIV CC MCC

C83.07 Small cell B-cell lymphoma, spleen HIV CC MCC

C83.08 Small cell B-cell lymphoma, lymph nodes of multiple sites HIV CC MCC

C83.09 Small cell B-cell lymphoma, extranodal and solid organ sites HIV CC HCC

✓ 5^A C83.1 Mantle cell lymphoma

Centrocytic lymphoma

Malignant lymphomatous polyposis

DEF: Rare form of B-cell non-Hodgkin lymphoma named for the location of the tumor cell production, the mantle zone of the lymph nodes.

C83.10 Mantle cell lymphoma, unspecified site HIV CC HCC

C83.11 Mantle cell lymphoma, lymph nodes of head, face, and neck HIV CC HCC

C83.12 Mantle cell lymphoma, intrathoracic lymph nodes HIV CC HCC

C83.13 Mantle cell lymphoma, intra-abdominal lymph nodes HIV CC HCC

C83.14 Mantle cell lymphoma, lymph nodes of axilla and upper limb HIV CC HCC

C83.15 Mantle cell lymphoma, lymph nodes of inguinal region and lower limb HIV CC HCC

C83.16 Mantle cell lymphoma, intrapelvic lymph nodes HIV CC HCC

C83.17 Mantle cell lymphoma, spleen HIV CC HCC

C83.18 Mantle cell lymphoma, lymph nodes of multiple sites HIV CC HCC

C83.19 Mantle cell lymphoma, extranodal and solid organ sites HIV CC HCC

✓ 5^A C83.3 Diffuse large B-cell lymphoma

Anaplastic diffuse large B-cell lymphoma

CD30-positive diffuse large B-cell lymphoma

Centroblastic diffuse large B-cell lymphoma

Diffuse large B-cell lymphoma, subtype not specified

Immunoblastic diffuse large B-cell lymphoma

Plasmablastic diffuse large B-cell lymphoma

T-cell rich diffuse large B-cell lymphoma

EXCLUDES 1 mediastinal (thymic) large B-cell lymphoma (C85.2-) mature T/NK-cell lymphomas (C84.-)

DEF: Nonfollicular lymphoma that is one of the more common types of lymphoma. This cancer is fast growing and affects any age but is found mostly in the older population.

C83.30 Diffuse large B-cell lymphoma, unspecified site HIV CC HCC

C83.31 Diffuse large B-cell lymphoma, lymph nodes of head, face, and neck HIV CC HCC

C83.32 Diffuse large B-cell lymphoma, intrathoracic lymph nodes HIV CC HCC

C83.33 Diffuse large B-cell lymphoma, intra-abdominal lymph nodes HIV CC HCC

C83.34 Diffuse large B-cell lymphoma, lymph nodes of axilla and upper limb HIV CC HCC

C83.35 Diffuse large B-cell lymphoma, lymph nodes of inguinal region and lower limb HIV CC HCC

C83.36 Diffuse large B-cell lymphoma, intrapelvic lymph nodes HIV CC HCC

C83.37 Diffuse large B-cell lymphoma, spleen HIV CC HCC

C83.38 Diffuse large B-cell lymphoma, lymph nodes of multiple sites HIV CC HCC

C83.39 Diffuse large B-cell lymphoma, extranodal and solid organ sites HIV CC HCC

✓ 5^A C83.5 Lymphoblastic (diffuse) lymphoma

B-precursor lymphoma

Lymphoblastic B-cell lymphoma

Lymphoblastic lymphoma NOS

Lymphoblastic T-cell lymphoma

T-precursor lymphoma

DEF: Type of non-Hodgkin lymphoma considered lymphoma or leukemia—the determination is made based on the amount of bone marrow involvement. The cells are small to medium immature T-cells that often originate in the thymus where many of the T-cells are made.

C83.50 Lymphoblastic (diffuse) lymphoma, unspecified site CC HCC

C83.51 Lymphoblastic (diffuse) lymphoma, lymph nodes of head, face, and neck CC HCC

C83.52 Lymphoblastic (diffuse) lymphoma, intrathoracic lymph nodes CC HCC

C83.53 Lymphoblastic (diffuse) lymphoma, intra-abdominal lymph nodes CC HCC

C83.54 Lymphoblastic (diffuse) lymphoma, lymph nodes of axilla and upper limb CC HCC

C83.55 Lymphoblastic (diffuse) lymphoma, lymph nodes of inguinal region and lower limb CC HCC

C83.56 Lymphoblastic (diffuse) lymphoma, intrapelvic lymph nodes CC HCC

C83.57 Lymphoblastic (diffuse) lymphoma, spleen CC HCC

C83.58 Lymphoblastic (diffuse) lymphoma, lymph nodes of multiple sites CC HCC

C83.59 Lymphoblastic (diffuse) lymphoma, extranodal and solid organ sites CC HCC

✓ 5^A C83.7 Burkitt lymphoma

Atypical Burkitt lymphoma

Burkitt-like lymphoma

EXCLUDES 1 mature B-cell leukemia Burkitt type (C91.A-)

DEF: Malignancy of the lymphatic system, most often seen as a large bone-deteriorating lesion within the jaw or as an abdominal mass. It is a form of non-Hodgkin's lymphoma and is recognized as the fastest growing human tumor.

C83.70 Burkitt lymphoma, unspecified site HIV CC HCC

C83.71 Burkitt lymphoma, lymph nodes of head, face, and neck HIV CC HCC

C83.72 Burkitt lymphoma, intrathoracic lymph nodes HIV CC HCC

C83.73 Burkitt lymphoma, intra-abdominal lymph nodes HIV CC HCC

C83.74 Burkitt lymphoma, lymph nodes of axilla and upper limb HIV CC HCC

C83.75 Burkitt lymphoma, lymph nodes of inguinal region and lower limb HIV CC HCC

C83.76 Burkitt lymphoma, intrapelvic lymph nodes HIV CC HCC

C83.77 Burkitt lymphoma, spleen HIV CC HCC

C83.78 Burkitt lymphoma, lymph nodes of multiple sites HIV CC HCC

C83.79 Burkitt lymphoma, extranodal and solid organ sites HIV CC HCC

✓ 5^A C83.8 Other non-follicular lymphoma

Intravascular large B-cell lymphoma

Lymphoid granulomatosis

Primary effusion B-cell lymphoma

EXCLUDES 1 mediastinal (thymic) large B-cell lymphoma (C85.2-) T-cell rich B-cell lymphoma (C83.3-)

C83.80 Other non-follicular lymphoma, unspecified site HIV CC HCC

C83.81 Other non-follicular lymphoma, lymph nodes of head, face, and neck HIV CC HCC

C83.82 Other non-follicular lymphoma, intrathoracic lymph nodes HIV CC HCC

C83.83 Other non-follicular lymphoma, intra-abdominal lymph nodes HIV CC HCC

C83.84 Other non-follicular lymphoma, lymph nodes of axilla and upper limb HIV CC HCC

C83.85 Other non-follicular lymphoma, lymph nodes of inguinal region and lower limb HIV CC HCC

C83.86 Other non-follicular lymphoma, intrapelvic lymph nodes HIV CC HCC

C83.87 Other non-follicular lymphoma, spleen HIV CC HCC

C83.88 Other non-follicular lymphoma, lymph nodes of multiple sites HIV CC HCC

C83.89 Other non-follicular lymphoma, extranodal and solid organ sites HIV CC HCC

✓ 5^A C83.9 Non-follicular (diffuse) lymphoma, unspecified

C83.90 Non-follicular (diffuse) lymphoma, unspecified, unspecified site HIV CC HCC

C83.91 Non-follicular (diffuse) lymphoma, unspecified, lymph nodes of head, face, and neck HIV CC HCC

C83.92 Non-follicular (diffuse) lymphoma, unspecified, intrathoracic lymph nodes HIV CC HCC

C83.93 Non-follicular (diffuse) lymphoma, unspecified, intra-abdominal lymph nodes HIV CC HCC

C83.94 Non-follicular (diffuse) lymphoma, unspecified, lymph nodes of axilla and upper limb HIV CC HCC

C83.95 Non-follicular (diffuse) lymphoma, unspecified, lymph nodes of inguinal region and lower limb HIV CC HCC

- C83.96** Non-follicular (diffuse) lymphoma, unspecified, intrapelvic lymph nodes HIV CC HCC
- C83.97** Non-follicular (diffuse) lymphoma, unspecified, spleen HIV CC HCC
- C83.98** Non-follicular (diffuse) lymphoma, unspecified, lymph nodes of multiple sites HIV CC HCC
- C83.99** Non-follicular (diffuse) lymphoma, unspecified, extranodal and solid organ sites HIV CC HCC

√ 4th C84 Mature T/NK-cell lymphomas

EXCLUDES 1 personal history of non-Hodgkin lymphoma (Z85.72)

√ 5th C84.0 Mycosis fungoides

EXCLUDES 1 peripheral T-cell lymphoma, not classified (C84.4-)

DEF: Most common form of cutaneous T-cell lymphoma. A type of non-Hodgkin lymphoma in which white blood cells become cancerous and affect the skin and sometimes internal organs.

Synonym(s): Alibert-Bazin syndrome.

- C84.00** Mycosis fungoides, unspecified site CC HCC
- C84.01** Mycosis fungoides, lymph nodes of head, face, and neck CC HCC
- C84.02** Mycosis fungoides, intrathoracic lymph nodes CC HCC
- C84.03** Mycosis fungoides, intra-abdominal lymph nodes CC HCC
- C84.04** Mycosis fungoides, lymph nodes of axilla and upper limb CC HCC
- C84.05** Mycosis fungoides, lymph nodes of inguinal region and lower limb CC HCC
- C84.06** Mycosis fungoides, intrapelvic lymph nodes CC HCC
- C84.07** Mycosis fungoides, spleen CC HCC
- C84.08** Mycosis fungoides, lymph nodes of multiple sites CC HCC
- C84.09** Mycosis fungoides, extranodal and solid organ sites CC HCC

√ 5th C84.1 Sézary disease

DEF: Extension of mycosis fungoides that affects the blood and all of the skin, appearing as sunburn, rather than patches. It spreads to the lymph nodes and is often linked to a weakened immune system.

- C84.10** Sézary disease, unspecified site CC HCC
- C84.11** Sézary disease, lymph nodes of head, face, and neck CC HCC
- C84.12** Sézary disease, intrathoracic lymph nodes CC HCC
- C84.13** Sézary disease, intra-abdominal lymph nodes CC HCC
- C84.14** Sézary disease, lymph nodes of axilla and upper limb CC HCC
- C84.15** Sézary disease, lymph nodes of inguinal region and lower limb CC HCC
- C84.16** Sézary disease, intrapelvic lymph nodes CC HCC
- C84.17** Sézary disease, spleen CC HCC
- C84.18** Sézary disease, lymph nodes of multiple sites CC HCC
- C84.19** Sézary disease, extranodal and solid organ sites CC HCC

√ 5th C84.4 Peripheral T-cell lymphoma, not classified

Lennert's lymphoma

Lymphoepithelioid lymphoma

Mature T-cell lymphoma, not elsewhere classified

- C84.40** Peripheral T-cell lymphoma, not classified, unspecified site HIV CC HCC
- C84.41** Peripheral T-cell lymphoma, not classified, lymph nodes of head, face, and neck HIV CC HCC
- C84.42** Peripheral T-cell lymphoma, not classified, intrathoracic lymph nodes HIV CC HCC
- C84.43** Peripheral T-cell lymphoma, not classified, intra-abdominal lymph nodes HIV CC HCC
- C84.44** Peripheral T-cell lymphoma, not classified, lymph nodes of axilla and upper limb HIV CC HCC
- C84.45** Peripheral T-cell lymphoma, not classified, lymph nodes of inguinal region and lower limb HIV CC HCC
- C84.46** Peripheral T-cell lymphoma, not classified, intrapelvic lymph nodes HIV CC HCC
- C84.47** Peripheral T-cell lymphoma, not classified, spleen HIV CC HCC
- C84.48** Peripheral T-cell lymphoma, not classified, lymph nodes of multiple sites HIV CC HCC

- C84.49** Peripheral T-cell lymphoma, not classified, extranodal and solid organ sites HIV CC HCC

√ 6th C84.6 Anaplastic large cell lymphoma, ALK-positive

Anaplastic large cell lymphoma, CD30-positive

- C84.60** Anaplastic large cell lymphoma, ALK-positive, unspecified site HIV CC HCC
- C84.61** Anaplastic large cell lymphoma, ALK-positive, lymph nodes of head, face, and neck HIV CC HCC
- C84.62** Anaplastic large cell lymphoma, ALK-positive, intrathoracic lymph nodes HIV CC HCC
- C84.63** Anaplastic large cell lymphoma, ALK-positive, intra-abdominal lymph nodes HIV CC HCC
- C84.64** Anaplastic large cell lymphoma, ALK-positive, lymph nodes of axilla and upper limb HIV CC HCC
- C84.65** Anaplastic large cell lymphoma, ALK-positive, lymph nodes of inguinal region and lower limb HIV CC HCC
- C84.66** Anaplastic large cell lymphoma, ALK-positive, intrapelvic lymph nodes HIV CC HCC
- C84.67** Anaplastic large cell lymphoma, ALK-positive, spleen HIV CC HCC
- C84.68** Anaplastic large cell lymphoma, ALK-positive, lymph nodes of multiple sites HIV CC HCC
- C84.69** Anaplastic large cell lymphoma, ALK-positive, extranodal and solid organ sites HIV CC HCC

√ 5th C84.7 Anaplastic large cell lymphoma, ALK-negative

EXCLUDES 1 primary cutaneous CD30-positive T-cell proliferations (C86.6-)

- C84.70** Anaplastic large cell lymphoma, ALK-negative, unspecified site HIV CC HCC
- C84.71** Anaplastic large cell lymphoma, ALK-negative, lymph nodes of head, face, and neck HIV CC HCC
- C84.72** Anaplastic large cell lymphoma, ALK-negative, intrathoracic lymph nodes HIV CC HCC
- C84.73** Anaplastic large cell lymphoma, ALK-negative, intra-abdominal lymph nodes HIV CC HCC
- C84.74** Anaplastic large cell lymphoma, ALK-negative, lymph nodes of axilla and upper limb HIV CC HCC
- C84.75** Anaplastic large cell lymphoma, ALK-negative, lymph nodes of inguinal region and lower limb HIV CC HCC
- C84.76** Anaplastic large cell lymphoma, ALK-negative, intrapelvic lymph nodes HIV CC HCC
- C84.77** Anaplastic large cell lymphoma, ALK-negative, spleen HIV CC HCC
- C84.78** Anaplastic large cell lymphoma, ALK-negative, lymph nodes of multiple sites HIV CC HCC
- C84.79** Anaplastic large cell lymphoma, ALK-negative, extranodal and solid organ sites HIV CC HCC

√ 5th C84.A Cutaneous T-cell lymphoma, unspecified

- C84.A0** Cutaneous T-cell lymphoma, unspecified, unspecified site HIV CC HCC
- C84.A1** Cutaneous T-cell lymphoma, unspecified lymph nodes of head, face, and neck HIV CC HCC
- C84.A2** Cutaneous T-cell lymphoma, unspecified, intrathoracic lymph nodes HIV CC HCC
- C84.A3** Cutaneous T-cell lymphoma, unspecified, intra-abdominal lymph nodes HIV CC HCC
- C84.A4** Cutaneous T-cell lymphoma, unspecified, lymph nodes of axilla and upper limb HIV CC HCC
- C84.A5** Cutaneous T-cell lymphoma, unspecified, lymph nodes of inguinal region and lower limb HIV CC HCC
- C84.A6** Cutaneous T-cell lymphoma, unspecified, intrapelvic lymph nodes HIV CC HCC
- C84.A7** Cutaneous T-cell lymphoma, unspecified, spleen HIV CC HCC
- C84.A8** Cutaneous T-cell lymphoma, unspecified, lymph nodes of multiple sites HIV CC HCC
- C84.A9** Cutaneous T-cell lymphoma, unspecified, extranodal and solid organ sites HIV CC HCC

✓ 5th C84.Z Other mature T/NK-cell lymphomas

NOTE

If T-cell lineage or involvement is mentioned in conjunction with a specific lymphoma, code to the more specific description.

EXCLUDES1

angioimmunoblastic T-cell lymphoma (C86.5)
 blastic NK-cell lymphoma (C86.4)
 enteropathy-type T-cell lymphoma (C86.2)
 extranodal NK-cell lymphoma, nasal type (C86.0)
 hepatosplenic T-cell lymphoma (C86.1)
 primary cutaneous CD30-positive T-cell proliferations (C86.6)
 subcutaneous panniculitis-like T-cell lymphoma (C86.3)
 T-cell leukemia (C91.1-)

- C84.Z0 Other mature T/NK-cell lymphomas, unspecified site HIV CC MCC
 C84.Z1 Other mature T/NK-cell lymphomas, lymph nodes of head, face, and neck HIV CC MCC
 C84.Z2 Other mature T/NK-cell lymphomas, intrathoracic lymph nodes HIV CC MCC
 C84.Z3 Other mature T/NK-cell lymphomas, intra-abdominal lymph nodes HIV CC MCC
 C84.Z4 Other mature T/NK-cell lymphomas, lymph nodes of axilla and upper limb HIV CC MCC
 C84.Z5 Other mature T/NK-cell lymphomas, lymph nodes of inguinal region and lower limb HIV CC MCC
 C84.Z6 Other mature T/NK-cell lymphomas, intrapelvic lymph nodes HIV CC MCC
 C84.Z7 Other mature T/NK-cell lymphomas, spleen HIV CC MCC
 C84.Z8 Other mature T/NK-cell lymphomas, lymph nodes of multiple sites HIV CC MCC
 C84.Z9 Other mature T/NK-cell lymphomas, extranodal and solid organ sites HIV CC MCC

✓ 5th C84.9 Mature T/NK-cell lymphomas, unspecified

NK/T cell lymphoma NOS

EXCLUDES1 mature T-cell lymphoma, not elsewhere classified (C84.4-)

- C84.90 Mature T/NK-cell lymphomas, unspecified, unspecified site HIV CC MCC
 C84.91 Mature T/NK-cell lymphomas, unspecified, lymph nodes of head, face, and neck HIV CC MCC
 C84.92 Mature T/NK-cell lymphomas, unspecified, intrathoracic lymph nodes HIV CC MCC
 C84.93 Mature T/NK-cell lymphomas, unspecified, intra-abdominal lymph nodes HIV CC MCC
 C84.94 Mature T/NK-cell lymphomas, unspecified, lymph nodes of axilla and upper limb HIV CC MCC
 C84.95 Mature T/NK-cell lymphomas, unspecified, lymph nodes of inguinal region and lower limb HIV CC MCC
 C84.96 Mature T/NK-cell lymphomas, unspecified, intrapelvic lymph nodes HIV CC MCC
 C84.97 Mature T/NK-cell lymphomas, unspecified, spleen HIV CC MCC
 C84.98 Mature T/NK-cell lymphomas, unspecified, lymph nodes of multiple sites HIV CC MCC
 C84.99 Mature T/NK-cell lymphomas, unspecified, extranodal and solid organ sites HIV CC MCC

✓ 4th C85 Other specified and unspecified types of non-Hodgkin lymphoma

EXCLUDES1

other specified types of T/NK-cell lymphoma (C86.-)
 personal history of non-Hodgkin lymphoma (Z85.72)

✓ 5th C85.1 Unspecified B-cell lymphoma

NOTE

If B-cell lineage or involvement is mentioned in conjunction with a specific lymphoma, code to the more specific description.

- C85.10 Unspecified B-cell lymphoma, unspecified site HIV CC MCC
 C85.11 Unspecified B-cell lymphoma, lymph nodes of head, face, and neck HIV CC MCC
 C85.12 Unspecified B-cell lymphoma, intrathoracic lymph nodes HIV CC MCC
 C85.13 Unspecified B-cell lymphoma, intra-abdominal lymph nodes HIV CC MCC
 C85.14 Unspecified B-cell lymphoma, lymph nodes of axilla and upper limb HIV CC MCC

- C85.15 Unspecified B-cell lymphoma, lymph nodes of inguinal region and lower limb HIV CC MCC
 C85.16 Unspecified B-cell lymphoma, intrapelvic lymph nodes HIV CC MCC
 C85.17 Unspecified B-cell lymphoma, spleen HIV CC MCC
 C85.18 Unspecified B-cell lymphoma, lymph nodes of multiple sites HIV CC MCC
 C85.19 Unspecified B-cell lymphoma, extranodal and solid organ sites HIV CC MCC

✓ 5th C85.2 Mediastinal (thymic) large B-cell lymphoma

- C85.20 Mediastinal (thymic) large B-cell lymphoma, unspecified site HIV CC MCC
 C85.21 Mediastinal (thymic) large B-cell lymphoma, lymph nodes of head, face, and neck HIV CC MCC
 C85.22 Mediastinal (thymic) large B-cell lymphoma, intrathoracic lymph nodes HIV CC MCC
 C85.23 Mediastinal (thymic) large B-cell lymphoma, intra-abdominal lymph nodes HIV CC MCC
 C85.24 Mediastinal (thymic) large B-cell lymphoma, lymph nodes of axilla and upper limb HIV CC MCC
 C85.25 Mediastinal (thymic) large B-cell lymphoma, lymph nodes of inguinal region and lower limb HIV CC MCC
 C85.26 Mediastinal (thymic) large B-cell lymphoma, intrapelvic lymph nodes HIV CC MCC
 C85.27 Mediastinal (thymic) large B-cell lymphoma, spleen HIV CC MCC
 C85.28 Mediastinal (thymic) large B-cell lymphoma, lymph nodes of multiple sites HIV CC MCC
 C85.29 Mediastinal (thymic) large B-cell lymphoma, extranodal and solid organ sites HIV CC MCC

✓ 5th C85.8 Other specified types of non-Hodgkin lymphoma

- C85.80 Other specified types of non-Hodgkin lymphoma, unspecified site HIV CC MCC
 C85.81 Other specified types of non-Hodgkin lymphoma, lymph nodes of head, face, and neck HIV CC MCC
 C85.82 Other specified types of non-Hodgkin lymphoma, intrathoracic lymph nodes HIV CC MCC
 C85.83 Other specified types of non-Hodgkin lymphoma, intra-abdominal lymph nodes HIV CC MCC
 C85.84 Other specified types of non-Hodgkin lymphoma, lymph nodes of axilla and upper limb HIV CC MCC
 C85.85 Other specified types of non-Hodgkin lymphoma, lymph nodes of inguinal region and lower limb HIV CC MCC
 C85.86 Other specified types of non-Hodgkin lymphoma, intrapelvic lymph nodes HIV CC MCC
 C85.87 Other specified types of non-Hodgkin lymphoma, spleen HIV CC MCC
 C85.88 Other specified types of non-Hodgkin lymphoma, lymph nodes of multiple sites HIV CC MCC
 C85.89 Other specified types of non-Hodgkin lymphoma, extranodal and solid organ sites HIV CC MCC

✓ 5th C85.9 Non-Hodgkin lymphoma, unspecified

Lymphoma NOS

Malignant lymphoma NOS

Non-Hodgkin lymphoma NOS

- C85.90 Non-Hodgkin lymphoma, unspecified, unspecified site HIV CC MCC
 C85.91 Non-Hodgkin lymphoma, unspecified, lymph nodes of head, face, and neck HIV CC MCC
 C85.92 Non-Hodgkin lymphoma, unspecified, intrathoracic lymph nodes HIV CC MCC
 C85.93 Non-Hodgkin lymphoma, unspecified, intra-abdominal lymph nodes HIV CC MCC
 C85.94 Non-Hodgkin lymphoma, unspecified, lymph nodes of axilla and upper limb HIV CC MCC
 C85.95 Non-Hodgkin lymphoma, unspecified, lymph nodes of inguinal region and lower limb HIV CC MCC
 C85.96 Non-Hodgkin lymphoma, unspecified, intrapelvic lymph nodes HIV CC MCC
 C85.97 Non-Hodgkin lymphoma, unspecified, spleen HIV CC MCC
 C85.98 Non-Hodgkin lymphoma, unspecified, lymph nodes of multiple sites HIV CC MCC
 C85.99 Non-Hodgkin lymphoma, unspecified, extranodal and solid organ sites HIV CC MCC

✓4th C86 Other specified types of T/NK-cell lymphoma

EXCLUDES 1 anaplastic large cell lymphoma, ALK negative (C84.7-)
anaplastic large cell lymphoma, ALK positive (C84.6-)
mature T/NK-cell lymphomas (C84.-)
other specified types of non-Hodgkin lymphoma (C85.8-)

C86.0 Extranodal NK/T-cell lymphoma, nasal type HIV CC HCC

C86.1 Hepatosplenic T-cell lymphoma HIV CC HCC

Alpha-beta and gamma delta types

C86.2 Enteropathy-type (intestinal) T-cell lymphoma HIV CC HCC

Enteropathy associated T-cell lymphoma

C86.3 Subcutaneous panniculitis-like T-cell lymphoma HIV CC HCC

C86.4 Blastic NK-cell lymphoma HIV CC HCC

Blastic plasmacytoid dendritic cell neoplasm (BPDCN)

C86.5 Angioimmunoblastic T-cell lymphoma HIV CC HCC

Angioimmunoblastic lymphadenopathy with dysproteinemia (AILD)

C86.6 Primary cutaneous CD30-positive T-cell proliferations HIV CC HCC

Lymphomatoid papulosis

Primary cutaneous anaplastic large cell lymphoma

Primary cutaneous CD30-positive large T-cell lymphoma

✓4th C88 Malignant immunoproliferative diseases and certain other B-cell lymphomas

EXCLUDES 1 B-cell lymphoma, unspecified (C85.1-)
personal history of other malignant neoplasms of lymphoid, hematopoietic and related tissues (Z85.79)

C88.0 Waldenström macroglobulinemia HCC

Lymphoplasmacytic lymphoma with IgM-production

Macroglobulinemia (idiopathic) (primary)

EXCLUDES 1 small cell B-cell lymphoma (C83.0)

C88.2 Heavy chain disease CC HCC

Franklin disease

Gamma heavy chain disease

Mu heavy chain disease

C88.3 Immunoproliferative small intestinal disease CC HCC

Alpha heavy chain disease

Mediterranean lymphoma

C88.4 Extranodal marginal zone B-cell lymphoma of mucosa-associated lymphoid tissue [MALT-lymphoma] HIV CC HCC

Lymphoma of skin-associated lymphoid tissue

[SALT-lymphoma]

Lymphoma of bronchial-associated lymphoid tissue

[BALT-lymphoma]

EXCLUDES 1 high malignant (diffuse large B-cell) lymphoma (C83.3-)

C88.8 Other malignant immunoproliferative diseases CC HCC

C88.9 Malignant immunoproliferative disease, unspecified CC HCC

Immunoproliferative disease NOS

✓4th C90 Multiple myeloma and malignant plasma cell neoplasms

EXCLUDES 1 personal history of other malignant neoplasms of lymphoid, hematopoietic and related tissues (Z85.79)

AHA: 2019,2Q,30

✓5th C90.0 Multiple myeloma

Kahler's disease

Medullary plasmacytoma

Myelomatosis

Plasma cell myeloma

EXCLUDES 1 solitary myeloma (C90.3-)

solitary plasmacytoma (C90.3-)

TIP: Do not assign an additional code for bone metastasis (C79.51) when multiple myeloma is described as metastatic to the bone; bone involvement is integral to this disease process.

C90.00 Multiple myeloma not having achieved remission CC HCC

Multiple myeloma with failed remission

Multiple myeloma NOS

C90.01 Multiple myeloma in remission CC HCC

C90.02 Multiple myeloma in relapse CC HCC

✓5th C90.1 Plasma cell leukemia

Plasmacytic leukemia

AHA: 2019,2Q,30

C90.10 Plasma cell leukemia not having achieved remission CC HCC

Plasma cell leukemia with failed remission

Plasma cell leukemia NOS

C90.11 Plasma cell leukemia in remission CC HCC

✓5th C90.3 Solitary plasmacytoma

Localized malignant plasma cell tumor NOS

Plasmacytoma NOS

Solitary myeloma

C90.30 Solitary plasmacytoma not having achieved remission CC HCC

Solitary plasmacytoma with failed remission

Solitary plasmacytoma NOS

C90.31 Solitary plasmacytoma in remission CC HCC

C90.32 Solitary plasmacytoma in relapse CC HCC

✓4th C91 Lymphoid leukemia**EXCLUDES 1** personal history of leukemia (Z85.6)

AHA: 2020,1Q,13

DEF: Malignant proliferation of immature lymphocytes (white blood cells that make up lymphoid tissue), called lymphoblasts, that originate in the bone marrow. Can be acute (ALL) or chronic (CLL).

✓5th C91.0 Acute lymphoblastic leukemia [ALL]**NOTE**

Codes in subcategory C91.0- should only be used for T-cell and B-cell precursor leukemia

C91.00 Acute lymphoblastic leukemia not having achieved remission CC HCC

Acute lymphoblastic leukemia with failed remission

Acute lymphoblastic leukemia NOS

C91.01 Acute lymphoblastic leukemia, in remission CC HCC

C91.02 Acute lymphoblastic leukemia, in relapse CC HCC

✓5th C91.1 Chronic lymphocytic leukemia of B-cell type

Lymphoplasmacytic leukemia

Richter syndrome

EXCLUDES 1 lymphoplasmacytic lymphoma (C83.0-)

C91.10 Chronic lymphocytic leukemia of B-cell type not having achieved remission CC HCC

Chronic lymphocytic leukemia of B-cell type with failed remission

Chronic lymphocytic leukemia of B-cell type NOS

C91.11 Chronic lymphocytic leukemia of B-cell type in remission CC HCC

C91.12 Chronic lymphocytic leukemia of B-cell type in relapse CC HCC

✓5th C91.3 Polymorphocytic leukemia of B-cell type

C91.30 Polymorphocytic leukemia of B-cell type not having achieved remission CC HCC

Polymorphocytic leukemia of B-cell type with failed remission

Polymorphocytic leukemia of B-cell type NOS

C91.31 Polymorphocytic leukemia of B-cell type, in remission CC HCC

C91.32 Polymorphocytic leukemia of B-cell type, in relapse CC HCC

✓ 5^A C91.4 Hairy cell leukemia

Leukemic reticuloendotheliosis

DEF: Rare type of leukemia that is slow growing and often also considered a type of lymphoma. The small B-cell lymphocytes appear with "hairy" projections under a microscope and are found mostly in the bone marrow, spleen, and blood.**C91.40 Hairy cell leukemia not having achieved remission**

Hairy cell leukemia with failed remission

Hairy cell leukemia NOS

C91.41 Hairy cell leukemia, in remission**C91.42 Hairy cell leukemia, in relapse****✓ 5^A C91.5 Adult T-cell lymphoma/leukemia (HTLV-1-associated)**

Acute variant of adult T-cell lymphoma/leukemia (HTLV-1-associated)

Chronic variant of adult T-cell lymphoma/leukemia (HTLV-1-associated)

Lymphomatoid variant of adult T-cell lymphoma/leukemia (HTLV-1-associated)

Smouldering variant of adult T-cell lymphoma/leukemia (HTLV-1-associated)

C91.50 Adult T-cell lymphoma/leukemia (HTLV-1-associated) not having achieved remission

Adult T-cell lymphoma/leukemia (HTLV-1-associated) with failed remission

Adult T-cell lymphoma/leukemia (HTLV-1-associated) NOS

C91.51 Adult T-cell lymphoma/leukemia (HTLV-1-associated), in remission**C91.52 Adult T-cell lymphoma/leukemia (HTLV-1-associated), in relapse****✓ 5^A C91.6 Prolymphocytic leukemia of T-cell type****C91.60 Prolymphocytic leukemia of T-cell type not having achieved remission**

Prolymphocytic leukemia of T-cell type with failed remission

Prolymphocytic leukemia of T-cell type NOS

C91.61 Prolymphocytic leukemia of T-cell type, in remission**C91.62 Prolymphocytic leukemia of T-cell type, in relapse****✓ 5^A C91.A Mature B-cell leukemia Burkitt-type****EXCLUDES 1** Burkitt lymphoma (C83.7-)**C91.A0 Mature B-cell leukemia Burkitt-type not having achieved remission**

Mature B-cell leukemia Burkitt-type with failed remission

Mature B-cell leukemia Burkitt-type NOS

C91.A1 Mature B-cell leukemia Burkitt-type, in remission**C91.A2 Mature B-cell leukemia Burkitt-type, in relapse****✓ 5^A C91.Z Other lymphoid leukemia**

T-cell large granular lymphocytic leukemia (associated with rheumatoid arthritis)

C91.Z0 Other lymphoid leukemia not having achieved remission

carcinoma in situ of ovary (D07.39)
carcinoma in situ of testis (D07.69)

D09.8 Carcinoma in situ of other specified sites**D09.9 Carcinoma in situ, unspecified****Benign neoplasms, except benign neuroendocrine tumors (D10–D36)****✓4th D10 Benign neoplasm of mouth and pharynx****D10.0 Benign neoplasm of lip**

Benign neoplasm of lip (frenulum) (inner aspect) (mucosa) (vermillion border)

EXCLUDES 1 benign neoplasm of skin of lip (D22.0, D23.0)

D10.1 Benign neoplasm of tongue

Benign neoplasm of lingual tonsil

D10.2 Benign neoplasm of floor of mouth**✓5th D10.3 Benign neoplasm of other and unspecified parts of mouth****D10.30 Benign neoplasm of unspecified part of mouth****D10.39 Benign neoplasm of other parts of mouth**

Benign neoplasm of minor salivary gland NOS

EXCLUDES 1 benign odontogenic neoplasms (D16.4–D16.5)

benign neoplasm of mucosa of lip (D10.0)

benign neoplasm of nasopharyngeal surface of soft palate (D10.6)

D10.4 Benign neoplasm of tonsil

Benign neoplasm of tonsil (faucial) (palatine)

EXCLUDES 1 benign neoplasm of lingual tonsil (D10.1)

benign neoplasm of pharyngeal tonsil (D10.6)

benign neoplasm of tonsillar fossa (D10.5)

benign neoplasm of tonsillar pillars (D10.5)

D10.5 Benign neoplasm of other parts of oropharynx

Benign neoplasm of epiglottis, anterior aspect

Benign neoplasm of tonsillar fossa

Benign neoplasm of tonsillar pillars

Benign neoplasm of vallecula

EXCLUDES 1 benign neoplasm of epiglottis NOS (D14.1)

benign neoplasm of epiglottis, suprahoid portion (D14.1)

DEF: Oropharynx: Middle portion of pharynx (throat); communicates with the oral cavity, nasopharynx and laryngopharynx.

D10.6 Benign neoplasm of nasopharynx

Benign neoplasm of pharyngeal tonsil

Benign neoplasm of posterior margin of septum and choanae

DEF: Nasopharynx: Upper portion of pharynx (throat); communicates with the nasal cavities, oropharynx and tympanic cavities.

D10.7 Benign neoplasm of hypopharynx

DEF: Hypopharynx: Lower portion of pharynx (throat); communicates with the oropharynx and the esophagus.

Synonyms: laryngopharynx.

D10.9 Benign neoplasm of pharynx, unspecified**✓4th D11 Benign neoplasm of major salivary glands**

EXCLUDES 1 benign neoplasms of specified minor salivary glands which are classified according to their anatomical location
benign neoplasms of minor salivary glands NOS (D10.39)

D11.0 Benign neoplasm of parotid gland**D11.7 Benign neoplasm of other major salivary glands**

Benign neoplasm of sublingual salivary gland

Benign neoplasm of submandibular salivary gland

D11.9 Benign neoplasm of major salivary gland, unspecified**✓4th D12 Benign neoplasm of colon, rectum, anus and anal canal**

EXCLUDES 1 benign carcinoid tumors of the large intestine, and rectum (D3A.02-)
polyp of colon NOS (K63.5)

AHA: 2018,2Q,14; 2017,1Q,15; 2015,2Q,14

TIP: Code K63.5 Polyp of colon, is assigned when documentation states hyperplastic colon polyps, regardless of the site in the colon. Slow-growing, hyperplastic polyps are not precancerous and are classified differently from benign or adenomatous polyps.

D12.0 Benign neoplasm of cecum

Benign neoplasm of ileocecal valve

D12.1 Benign neoplasm of appendix

EXCLUDES 1 benign carcinoid tumor of the appendix (D3A.020)

D12.2 Benign neoplasm of ascending colon**D12.3 Benign neoplasm of transverse colon**

Benign neoplasm of hepatic flexure

Benign neoplasm of splenic flexure

AHA: 2017,1Q,16

D25.2 Subserosal leiomyoma of uterus
Subperitoneal leiomyoma of uterus

D25.9 Leiomyoma of uterus, unspecified

✓ 4th D26 Other benign neoplasms of uterus

D26.0 Other benign neoplasm of cervix uteri

D26.1 Other benign neoplasm of corpus uteri

D26.7 Other benign neoplasm of other parts of uterus

D26.9 Other benign neoplasm of uterus, unspecified

✓ 4th D27 Benign neoplasm of ovary

Use additional code to identify any functional activity

EXCLUDES 1 corpus albicans cyst (N83.2-)
corpus luteum cyst (N83.1-)
endometrial cyst (N80.1)
follicular (atretic) cyst (N83.0-)
graafian follicle cyst (N83.0-)
ovarian cyst NEC (N83.2-)
ovarian retention cyst (N83.2-)

D27.0 Benign neoplasm of right ovary

D27.1 Benign neoplasm of left ovary

D27.9 Benign neoplasm of unspecified ovary

✓ 4th D28 Benign neoplasm of other and unspecified female genital organs

[INCLUDES] adenomatous polyp
benign neoplasm of skin of female genital organs
benign teratoma

EXCLUDES 1 epioophoron cyst (Q50.5)
fimbrial cyst (Q50.4)
Gartner's duct cyst (Q52.4)
parovarian cyst (Q50.5)

D28.0 Benign neoplasm of vulva

D28.1 Benign neoplasm of vagina

D28.2 Benign neoplasm of uterine tubes and ligaments

Benign neoplasm of fallopian tube
Benign neoplasm of uterine ligament (broad) (round)

D28.7 Benign neoplasm of other specified female genital organs

D28.9 Benign neoplasm of female genital organ, unspecified

✓ 4th D29 Benign neoplasm of male genital organs

[INCLUDES] benign neoplasm of skin of male genital organs

D29.0 Benign neoplasm of penis

D29.1 Benign neoplasm of prostate

EXCLUDES 1 enlarged prostate (N40.-)

✓ 5th D29.2 Benign neoplasm of testis

Use additional code to identify any functional activity

D29.20 Benign neoplasm of unspecified testis

D29.21 Benign neoplasm of right testis

D29.22 Benign neoplasm of left testis

✓ 5th D29.3 Benign neoplasm of epididymis

D29.30 Benign neoplasm of unspecified epididymis

D29.31 Benign neoplasm of right epididymis

D29.32 Benign neoplasm of left epididymis

D29.4 Benign neoplasm of scrotum

Benign neoplasm of skin of scrotum

D29.8 Benign neoplasm of other specified male genital organs

Benign neoplasm of seminal vesicle
Benign neoplasm of spermatic cord
Benign neoplasm of tunica vaginalis

D29.9 Benign neoplasm of male genital organ, unspecified

✓ 4th D30 Benign neoplasm of urinary organs**✓ 5th D30.0 Benign neoplasm of kidney**

EXCLUDES 1 benign carcinoid tumor of the kidney (D3A.093)
benign neoplasm of renal calyces (D30.1-)
benign neoplasm of renal pelvis (D30.1-)

D30.00 Benign neoplasm of unspecified kidney

D30.01 Benign neoplasm of right kidney

D30.02 Benign neoplasm of left kidney

✓ 5th D30.1 Benign neoplasm of renal pelvis

D30.10 Benign neoplasm of unspecified renal pelvis

D30.11 Benign neoplasm of right renal pelvis

D30.12 Benign neoplasm of left renal pelvis

✓ 5th D30.2 Benign neoplasm of ureter

EXCLUDES 1 benign neoplasm of ureteric orifice of bladder (D30.3)

D30.20 Benign neoplasm of unspecified ureter

D30.21 Benign neoplasm of right ureter

D30.22 Benign neoplasm of left ureter

D30.3 Benign neoplasm of bladder

Benign neoplasm of ureteric orifice of bladder
Benign neoplasm of urethral orifice of bladder

D30.4–D36.15

Chapter 2. Neoplasms

ICD-10-CM 2021

D30.4 Benign neoplasm of urethra
EXCLUDES 1 benign neoplasm of urethral orifice of bladder (D30.3)

D30.8 Benign neoplasm of other specified urinary organs
 Benign neoplasm of paraurethral glands

D30.9 Benign neoplasm of urinary organ, unspecified
 Benign neoplasm of urinary system NOS

✓4th D31 Benign neoplasm of eye and adnexa

EXCLUDES 1 benign neoplasm of connective tissue of eyelid (D21.0)
 benign neoplasm of optic nerve (D33.3)
 benign neoplasm of skin of eyelid (D22.1-, D23.1-)

✓5th D31.0 Benign neoplasm of conjunctiva

D31.00 Benign neoplasm of unspecified conjunctiva

D31.01 Benign neoplasm of right conjunctiva

D31.02 Benign neoplasm of left conjunctiva

✓5th D31.1 Benign neoplasm of cornea

D31.10 Benign neoplasm of unspecified cornea

D31.11 Benign neoplasm of right cornea

D31.12 Benign neoplasm of left cornea

✓5th D31.2 Benign neoplasm of retina

EXCLUDES 1 dark area on retina (D49.81)
 hemangioma of retina (D49.81)
 neoplasm of unspecified behavior of retina and choroid (D49.81)
 retinal freckle (D49.81)

D31.20 Benign neoplasm of unspecified retina

D31.21 Benign neoplasm of right retina

D31.22 Benign neoplasm of left retina

✓5th D31.3 Benign neoplasm of choroid

D31.30 Benign neoplasm of unspecified choroid

D31.31 Benign neoplasm of right choroid

D31.32 Benign neoplasm of left choroid

✓5th D31.4 Benign neoplasm of ciliary body

D31.40 Benign neoplasm of unspecified ciliary body

D31.41 Benign neoplasm of right ciliary body

D31.42 Benign neoplasm of left ciliary body

✓5th D31.5 Benign neoplasm of lacrimal gland and duct

Benign neoplasm of lacrimal sac
 Benign neoplasm of nasolacrimal duct

D31.50 Benign neoplasm of unspecified lacrimal gland and duct

D31.51 Benign neoplasm of right lacrimal gland and duct

D31.52 Benign neoplasm of left lacrimal gland and duct

✓5th D31.6 Benign neoplasm of unspecified site of orbit

Benign neoplasm of connective tissue of orbit
 Benign neoplasm of extraocular muscle
 Benign neoplasm of peripheral nerves of orbit
 Benign neoplasm of retrobulbar tissue
 Benign neoplasm of retro-ocular tissue

EXCLUDES 1 benign neoplasm of orbital bone (D16.4)

D31.60 Benign neoplasm of unspecified site of unspecified orbit

D31.61 Benign neoplasm of unspecified site of right orbit

D31.62 Benign neoplasm of unspecified site of left orbit

✓5th D31.9 Benign neoplasm of unspecified part of eye

Benign neoplasm of eyeball

D31.90 Benign neoplasm of unspecified part of unspecified eye

D31.91 Benign neoplasm of unspecified part of right eye

D31.92 Benign neoplasm of unspecified part of left eye

✓4th D32 Benign neoplasm of meninges

D32.0 Benign neoplasm of cerebral meninges

D32.1 Benign neoplasm of spinal meninges

D32.9 Benign neoplasm of meninges, unspecified
 Meningioma NOS

✓4th D33 Benign neoplasm of brain and other parts of central nervous system

EXCLUDES 1 angioma (D18.0-)
 benign neoplasm of meninges (D32.-)
 benign neoplasm of peripheral nerves and autonomic nervous system (D36.1-)
 hemangioma (D18.0-)
 neurofibromatosis (Q85.0-)
 retro-ocular benign neoplasm (D31.6-)

D33.0 Benign neoplasm of brain, supratentorial

Benign neoplasm of cerebral ventricle
 Benign neoplasm of cerebrum
 Benign neoplasm of frontal lobe
 Benign neoplasm of occipital lobe
 Benign neoplasm of parietal lobe
 Benign neoplasm of temporal lobe

EXCLUDES 1 benign neoplasm of fourth ventricle (D33.1)

D33.1 Benign neoplasm of brain, infratentorial

Benign neoplasm of brain stem
 Benign neoplasm of cerebellum
 Benign neoplasm of fourth ventricle

D33.2 Benign neoplasm of brain, unspecified

D33.3 Benign neoplasm of cranial nerves

Benign neoplasm of olfactory bulb

D33.4 Benign neoplasm of spinal cord

D33.7 Benign neoplasm of other specified parts of central nervous system

D33.9 Benign neoplasm of central nervous system, unspecified

Benign neoplasm of nervous system (central) NOS

D34 Benign neoplasm of thyroid gland

Use additional code to identify any functional activity

✓4th D35 Benign neoplasm of other and unspecified endocrine glands

Use additional code to identify any functional activity

EXCLUDES 1 benign neoplasm of endocrine pancreas (D13.7)
 benign neoplasm of ovary (D27.-)
 benign neoplasm of testis (D29.2.-)
 benign neoplasm of thymus (D15.0)

✓5th D35.0 Benign neoplasm of adrenal gland

D35.00 Benign neoplasm of unspecified adrenal gland

D35.01 Benign neoplasm of right adrenal gland

D35.02 Benign neoplasm of left adrenal gland

D35.1 Benign neoplasm of parathyroid gland

D35.2 Benign neoplasm of pituitary gland

AHA: 2014.3Q.22

D35.3 Benign neoplasm of craniopharyngeal duct

D35.4 Benign neoplasm of pineal gland

D35.5 Benign neoplasm of carotid body

D35.6 Benign neoplasm of aortic body and other paraganglia
 Benign tumor of glomus jugulare

D35.7 Benign neoplasm of other specified endocrine glands

D35.9 Benign neoplasm of endocrine gland, unspecified
 Benign neoplasm of unspecified endocrine gland

✓4th D36 Benign neoplasm of other and unspecified sites

D36.0 Benign neoplasm of lymph nodes

EXCLUDES 1 lymphangioma (D18.1)

✓5th D36.1 Benign neoplasm of peripheral nerves and autonomic nervous system

EXCLUDES 1 benign neoplasm of peripheral nerves of orbit (D31.6-)
 neurofibromatosis (Q85.0-)

D36.10 Benign neoplasm of peripheral nerves and autonomic nervous system, unspecified

D36.11 Benign neoplasm of peripheral nerves and autonomic nervous system of face, head, and neck

D36.12 Benign neoplasm of peripheral nerves and autonomic nervous system, upper limb, including shoulder

D36.13 Benign neoplasm of peripheral nerves and autonomic nervous system of lower limb, including hip

D36.14 Benign neoplasm of peripheral nerves and autonomic nervous system of thorax

D36.15 Benign neoplasm of peripheral nerves and autonomic nervous system of abdomen

- D36.16 Benign neoplasm of peripheral nerves and autonomic nervous system of **pelvis**
- D36.17 Benign neoplasm of peripheral nerves and autonomic nervous system of **trunk, unspecified**

- D36.7 Benign neoplasm of other specified sites
Benign neoplasm of back NOS
Benign neoplasm of nose NOS

- D36.9 Benign neoplasm, unspecified site

Benign neuroendocrine tumors (D3A)

✓ 4th D3A Benign neuroendocrine tumors

Code also any associated multiple endocrine neoplasia [MEN] syndromes (E31.2-)

Use additional code to identify any associated endocrine syndrome, such as:

carcinoid syndrome (E34.0)

EXCLUDES 2 benign pancreatic islet cell tumors (D13.7)

✓ 6th D3A.0 Benign carcinoid tumors

- D3A.00 Benign carcinoid tumor of unspecified site
Carcinoid tumor NOS

- ✓ 6th D3A.01 Benign carcinoid tumors of the **small intestine**
D3A.010 Benign carcinoid tumor of the **duodenum**
D3A.011 Benign carcinoid tumor of the **jejunum**
D3A.012 Benign carcinoid tumor of the **ileum**
D3A.019 Benign carcinoid tumor of the small intestine, unspecified portion

- ✓ 6th D3A.02 Benign carcinoid tumors of the **appendix, large intestine, and rectum**
D3A.020 Benign carcinoid tumor of the **appendix**
D3A.021 Benign carcinoid tumor of the **cecum**
D3A.022 Benign carcinoid tumor of the **ascending colon**
D3A.023 Benign carcinoid tumor of the **transverse colon**
D3A.024 Benign carcinoid tumor of the **descending colon**
D3A.025 Benign carcinoid tumor of the **sigmoid colon**
D3A.026 Benign carcinoid tumor of the **rectum**
D3A.029 Benign carcinoid tumor of the large intestine, unspecified portion
Benign carcinoid tumor of the colon NOS

- ✓ 6th D3A.09 Benign carcinoid tumors of other sites
D3A.090 Benign carcinoid tumor of the **bronchus and lung**
D3A.091 Benign carcinoid tumor of the **thymus**
D3A.092 Benign carcinoid tumor of the **stomach**
D3A.093 Benign carcinoid tumor of the **kidney**
D3A.094 Benign carcinoid tumor of the **foregut, unspecified**
D3A.095 Benign carcinoid tumor of the **midgut, unspecified**
D3A.096 Benign carcinoid tumor of the **hindgut, unspecified**
D3A.098 Benign carcinoid tumors of other sites

- D3A.8 Other benign neuroendocrine tumors
Neuroendocrine tumor NOS

Neoplasms of uncertain behavior, polycythemia vera and myelodysplastic syndromes (D37–D48)

NOTE

Categories D37–D44, and D48 classify by site neoplasms of uncertain behavior, i.e., histologic confirmation whether the neoplasm is malignant or benign cannot be made.

EXCLUDES 1 neoplasms of unspecified behavior (D49.-)

✓ 4th D37 Neoplasm of uncertain behavior of **oral cavity and digestive organs**

EXCLUDES 1 stromal tumors of uncertain behavior of digestive system (D48.1)

✓ 5th D37.0 Neoplasm of uncertain behavior of **lip, oral cavity and pharynx**

EXCLUDES 1 neoplasm of uncertain behavior of aryepiglottic fold or interarytenoid fold, laryngeal aspect (D38.0)
neoplasm of uncertain behavior of epiglottis NOS (D38.0)
neoplasm of uncertain behavior of skin of lip (D48.5)
neoplasm of uncertain behavior of suprahoid portion of epiglottis (D38.0)

- D37.01 Neoplasm of uncertain behavior of **lip**
Neoplasm of uncertain behavior of vermilion border of lip

- D37.02 Neoplasm of uncertain behavior of **tongue**

✓ 6th D37.03 Neoplasm of uncertain behavior of the **major salivary glands**

- D37.030 Neoplasm of uncertain behavior of the **parotid salivary glands**

- D37.031 Neoplasm of uncertain behavior of the **sublingual salivary glands**

- D37.032 Neoplasm of uncertain behavior of the **submandibular salivary glands**

- D37.039 Neoplasm of uncertain behavior of the major salivary glands, unspecified

D37.04 Neoplasm of uncertain behavior of the **minor salivary glands**

Neoplasm of uncertain behavior of submucosal salivary glands of lip
Neoplasm of uncertain behavior of submucosal salivary glands of cheek
Neoplasm of uncertain behavior of submucosal salivary glands of hard palate
Neoplasm of uncertain behavior of submucosal salivary glands of soft palate

- D37.05 Neoplasm of uncertain behavior of **pharynx**
Neoplasm of uncertain behavior of aryepiglottic fold of pharynx NOS
Neoplasm of uncertain behavior of hypopharyngeal aspect of aryepiglottic fold of pharynx
Neoplasm of uncertain behavior of marginal zone of aryepiglottic fold of pharynx

D37.09 Neoplasm of uncertain behavior of other specified sites of the oral cavity

- D37.1 Neoplasm of uncertain behavior of **stomach**
D37.2 Neoplasm of uncertain behavior of **small intestine**
D37.3 Neoplasm of uncertain behavior of **appendix**
D37.4 Neoplasm of uncertain behavior of **colon**
D37.5 Neoplasm of uncertain behavior of **rectum**

Neoplasm of uncertain behavior of rectosigmoid junction

D37.6 Neoplasm of uncertain behavior of **liver, gallbladder and bile ducts**

Neoplasm of uncertain behavior of ampulla of Vater

D37.8 Neoplasm of uncertain behavior of other specified digestive organs

Neoplasm of uncertain behavior of anal canal
Neoplasm of uncertain behavior of anal sphincter
Neoplasm of uncertain behavior of anus NOS
Neoplasm of uncertain behavior of esophagus
Neoplasm of uncertain behavior of intestine NOS
Neoplasm of uncertain behavior of pancreas

EXCLUDES 1 neoplasm of uncertain behavior of anal margin (D48.5)

neoplasm of uncertain behavior of anal skin (D48.5)

neoplasm of uncertain behavior of perianal skin (D48.5)

D37.9 Neoplasm of uncertain behavior of digestive organ, unspecified

- ✓4^N D38 Neoplasm of uncertain behavior of middle ear and respiratory and intrathoracic organs**
EXCLUDES 1 neoplasm of uncertain behavior of heart (D48.7)
- D38.0 Neoplasm of uncertain behavior of larynx**
 Neoplasm of uncertain behavior of aryepiglottic fold or interarytenoid fold, laryngeal aspect
 Neoplasm of uncertain behavior of epiglottis (suprahoid portion)
EXCLUDES 1 neoplasm of uncertain behavior of aryepiglottic fold or interarytenoid fold NOS (D37.05)
 neoplasm of uncertain behavior of hypopharyngeal aspect of aryepiglottic fold (D37.05)
 neoplasm of uncertain behavior of marginal zone of aryepiglottic fold (D37.05)
- D38.1 Neoplasm of uncertain behavior of trachea, bronchus and lung**
- D38.2 Neoplasm of uncertain behavior of pleura**
- D38.3 Neoplasm of uncertain behavior of mediastinum**
- D38.4 Neoplasm of uncertain behavior of thymus**
- D38.5 Neoplasm of uncertain behavior of other respiratory organs**
 Neoplasm of uncertain behavior of accessory sinuses
 Neoplasm of uncertain behavior of cartilage of nose
 Neoplasm of uncertain behavior of middle ear
 Neoplasm of uncertain behavior of nasal cavities
EXCLUDES 1 neoplasm of uncertain behavior of ear (external) (skin) (D48.5)
 neoplasm of uncertain behavior of nose NOS (D48.7)
 neoplasm of uncertain behavior of skin of nose (D48.5)
- D38.6 Neoplasm of uncertain behavior of respiratory organ, unspecified**
- ✓4^N D39 Neoplasm of uncertain behavior of female genital organs**
- D39.0 Neoplasm of uncertain behavior of uterus** ♀
- ✓5^N D39.1 Neoplasm of uncertain behavior of ovary**
 Use additional code to identify any functional activity
- D39.10 Neoplasm of uncertain behavior of unspecified ovary** ♀
- D39.11 Neoplasm of uncertain behavior of right ovary** ♀
- D39.12 Neoplasm of uncertain behavior of left ovary** ♀
- D39.2 Neoplasm of uncertain behavior of placenta** M ♀
 Choroidadenoma destruens
 Invasive hydatidiform mole
 Malignant hydatidiform mole
EXCLUDES 1 hydatidiform mole NOS (D01.9)
- D39.8 Neoplasm of uncertain behavior of other specified female genital organs** ♀
 Neoplasm of uncertain behavior of skin of female genital organs
- D39.9 Neoplasm of uncertain behavior of female genital organ, unspecified** ♀
- ✓4^N D40 Neoplasm of uncertain behavior of male genital organs**
- D40.0 Neoplasm of uncertain behavior of prostate** ♂
- ✓5^N D40.1 Neoplasm of uncertain behavior of testis**
- D40.10 Neoplasm of uncertain behavior of unspecified testis** ♂
- D40.11 Neoplasm of uncertain behavior of right testis** ♂
- D40.12 Neoplasm of uncertain behavior of left testis** ♂
- D40.8 Neoplasm of uncertain behavior of other specified male genital organs** ♂
 Neoplasm of uncertain behavior of skin of male genital organs
- D40.9 Neoplasm of uncertain behavior of male genital organ, unspecified** ♂
- ✓4^N D41 Neoplasm of uncertain behavior of urinary organs**
- ✓5^N D41.0 Neoplasm of uncertain behavior of kidney**
EXCLUDES 1 neoplasm of uncertain behavior of renal pelvis (D41.1-)
- D41.00 Neoplasm of uncertain behavior of unspecified kidney**
- D41.01 Neoplasm of uncertain behavior of right kidney**
- D41.02 Neoplasm of uncertain behavior of left kidney**
- ✓5^N D41.1 Neoplasm of uncertain behavior of renal pelvis**
- D41.10 Neoplasm of uncertain behavior of unspecified renal pelvis**
- D41.11 Neoplasm of uncertain behavior of right renal pelvis**
- D41.12 Neoplasm of uncertain behavior of left renal pelvis**

- ✓5^N D41.2 Neoplasm of uncertain behavior of ureter**
- D41.20 Neoplasm of uncertain behavior of unspecified ureter**
- D41.21 Neoplasm of uncertain behavior of right ureter**
- D41.22 Neoplasm of uncertain behavior of left ureter**
- D41.3 Neoplasm of uncertain behavior of urethra**
- D41.4 Neoplasm of uncertain behavior of bladder**
- D41.8 Neoplasm of uncertain behavior of other specified urinary organs**
- D41.9 Neoplasm of uncertain behavior of unspecified urinary organ**
- ✓4^N D42 Neoplasm of uncertain behavior of meninges**
- D42.0 Neoplasm of uncertain behavior of cerebral meninges** MCC
- D42.1 Neoplasm of uncertain behavior of spinal meninges** MCC
- D42.9 Neoplasm of uncertain behavior of meninges, unspecified** MCC
- ✓4^N D43 Neoplasm of uncertain behavior of brain and central nervous system**
EXCLUDES 1 neoplasm of uncertain behavior of peripheral nerves and autonomic nervous system (D48.2)
- D43.0 Neoplasm of uncertain behavior of brain, supratentorial** MCC
 Neoplasm of uncertain behavior of cerebral ventricle
 Neoplasm of uncertain behavior of cerebrum
 Neoplasm of uncertain behavior of frontal lobe
 Neoplasm of uncertain behavior of occipital lobe
 Neoplasm of uncertain behavior of parietal lobe
 Neoplasm of uncertain behavior of temporal lobe
EXCLUDES 1 neoplasm of uncertain behavior of fourth ventricle (D43.1)
- D43.1 Neoplasm of uncertain behavior of brain, infratentorial** MCC
 Neoplasm of uncertain behavior of brain stem
 Neoplasm of uncertain behavior of cerebellum
 Neoplasm of uncertain behavior of fourth ventricle
- D43.2 Neoplasm of uncertain behavior of brain, unspecified** MCC
- D43.3 Neoplasm of uncertain behavior of cranial nerves** MCC
- D43.4 Neoplasm of uncertain behavior of spinal cord** MCC
- D43.8 Neoplasm of uncertain behavior of other specified parts of central nervous system** MCC
- D43.9 Neoplasm of uncertain behavior of central nervous system, unspecified** MCC
 Neoplasm of uncertain behavior of nervous system (central) NOS
- ✓4^N D44 Neoplasm of uncertain behavior of endocrine glands**
EXCLUDES 1 multiple endocrine adenomatosis (E31.2-)
 multiple endocrine neoplasia (E31.2-)
 neoplasm of uncertain behavior of endocrine pancreas (D37.8)
 neoplasm of uncertain behavior of ovary (D39.1-)
 neoplasm of uncertain behavior of testis (D40.1-)
 neoplasm of uncertain behavior of thymus (D38.4)
- D44.0 Neoplasm of uncertain behavior of thyroid gland**
- ✓5^N D44.1 Neoplasm of uncertain behavior of adrenal gland**
 Use additional code to identify any functional activity

AHA: 2016,4Q,8

D47.Z1 Post-transplant lymphoproliferative disorder (PTLD)

Code first complications of transplanted organs and tissue (T86.-)

DEF: Excessive proliferation of B-cell lymphocytes following Epstein-Barr virus infection in organ transplant patients. It may progress to non-Hodgkin lymphoma.**D47.Z2 Castleman disease**

Code also if applicable human herpesvirus 8 infection (B10.89)

EXCLUDES 2 Kaposi's sarcoma ▶ (C46.-) ◀**DEF:** Rare disease of the lymph nodes and lymphoid tissues that closely mimics lymphoma.**D47.Z9 Other specified neoplasms of uncertain behavior of lymphoid, hematopoietic and related tissue**

Histiocytic tumors of uncertain behavior

D47.9 Neoplasm of uncertain behavior of lymphoid, hematopoietic and related tissue, unspecified

Lymphoproliferative disease NOS

✓ 4N D48 Neoplasm of uncertain behavior of other and unspecified sites**EXCLUDES 1** neurofibromatosis (nonmalignant) (Q85.0-)**D48.0 Neoplasm of uncertain behavior of bone and articular cartilage****EXCLUDES 1** neoplasm of uncertain behavior of cartilage of ear (D48.1)
neoplasm of uncertain behavior of cartilage of larynx (D38.0)
neoplasm of uncertain behavior of cartilage of nose (D38.5)
neoplasm of uncertain behavior of connective tissue of eyelid (D48.1)
neoplasm of uncertain behavior of synovia (D48.1)

D48.1 Neoplasm of uncertain behavior of connective and other soft tissue

Neoplasm of uncertain behavior of connective tissue of ear
 Neoplasm of uncertain behavior of connective tissue of eyelid
 Stromal tumors of uncertain behavior of digestive system

EXCLUDES 1 neoplasm of uncertain behavior of articular cartilage (D48.0)

neoplasm of uncertain behavior of cartilage of larynx (D38.0)

neoplasm of uncertain behavior of cartilage of nose (D38.5)

neoplasm of uncertain behavior of connective tissue of breast (D48.6-)

D48.2 Neoplasm of uncertain behavior of peripheral nerves and autonomic nervous system

EXCLUDES 1 neoplasm of uncertain behavior of peripheral nerves of orbit (D48.7)

D48.3 Neoplasm of uncertain behavior of retroperitoneum**D48.4 Neoplasm of uncertain behavior of peritoneum****D48.5 Neoplasm of uncertain behavior of skin**

Neoplasm of uncertain behavior of anal margin

Neoplasm of uncertain behavior of anal skin

Neoplasm of uncertain behavior of perianal skin

Neoplasm of uncertain behavior of skin of breast

EXCLUDES 1 neoplasm of uncertain behavior of anus NOS (D37.8)

neoplasm of uncertain behavior of skin of genital organs (D39.8, D40.8)

neoplasm of uncertain behavior of vermillion border of lip (D37.0)

✓ 5A D48.6 Neoplasm of uncertain behavior of breast

Neoplasm of uncertain behavior of connective tissue of breast
 Cystosarcoma phyllodes

EXCLUDES 1 neoplasm of uncertain behavior of skin of breast (D48.5)

D48.60 Neoplasm of uncertain behavior of unspecified breast**D48.61 Neoplasm of uncertain behavior of right breast****D48.62 Neoplasm of uncertain behavior of left breast****D48.7 Neoplasm of uncertain behavior of other specified sites**

Neoplasm of uncertain behavior of eye

Neoplasm of uncertain behavior of heart

Neoplasm of uncertain behavior of peripheral nerves of orbit

EXCLUDES 1 neoplasm of uncertain behavior of connective tissue (D48.1)

neoplasm of uncertain behavior of skin of eyelid (D48.5)

D48.9 Neoplasm of uncertain behavior, unspecified**Neoplasms of unspecified behavior (D49)****✓ 4A D49 Neoplasms of unspecified behavior****NOTE**

Category D49 classifies by site neoplasms of unspecified morphology and behavior. The term "mass", unless otherwise stated, is not to be regarded as a neoplastic growth.

INCLUDES

"growth" NOS

neoplasm NOS

new growth NOS

tumor NOS

EXCLUDES 1

neoplasms of uncertain behavior (D37–D44, D48)

D49.0 Neoplasm of unspecified behavior of digestive system

EXCLUDES 1 neoplasm of unspecified behavior of margin of anus (D49.2)

neoplasm of unspecified behavior of perianal skin (D49.2)

neoplasm of unspecified behavior of skin of anus (D49.2)

D49.1 Neoplasm of unspecified behavior of respiratory system**D49.2 Neoplasm of unspecified behavior of bone, soft tissue, and skin****EXCLUDES 1**

neoplasm of unspecified behavior of anal canal (D49.0)

neoplasm of unspecified behavior of anus NOS (D49.0)

neoplasm of unspecified behavior of bone marrow (D49.89)

neoplasm of unspecified behavior of cartilage of larynx (D49.1)

neoplasm of unspecified behavior of cartilage of nose (D49.1)

neoplasm of unspecified behavior of connective tissue of breast (D49.3)

neoplasm of unspecified behavior of skin of genital organs (D49.59)

neoplasm of unspecified behavior of vermillion border of lip (D49.0)

D49.3 Neoplasm of unspecified behavior of breast**EXCLUDES 1**

neoplasm of unspecified behavior of skin of breast (D49.2)

D49.4 Neoplasm of unspecified behavior of bladder**✓ 5A****D49.5 Neoplasm of unspecified behavior of other genitourinary organs**

AHA: 2016.4Q.9

✓ 5A**D49.51 Neoplasm of unspecified behavior of kidney**

D49.511 Neoplasm of unspecified behavior of right kidney

D49.512 Neoplasm of unspecified behavior of left kidney

D49.519 Neoplasm of unspecified behavior of unspecified kidney

D49.59 Neoplasm of unspecified behavior of other genitourinary organ**D49.6 Neoplasm of unspecified behavior of brain****MCC****EXCLUDES 1**

neoplasm of unspecified behavior of cerebral meninges (D49.7)

neoplasm of unspecified behavior of cranial nerves (D49.7)

D49.7 Neoplasm of unspecified behavior of endocrine glands and other parts of nervous system**EXCLUDES 1**

neoplasm of unspecified behavior of peripheral, sympathetic, and parasympathetic nerves and ganglia (D49.2)

✓ 5A**D49.8 Neoplasm of unspecified behavior of other specified sites****EXCLUDES 1**

neoplasm of unspecified behavior of eyelid (skin) (D49.2)

neoplasm of unspecified behavior of eyelid cartilage (D49.2)

neoplasm of unspecified behavior of great vessels (D49.2)

neoplasm of unspecified behavior of optic nerve (D49.7)

D49.81 Neoplasm of unspecified behavior of retina and choroid

Dark area on retina

Retinal freckle

D49.89 Neoplasm of unspecified behavior of other specified sites**D49.9 Neoplasm of unspecified behavior of unspecified site**

Chapter 3. Diseases of the Blood and Blood-forming Organs and Certain Disorders Involving the Immune Mechanism (D50–D89)

Chapter-specific Guidelines with Coding Examples
Reserved for future guideline expansion

Chapter 3. Diseases of the Blood and Blood-forming Organs and Certain Disorders Involving the Immune Mechanism (D50–D89)

EXCLUDES 1 autoimmune disease (systemic) NOS (M35.9)
certain conditions originating in the perinatal period (P00–P96)
complications of pregnancy, childbirth and the puerperium (O00–O9A)
congenital malformations, deformations and chromosomal abnormalities (Q00–Q99)
endocrine, nutritional and metabolic diseases (E00–E88)
human immunodeficiency virus [HIV] disease (B20)
injury, poisoning and certain other consequences of external causes (S00–T88)
neoplasms (C00–D49)
symptoms, signs and abnormal clinical and laboratory findings, not elsewhere classified (R00–R94)

This chapter contains the following blocks:

D50–D53 Nutritional anemias
D55–D59 Hemolytic anemias
D60–D64 Aplastic and other anemias and other bone marrow failure syndromes
D65–D69 Coagulation defects, purpura and other hemorrhagic conditions
D70–D77 Other disorders of blood and blood-forming organs
D78 Intraoperative and postprocedural complications of the spleen
D80–D89 Certain disorders involving the immune mechanism

Nutritional anemias (D50–D53)

DEF: Nutritional anemia: The result of inadequate intake or absorption of a vitamin or mineral that impacts the production of red blood cells or causes them to develop abnormally affecting the size and shape.

TIP: Documentation must identify a link between anemia and the nutritional deficiency; low levels of a particular nutrient may occur concurrently with anemia but not cause the anemia.

✓4A D50 Iron deficiency anemia

INCLUDES asiderotic anemia
hypochromic anemia

D50.0 Iron deficiency anemia secondary to blood loss (chronic)

Posthemorrhagic anemia (chronic)

EXCLUDES 1 acute posthemorrhagic anemia (D62)
congenital anemia from fetal blood loss (P61.3)

AHA: 2019,3Q,17

D50.1 Sideropenic dysphagia

Kelly-Paterson syndrome
Plummer-Vinson syndrome

D50.8 Other iron deficiency anemias

Iron deficiency anemia due to inadequate dietary iron intake

D50.9 Iron deficiency anemia, unspecified

✓4A D51 Vitamin B12 deficiency anemia

EXCLUDES 1 vitamin B12 deficiency (E53.8)

D51.0 Vitamin B12 deficiency anemia due to intrinsic factor deficiency

Addison anemia
Biermer anemia
Pernicious (congenital) anemia
Congenital intrinsic factor deficiency

DEF: Chronic progressive anemia due to vitamin B12 malabsorption, caused by lack of secretion of intrinsic factor, which is produced by the gastric mucosa of the stomach.

D51.1 Vitamin B12 deficiency anemia due to selective vitamin B12 malabsorption with proteinuria

Imerslund (Gräsbeck) syndrome
Megaloblastic hereditary anemia

D51.2 Transcobalamin II deficiency

D51.3 Other dietary vitamin B12 deficiency anemia

Vegan anemia

D51.8 Other vitamin B12 deficiency anemias

D51.9 Vitamin B12 deficiency anemia, unspecified

✓4A D52 Folate deficiency anemia

EXCLUDES 1 folate deficiency without anemia (E53.8)

DEF: Deficiency in a B complex vitamin needed for the production of healthy red blood cells. Lack of folate, or folic acid, and other absorption conditions can cause anemia resulting in large, misshapen red blood cells called megaloblasts.

D52.0 Dietary folate deficiency anemia

Nutritional megaloblastic anemia

DEF: Result of a poor diet with inadequate intake of folate, which is needed to produce healthy red blood cells.

D52.1 Drug-induced folate deficiency anemia

Use additional code for adverse effect, if applicable, to identify drug (T36–T50 with fifth or sixth character 5)

D52.8 Other folate deficiency anemias

D52.9 Folate deficiency anemia, unspecified

Folic acid deficiency anemia NOS

✓4B D53 Other nutritional anemias

INCLUDES megaloblastic anemia unresponsive to vitamin B12 or folate therapy

D53.0 Protein deficiency anemia

Amino-acid deficiency anemia
Orotaciduric anemia

EXCLUDES 1 Lesch-Nyhan syndrome (E79.1)

D53.1 Other megaloblastic anemias, not elsewhere classified

Megaloblastic anemia NOS

EXCLUDES 1 Di Guglielmo's disease (C94.0)

D53.2 Scurbutic anemia

EXCLUDES 1 scurvy (E54)

D53.8 Other specified nutritional anemias

Anemia associated with deficiency of copper
Anemia associated with deficiency of molybdenum
Anemia associated with deficiency of zinc

EXCLUDES 1 nutritional deficiencies without anemia, such as:
copper deficiency NOS (E61.0)
molybdenum deficiency NOS (E61.5)
zinc deficiency NOS (E60)

D53.9 Nutritional anemia, unspecified

Simple chronic anemia

EXCLUDES 1 anemia NOS (D64.9)

AHA: 2018,4Q,88

Hemolytic anemias (D55–D59)

✓4B D55 Anemia due to enzyme disorders

EXCLUDES 1 drug-induced enzyme deficiency anemia (D59.2)

D55.0 Anemia due to glucose-6-phosphate dehydrogenase [G6PD] deficiency

Favism
G6PD deficiency anemia

EXCLUDES 1 glucose-6-phosphate dehydrogenase (G6PD) deficiency without anemia (D75.A)

D55.1 Anemia due to other disorders of glutathione metabolism

Anemia (due to) enzyme deficiencies, except G6PD, related to the hexose monophosphate [HMP] shunt pathway
Anemia (due to) hemolytic nonspherocytic (hereditary), type I

D55.2 Anemia due to disorders of glycolytic enzymes

Hemolytic nonspherocytic (hereditary) anemia, type II
Hexokinase deficiency anemia
Pyruvate kinase [PK] deficiency anemia
Triose-phosphate isomerase deficiency anemia
EXCLUDES 1 disorders of glycolysis not associated with anemia
► (E74.81-) ◀

D55.3 Anemia due to disorders of nucleotide metabolism

D55.8 Other anemias due to enzyme disorders

D55.9 Anemia due to enzyme disorder, unspecified

✓ 4th D56 Thalassemia**EXCLUDES 1** sickle-cell thalassemia (D57.4-)**DEF:** Group of inherited disorders of hemoglobin metabolism causing mild to severe anemia. It is usually found in people of Mediterranean, African, Chinese, or Asian descent.**Thalassemia****D56.0 Alpha thalassemia**

Alpha thalassemia major
Hemoglobin H Constant Spring
Hemoglobin H disease
Hydrops fetalis due to alpha thalassemia
Severe alpha thalassemia
Triple gene defect alpha thalassemia
Use additional code, if applicable, for hydrops fetalis due to alpha thalassemia (P56.99)

EXCLUDES 1 alpha thalassemia trait or minor (D56.3)
asymptomatic alpha thalassemia (D56.3)
hydrops fetalis due to isoimmunization (P56.0)
hydrops fetalis not due to immune hemolysis (P83.2)

DEF: HBA1 and HBA2 genetic variant of chromosome 16 prevalent among those of African and Southeast Asian descent. Alpha thalassemia is associated with a wide spectrum of anemic presentation and includes hemoglobin H disease subtypes.**D56.1 Beta thalassemia**

Beta thalassemia major
Cooley's anemia
Homozygous beta thalassemia
Severe beta thalassemia
Thalassemia intermedia
Thalassemia major

EXCLUDES 1 beta thalassemia minor (D56.3)
beta thalassemia trait (D56.3)
delta-beta thalassemia (D56.2)
hemoglobin E-beta thalassemia (D56.5)
sickle-cell beta thalassemia (D57.4-)

D56.2 Delta-beta thalassemia

Homozygous delta-beta thalassemia
EXCLUDES 1 delta-beta thalassemia minor (D56.3)
delta-beta thalassemia trait (D56.3)

D56.3 Thalassemia minor

Alpha thalassemia minor
Alpha thalassemia silent carrier
Alpha thalassemia trait
Beta thalassemia minor
Beta thalassemia trait
Delta-beta thalassemia minor
Delta-beta thalassemia trait
Thalassemia trait NOS

EXCLUDES 1 alpha thalassemia (D56.0)
beta thalassemia (D56.1)
delta-beta thalassemia (D56.2)
hemoglobin E-beta thalassemia (D56.5)
sickle-cell trait (D57.3)

DEF: Solitary abnormal gene that identifies a carrier of the disease, yet with an absence of symptoms or a clinically mild anemic presentation.**D56.4 Hereditary persistence of fetal hemoglobin [HPFH]****D56.5 Hemoglobin E-beta thalassemia**

EXCLUDES 1 beta thalassemia (D56.1)
beta thalassemia minor (D56.3)
beta thalassemia trait (D56.3)
delta-beta thalassemia (D56.2)
delta-beta thalassemia trait (D56.3)
hemoglobin E disease (D58.2)
other hemoglobinopathies (D58.2)
sickle-cell beta thalassemia (D57.4-)

D56.8 Other thalassemias

Dominant thalassemia
Hemoglobin C thalassemia
Mixed thalassemia
Thalassemia with other hemoglobinopathy

EXCLUDES 1 hemoglobin C disease (D58.2)
hemoglobin E disease (D58.2)
other hemoglobinopathies (D58.2)
sickle-cell anemia (D57.-)
sickle-cell thalassemia (D57.4)

D56.9 Thalassemia, unspecified

Mediterranean anemia (with other hemoglobinopathy)

✓ 4th D57 Sickle-cell disorders

Use additional code for any associated fever (R50.81)

EXCLUDES 1 other hemoglobinopathies (D58.-)**DEF:** Severe, chronic inherited diseases caused by a genetic variation in hemoglobin protein of the red blood cell. The gene mutation causes the red blood cell to become hard, sticky, and crescent or sickle shaped making it harder for red blood cells to travel through the bloodstream disrupting blood flow and decreasing oxygen transport to tissues.**Sickle cell****✓ 5th** D57.0 Hb-SS disease with crisis

► Sickle-cell disease with crisis ◄
Hb-SS disease with vasoocclusive pain

D57.00 Hb-SS disease with crisis, unspecified

► Hb-SS disease with (painful) crisis NOS ◄
► Hb-SS disease with vasoocclusive pain NOS ◄

D57.01 Hb-SS disease with acute chest syndrome**D57.02 Hb-SS disease with splenic sequestration**

- **D57.03 Hb-SS disease with cerebral vascular involvement** MCC
Code also, if applicable, cerebral infarction (I63.-)
- **D57.09 Hb-SS disease with crisis with other specified complication** MCC
Use additional code to identify complications, such as:
cholelithiasis (K80.-)
priapism (N48.32)
- **D57.1 Sick cell disease without crisis** HCC
Hb-SS disease without crisis
Sickle-cell anemia NOS
Sickle-cell disease NOS
Sickle-cell disorder NOS
- ✓ 6th **D57.2 Sick cell/Hb-C disease**
Hb-SC disease
Hb-S/Hb-C disease
- **D57.20 Sick cell/Hb-C disease without crisis** HCC
- ✓ 6th **D57.21 Sick cell/Hb-C disease with crisis**
 - **D57.211 Sick cell/Hb-C disease with acute chest syndrome** MCC HCC
 - **D57.212 Sick cell/Hb-C disease with splenic sequestration** MCC HCC
 - **D57.213 Sick cell/Hb-C disease with cerebral vascular involvement** MCC
Code also, if applicable, cerebral infarction (I63.-)
 - **D57.218 Sick cell/Hb-C disease with crisis with other specified complication** MCC
Use additional code to identify complications, such as:
cholelithiasis (K80.-)
priapism (N48.32)
 - **D57.219 Sick cell/Hb-C disease with crisis, unspecified** MCC HCC
Sickle-cell/Hb-C disease with crisis NOS
►Sickle-cell/Hb-C disease with vasoocclusive pain NOS ◀
- **D57.3 Sick cell trait** HCC
Hb-S trait
Heterozygous hemoglobin S
DEF: Heterozygous genetic makeup characterized by one gene for normal hemoglobin and one for sickle-cell hemoglobin. The clinical disease is rarely present.
- ✓ 6th **D57.4 Sick cell thalassemia**
Sickle-cell beta thalassemia
Thalassemia Hb-S disease
 - **D57.40 Sick cell thalassemia without crisis** HCC
Microrepanocytosis
Sickle-cell thalassemia NOS
 - ✓ 6th **D57.41 Sick cell thalassemia, unspecified, with crisis**
 - Sickle-cell thalassemia with (painful) crisis NOS ◀
 - Sickle-cell thalassemia with vasoocclusive pain NOS ◀
 - **D57.411 Sick cell thalassemia, unspecified, with acute chest syndrome** MCC HCC
 - **D57.412 Sick cell thalassemia, unspecified, with splenic sequestration** MCC HCC
 - **D57.413 Sick cell thalassemia, unspecified, with cerebral vascular involvement** MCC
Code also, if applicable cerebral infarction (I63.-)
 - **D57.418 Sick cell thalassemia, unspecified, with crisis with other specified complication** MCC
Use additional code to identify complications, such as:
cholelithiasis (K80.-)
priapism (N48.32)

- cholelithiasis (K80.-)
- priapism (N48.32)
- D57.819 Other sickle-cell disorders with crisis, unspecified** MCC HCC
- Other sickle-cell disorders with crisis NOS
- Other sickle-cell disorders with vasoocclusive pain NOS ◀
- ✓ 4th D58 Other hereditary hemolytic anemias**
- EXCLUDES 1** hemolytic anemia of the newborn (P55.-)
- D58.0 Hereditary spherocytosis** HCC
- Acholuric (familial) jaundice
- Congenital (spherocytic) hemolytic icterus
- Minkowski-Chauffard syndrome
- DEF:** Inherited condition caused by mutations to genes responsible for the production of proteins that form the membranes of red blood cells. The shape and flexibility of the red blood cell membrane is altered diminishing the cells ability to traverse the spleen, therefore becoming trapped and destroyed before the red blood cell has reached maturity.
- D58.1 Hereditary elliptocytosis** HCC
- Elliptocytosis (congenital)
- Ovalocytosis (congenital) (hereditary)
- D58.2 Other hemoglobinopathies** HCC
- Abnormal hemoglobin NOS
- Congenital Heinz body anemia
- Hb-C disease
- Hb-D disease
- Hb-E disease
- Hemoglobinopathy NOS
- Unstable hemoglobin hemolytic disease
- EXCLUDES 1** familial polycythemia (D75.0)
- Hb-M disease (D74.0)
- hemoglobin E-beta thalassemia (D56.5)
- hereditary persistence of fetal hemoglobin [HPFH] (D56.4)
- high-altitude polycythemia (D75.1)
- methemoglobinemia (D74.-)
- other hemoglobinopathies with thalassemia (D56.8)
- D58.8 Other specified hereditary hemolytic anemias** HCC HCC
- Stomatocytosis
- D58.9 Hereditary hemolytic anemia, unspecified** HCC HCC
- ✓ 4th D59 Acquired hemolytic anemia**
- DEF:** Non-hereditary anemia characterized by premature destruction of red blood cells caused by infectious organisms, poisons, and physical agents.
- D59.0 Drug-induced autoimmune hemolytic anemia** HCC HCC
- Use additional code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)
- ✓ 5th D59.1 Other autoimmune hemolytic anemias**
- Autoimmune hemolytic disease (cold type) (warm type)
- Chronic cold hemagglutinin disease
- Cold agglutinin disease
- Cold agglutinin hemoglobinuria
- Cold type (secondary) (symptomatic) hemolytic anemia
- Warm type (secondary) (symptomatic) hemolytic anemia
- EXCLUDES 1** Evans syndrome (D69.41)
- hemolytic disease of newborn (P55.-)
- paroxysmal cold hemoglobinuria (D59.6)
- EXCLUDES 2** ► Evans syndrome (D69.41) ◀

- paroxysmal cold hemoglobinuria (D59.6) ◀
- D59.10 Autoimmune hemolytic anemia, unspecified** HCC
- D59.11 Warm autoimmune hemolytic anemia** HCC
- Warm type (primary) (secondary) (symptomatic) autoimmune hemolytic anemia
- Warm type autoimmune hemolytic disease
- D59.12 Cold autoimmune hemolytic anemia** HCC
- Chronic cold hemagglutinin disease
- Cold agglutinin disease
- Cold agglutinin hemoglobinuria
- Cold type (primary) (secondary) (symptomatic) autoimmune hemolytic anemia
- Cold type autoimmune hemolytic disease
- D59.13 Mixed type autoimmune hemolytic anemia** HCC
- Mixed type autoimmune hemolytic disease
- Mixed type, cold and warm, (primary) (secondary) (symptomatic) autoimmune hemolytic anemia
- D59.19 Other autoimmune hemolytic anemia** HCC
- D59.2 Drug-induced nonautoimmune hemolytic anemia** HCC HCC
- Drug-induced enzyme deficiency anemia
- Use additional code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)
- D59.3 Hemolytic-uremic syndrome** MCC HCC
- Use additional code to identify associated:
- E. coli infection (B96.2-)
- Pneumococcal pneumonia (J13)
- Shigella dysenteriae (A03.9)
- DEF:** Condition typically precipitated by infection causing low platelets and destruction of red blood cells resulting in hemolytic anemia. This cell damage and blockage of renal capillaries lead to kidney failure. Mainly affects children.
- D59.4 Other nonautoimmune hemolytic anemias** HCC HCC
- Mechanical hemolytic anemia
- Microangiopathic hemolytic anemia
- Toxic hemolytic anemia
- D59.5 Paroxysmal nocturnal hemoglobinuria [Marchiafava-Micheli]** HCC
- EXCLUDES 1** hemoglobinuria NOS (R82.3)
- D59.6 Hemoglobinuria due to hemolysis from other external causes** HCC
- Hemoglobinuria from exertion
- March hemoglobinuria
- Paroxysmal cold hemoglobinuria
- Use additional code (Chapter 20) to identify external cause
- EXCLUDES 1** hemoglobinuria NOS (R82.3)
- D59.8 Other acquired hemolytic anemias** HCC
- D59.9 Acquired hemolytic anemia, unspecified** HCC HCC
- Idiopathic hemolytic anemia, chronic
- Aplastic and other anemias and other bone marrow failure syndromes (D60-D64)**
- ✓ 4th D60 Acquired pure red cell aplasia [erythroblastopenia]**
- INCLUDES** red cell aplasia (acquired) (adult) (with thymoma)
- EXCLUDES 1** congenital red cell aplasia (D61.01)
- DEF:** Bone marrow failure characterized by underproduction of red blood cells while white blood cell and platelet production remains normal.
- D60.0 Chronic acquired pure red cell aplasia** MCC HCC
- D60.1 Transient acquired pure red cell aplasia** MCC HCC
- D60.8 Other acquired pure red cell aplasias** MCC HCC
- D60.9 Acquired pure red cell aplasia, unspecified** MCC HCC

✓4th D61 Other aplastic anemias and other bone marrow failure syndromes**EXCLUDES 1** neutropenia (D70.-)**EXCLUDES 2** ▶ neutropenia (D70.-) ◀

AHA: 2014,4Q,22

DEF: Aplastic anemia: Bone marrow failure characterized by underproduction of red blood cells, white blood cells and platelets.

✓5th D61.0 Constitutional aplastic anemia**D61.01 Constitutional (pure) red blood cell aplasia**

CC MCC

Blackfan-Diamond syndrome
Congenital (pure) red cell aplasia
Familial hypoplastic anemia
Primary (pure) red cell aplasia
Red cell (pure) aplasia of infants**EXCLUDES 1** acquired red cell aplasia (D60.9)**D61.09 Other constitutional aplastic anemia**

CC MCC

Fanconi's anemia
Pancytopenia with malformations**D61.1 Drug-induced aplastic anemia**

MCC MCC

Use additional code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)

D61.2 Aplastic anemia due to other external agents

MCC MCC

Code first, if applicable, toxic effects of substances chiefly nonmedicinal as to source (T51-T65)

D61.3 Idiopathic aplastic anemia

MCC MCC

✓5th D61.8 Other specified aplastic anemias and other bone marrow failure syndromes**✓6th D61.81 Pancytopenia****EXCLUDES 1** pancytopenia (due to) (with) aplastic anemia (D61.9)

pancytopenia (due to) (with) bone marrow infiltration (D61.82)

pancytopenia (due to) (with) congenital (pure) red cell aplasia (D61.01)

pancytopenia (due to) (with) hairy cell leukemia (C91.4-)

pancytopenia (due to) (with) human immunodeficiency virus disease (B20)

pancytopenia (due to) (with) leukoerythroblastic anemia (D61.82)

pancytopenia (due to) (with) myeloproliferative disease (D47.1)

EXCLUDES 2 pancytopenia (due to) (with) myelodysplastic syndromes (D46.-)

DEF: Shortage of all three blood cells: white, red, and platelets.

D61.810 Antineoplastic chemotherapy induced pancytopenia

MCC MCC

EXCLUDES 2 aplastic anemia due to antineoplastic chemotherapy (D61.1)**D61.811 Other drug-induced pancytopenia**

MCC MCC

EXCLUDES 2 aplastic anemia due to drugs (D61.1)**D61.818 Other pancytopenia**

CC MCC

AHA: 2019,1Q,16

TIP: Assign this code in addition to myeloid leukemia codes (C92.-) when pancytopenia is documented. Although common in some types of myeloid leukemia, pancytopenia is not always inherent.

D61.82 Myelophthisis

CC MCC

Leukoerythroblastic anemia
Myelophthisic anemia
PanmyelophthisisCode also the underlying disorder, such as:
malignant neoplasm of breast (C50.-)
tuberculosis (A15.-)**EXCLUDES 1** idiopathic myelofibrosis (D47.1)

myelofibrosis NOS (D75.81)

myelofibrosis with myeloid metaplasia (D47.4)

primary myelofibrosis (D47.1)

secondary myelofibrosis (D75.81)

DEF: Condition that occurs when normal hematopoietic tissue in the bone marrow is replaced with abnormal tissue, such as fibrous tissue or tumors. Most commonly seen during the advanced stages of cancer.

D61.89 Other specified aplastic anemias and other bone marrow failure syndromes

MCC MCC

D61.9 Aplastic anemia, unspecified

CC MCC

Hypoplastic anemia NOS
Medullary hypoplasia**D62 Acute posthemorrhagic anemia**

CC

EXCLUDES 1 anemia due to chronic blood loss (D50.0)

blood loss anemia NOS (D50.0)

congenital anemia from fetal blood loss (P61.3)

AHA: 2019,3Q,11,17

✓4th D63 Anemia in chronic diseases classified elsewhere**D63.0 Anemia in neoplastic disease**

Code first neoplasm (C00-D49)

EXCLUDES 1 aplastic anemia due to antineoplastic chemotherapy (D61.1)**EXCLUDES 2** anemia due to antineoplastic chemotherapy (D64.81)**D63.1 Anemia in chronic kidney disease**

Erythropoietin resistant anemia (EPO resistant anemia)

Code first underlying chronic kidney disease (CKD) (N18.-)

D63.8 Anemia in other chronic diseases classified elsewhere

Code first underlying disease, such as:

diphyllobothriasis (B70.0)

hookworm disease (B76.0-B76.9)

hypothyroidism (E00.0-E03.9)

malaria (B50.0-B54)

symptomatic late syphilis (A52.79)

tuberculosis (A18.89)

✓4th D64 Other anemias**EXCLUDES 1** refractory anemia (D46.-)

refractory anemia with excess blasts in transformation [RAEB-T] (C92.0-)

DEF: Sideroblastic anemia: Hereditary or secondary disorder in which the red blood cells cannot effectively use iron, a nutrient needed to make hemoglobin. Although the iron can enter the red blood cell it is not assimilated into the hemoglobin molecule and builds up ringed sideroblasts around the cell nucleus.

D64.0 Hereditary sideroblastic anemia

MCC

Sex-linked hypochromic sideroblastic anemia

D64.1 Secondary sideroblastic anemia due to disease

MCC

Code first underlying disease

D64.2 Secondary sideroblastic anemia due to drugs and toxins

MCC

Code first poisoning due to drug or toxin, if applicable (T36-T65 with fifth or sixth character 1-4 or 6)

Use additional code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)

D64.3 Other sideroblastic anemias

MCC

Sideroblastic anemia NOS

Pyridoxine-responsive sideroblastic anemia NEC

D64.4 Congenital dyserythropoietic anemia

Dysmatopoietic anemia (congenital)

EXCLUDES 1 Blackfan-Diamond syndrome (D61.01)

Di Guglielmo's disease (C94.0)

✓⁵ D64.8 Other specified anemias

D64.81 Anemia due to antineoplastic chemotherapy

Antineoplastic chemotherapy induced anemia
EXCLUDES 1 aplastic anemia due to antineoplastic chemotherapy (D61.1)

EXCLUDES 2 anemia in neoplastic disease (D63.0)

AHA: 2014,4Q,22

DEF: Reversible adverse effect of chemotherapy, causing inhibition of bone marrow production. A decrease in red blood cell production prevents adequate oxygenation of the tissues and organs causing fatigue, shortness of breath (SOB), and exacerbation of other medical conditions.

D64.89 Other specified anemias

Infantile pseudoleukemia

D64.9 Anemia, unspecified

AHA: 2018,4Q,88; 2017,1Q,7

Coagulation defects, purpura and other hemorrhagic conditions (D65–D69)

D65 Disseminated intravascular coagulation [defibrination syndrome]

MCC **HCC**

Afibrinogenemia, acquired
 Consumption coagulopathy
 Diffuse or disseminated intravascular coagulation [DIC]
 Fibrinolytic hemorrhage, acquired
 Fibrinolytic purpura
 Purpura fulminans

EXCLUDES 1 disseminated intravascular coagulation (complicating):
 abortion or ectopic or molar pregnancy (O00–O07, O08.1)
 in newborn (P60)
 pregnancy, childbirth and the puerperium (O45.0, O46.0, O67.0, O72.3)

Coagulation

D66 Hereditary factor VIII deficiency

MCC **HCC**

Classical hemophilia
 Deficiency factor VIII (with functional defect)
 Hemophilia A
 Hemophilia NOS

EXCLUDES 1 factor VIII deficiency with vascular defect (D68.0)

DEF: Hereditary, sex-linked lack of antihemophilic globulin (AHG) (factor VIII) that causes abnormal coagulation characterized by increased bleeding; large bruises of skin; bleeding in the mouth, nose, and gastrointestinal tract; and hemorrhages into joints, resulting in swelling and impaired function.

D67 Hereditary factor IX deficiency

MCC **HCC**

Christmas disease
 Factor IX deficiency (with functional defect)
 Hemophilia B
 Plasma thromboplastin component [PTC] deficiency

✓⁴ D68 Other coagulation defects

EXCLUDES 1 abnormal coagulation profile (R79.1)

coagulation defects complicating abortion or ectopic or molar pregnancy (O00–O07, O08.1)

coagulation defects complicating pregnancy, childbirth and the puerperium (O45.0, O46.0, O67.0, O72.3)

AHA: 2016,1Q,14

D68.0 Von Willebrand's disease

CC **HCC**

Angiohemophilia
 Factor VIII deficiency with vascular defect
 Vascular hemophilia

EXCLUDES 1 capillary fragility (hereditary) (D69.8)

factor VIII deficiency NOS (D66)

factor VIII deficiency with functional defect (D66)

DEF: Congenital, abnormal blood coagulation caused by deficient blood factor VII. Symptoms include excess or prolonged bleeding.

D68.1 Hereditary factor XI deficiency

CC **HCC**

Hemophilia C
 Plasma thromboplastin antecedent [PTA] deficiency
 Rosenthal's disease

D68.2 Hereditary deficiency of other clotting factors

CC **HCC**

AC globulin deficiency
 Congenital afibrinogenemia
 Deficiency of factor I [fibrinogen]
 Deficiency of factor II [prothrombin]
 Deficiency of factor V [labile]
 Deficiency of factor VII [stable]
 Deficiency of factor X [Stuart-Prower]
 Deficiency of factor XII [Hageman]
 Deficiency of factor XIII [fibrin stabilizing]
 Dysfibrinogenemia (congenital)
 Hypoproconvertinemia
 Owren's disease
 Proaccelerin deficiency

✓⁵ D68.3 Hemorrhagic disorder due to circulating anticoagulants

✓⁶

D68.31 Hemorrhagic disorder due to intrinsic circulating anticoagulants, antibodies, or inhibitors

D68.311 Acquired hemophilia

CC **HCC**

Autoimmune hemophilia
 Autoimmune inhibitors to clotting factors
 Secondary hemophilia

D68.312 Antiphospholipid antibody with hemorrhagic disorder

CC **HCC**

Lupus anticoagulant (LAC) with hemorrhagic disorder
 Systemic lupus erythematosus [SLE] inhibitor with hemorrhagic disorder

EXCLUDES 1 antiphospholipid antibody, finding without diagnosis (R76.0)

antiphospholipid antibody syndrome (D68.61)

antiphospholipid antibody with hypercoagulable state (D68.61)

lupus anticoagulant (LAC) finding without diagnosis (R76.0)

lupus anticoagulant (LAC) with hypercoagulable state (D68.62)

systemic lupus erythematosus [SLE] inhibitor finding without diagnosis (R76.0)

systemic lupus erythematosus [SLE] inhibitor with hypercoagulable state (D68.62)

D68.318 Other hemorrhagic disorder due to intrinsic circulating anticoagulants, antibodies, or inhibitors CC HCC
 Antithromboplastinemia
 Antithromboplastinogenemia
 Hemorrhagic disorder due to intrinsic increase in antithrombin
 Hemorrhagic disorder due to intrinsic increase in anti-VIIIa
 Hemorrhagic disorder due to intrinsic increase in anti-IXa
 Hemorrhagic disorder due to intrinsic increase in anti-XIa

D68.32 Hemorrhagic disorder due to extrinsic circulating anticoagulants CC HCC

Drug-induced hemorrhagic disorder
 Hemorrhagic disorder due to increase in anti-IIa
 Hemorrhagic disorder due to increase in anti-Xa
 Hyperheparinemia
 Use additional code for adverse effect, if applicable, to identify drug (T45.515, T45.525)

AHA: 2016,1Q,14-15

TIP: Do not assign to identify routine therapeutic anticoagulation effects; assign only for documented adverse effects.

D68.4 Acquired coagulation factor deficiency CC HCC

Deficiency of coagulation factor due to liver disease
 Deficiency of coagulation factor due to vitamin K deficiency
EXCLUDES 1 vitamin K deficiency of newborn (P53)

√ 5th **D68.5 Primary thrombophilia**

Primary hypercoagulable states
EXCLUDES 1 antiphospholipid syndrome (D68.61)
 lupus anticoagulant (D68.62)
 secondary activated protein C resistance (D68.69)
 secondary antiphospholipid antibody syndrome (D68.69)
 secondary lupus anticoagulant with hypercoagulable state (D68.69)
 secondary systemic lupus erythematosus [SLE] inhibitor with hypercoagulable state (D68.69)
 systemic lupus erythematosus [SLE] inhibitor finding without diagnosis (R76.0)
 systemic lupus erythematosus [SLE] inhibitor with hemorrhagic disorder (D68.312)
 thrombotic thrombocytopenic purpura (M31.1)

DEF: Thrombophilia: Increased tendency of the blood to clot, which can lead to thrombus or embolus formation.

D68.51 Activated protein C resistance CC HCC
 Factor V Leiden mutation

D68.52 Prothrombin gene mutation CC HCC

D68.59 Other primary thrombophilia CC HCC

Antithrombin III deficiency
 Hypercoagulable state NOS
 Primary hypercoagulable state NEC
 Primary thrombophilia NEC
 Protein C deficiency
 Protein S deficiency
 Thrombophilia NOS

√ 5th **D68.6 Other thrombophilia**

Other hypercoagulable states
EXCLUDES 1 diffuse or disseminated intravascular coagulation [DIC] (D65)
 heparin induced thrombocytopenia (HIT) (D75.82)
 hyperhomocysteinemia (E72.11)

D68.61 Antiphospholipid syndrome CC HCC

Anticardiolipin syndrome
 Antiphospholipid antibody syndrome
EXCLUDES 1 anti-phospholipid antibody, finding without diagnosis (R76.0)
 anti-phospholipid antibody with hemorrhagic disorder (D68.312)
 lupus anticoagulant syndrome (D68.62)

D68.62 Lupus anticoagulant syndrome CC HCC
 Lupus anticoagulant
 Presence of systemic lupus erythematosus [SLE] inhibitor

EXCLUDES 1 anticardiolipin syndrome (D68.61)
 antiphospholipid syndrome (D68.61)
 lupus anticoagulant (LAC) finding without diagnosis (R76.0)
 lupus anticoagulant (LAC) with hemorrhagic disorder (D68.312)

D68.69 Other thrombophilia CC HCC
 Hypercoagulable states NEC
 Secondary hypercoagulable state NOS

D68.8 Other specified coagulation defects CC HCC

EXCLUDES 1 hemorrhagic disease of newborn (P53)

D68.9 Coagulation defect, unspecified CC HCC

√ 4th **D69 Purpura and other hemorrhagic conditions**

EXCLUDES 1 benign hypergammaglobulinemic purpura (D89.0)
 cryoglobulinemic purpura (D89.1)
 essential (hemorrhagic) thrombocythemia (D47.3)
 hemorrhagic thrombocythemia (D47.3)
 purpura fulminans (D65)
 thrombotic thrombocytopenic purpura (M31.1)
 Waldenström hypergammaglobulinemic purpura (D89.0)

D69.0 Allergic purpura CC HCC

Allergic vasculitis
 Nonthrombocytopenic hemorrhagic purpura
 Nonthrombocytopenic idiopathic purpura
 Purpura anaphylactoid
 Purpura Henoch(-Schönlein)
 Purpura rheumatica
 Vascular purpura
EXCLUDES 1 thrombocytopenic hemorrhagic purpura (D69.3)
DEF: Any hemorrhagic condition, thrombocytic or nonthrombocytopenic in origin, caused by a presumed allergic reaction.

D69.1 Qualitative platelet defects HCC

Bernard-Soulier [giant platelet] syndrome
 Glanzmann's disease
 Grey platelet syndrome
 Thromboasthenia (hemorrhagic) (hereditary)
 Thrombocytopathy
EXCLUDES 1 von Willebrand's disease (D68.0)

D69.2 Other nonthrombocytopenic purpura HCC

Purpura NOS
 Purpura simplex
 Senile purpura

D69.3 Immune thrombocytopenic purpura CC HCC

Hemorrhagic (thrombocytopenic) purpura
 Idiopathic thrombocytopenic purpura
 Tidal platelet dysgenesis
DEF: Tidal platelet dysgenesis: Fluctuation of platelet counts from normal to very low within periods of 20 to 40 days and may involve autoimmune platelet destruction.

√ 5th **D69.4 Other primary thrombocytopenia**
EXCLUDES 1 transient neonatal thrombocytopenia (P61.0)
 Wiskott-Aldrich syndrome (D82.0)

D69.41 Evans syndrome CC HCC

D69.42 Congenital and hereditary thrombocytopenia purpura CC HCC

Congenital thrombocytopenia
 Hereditary thrombocytopenia
 Code first congenital or hereditary disorder, such as:
 thrombocytopenia with absent radius (TAR syndrome) (Q87.2)

D69.49 Other primary thrombocytopenia HCC

Megakaryocytic hypoplasia
 Primary thrombocytopenia NOS

√ 5th **D69.5 Secondary thrombocytopenia**
EXCLUDES 1 heparin induced thrombocytopenia (HIT) (D75.82)
 transient thrombocytopenia of newborn (P61.0)

D69.51 Posttransfusion purpura
 Posttransfusion purpura from whole blood (fresh) or blood products
 PTP

D69.59 Other secondary thrombocytopenia

AHA: 2014,4Q,22

D69.6 Thrombocytopenia, unspecified MCC**D69.8 Other specified hemorrhagic conditions** MCCCapillary fragility (hereditary)
Vascular pseudohemophilia**D69.9 Hemorrhagic condition, unspecified** MCC**Other disorders of blood and blood-forming organs (D70–D77)**✓4 **D70 Neutropenia**INCLUDES agranulocytosis
decreased absolute neutrophil count (ANC)

Use additional code for any associated:

fever (R50.81)
mucositis (J34.81, K12.3–, K92.81, N76.81)EXCLUDES 1 neutropenic splenomegaly (D73.81)
transient neonatal neutropenia (P61.5)

DEF: Abnormally low number of neutrophils. Neutrophils are phagocytic, meaning they surround and consume harmful pathogens, primarily bacteria. When neutrophil counts decrease the risk of infection increases.

D70.0 Congenital agranulocytosis MCCCongenital neutropenia
Infantile genetic agranulocytosis
Kostmann's disease**D70.1 Agranulocytosis secondary to cancer chemotherapy** MCCCode also underlying neoplasm
Use additional code for adverse effect, if applicable, to identify drug (T45.1X5)
AHA: 2014,4Q,22**D70.2 Other drug-induced agranulocytosis** MCC

Use additional code for adverse effect, if applicable, to identify drug (T36–T50 with fifth or sixth character 5)

Certain disorders involving the immune mechanism (D80-D89)

- INCLUDES** defects in the complement system
 immunodeficiency disorders, except human immunodeficiency virus [HIV] disease
 sarcoidosis
- EXCLUDES 1** autoimmune disease (systemic) NOS (M35.9)
 functional disorders of polymorphonuclear neutrophils (D71)
 human immunodeficiency virus [HIV] disease (B20)

✓4a D80 Immunodeficiency with predominantly antibody defects

- D80.0 Hereditary hypogammaglobulinemia** CC HCC
 Autosomal recessive agammaglobulinemia (Swiss type)
 X-linked agammaglobulinemia [Bruton] (with growth hormone deficiency)
- D80.1 Nonfamilial hypogammaglobulinemia** CC HCC
 Agammaglobulinemia with immunoglobulin-bearing B-lymphocytes
 Common variable agammaglobulinemia [CVAgamma]
 Hypogammaglobulinemia NOS
- D80.2 Selective deficiency of immunoglobulin A [IgA]** CC HCC
- D80.3 Selective deficiency of immunoglobulin G [IgG] subclasses** CC HCC
- D80.4 Selective deficiency of immunoglobulin M [IgM]** CC HCC
- D80.5 Immunodeficiency with increased immunoglobulin M [IgM]** CC HCC
- D80.6 Antibody deficiency with near-normal immunoglobulins or with hyperimmunoglobulinemia** CC HCC
- D80.7 Transient hypogammaglobulinemia of infancy** CC HCC
- D80.8 Other immunodeficiencies with predominantly antibody defects** CC HCC
 Kappa light chain deficiency
- D80.9 Immunodeficiency with predominantly antibody defects, unspecified** CC HCC

✓4a D81 Combined immunodeficiencies

EXCLUDES 1 autosomal recessive agammaglobulinemia (Swiss type) (D80.0)

- D81.0 Severe combined immunodeficiency [SCID] with reticular dysgenesis** CC HCC
- D81.1 Severe combined immunodeficiency [SCID] with low T- and B-cell numbers** CC HCC
- D81.2 Severe combined immunodeficiency [SCID] with low or normal B-cell numbers** CC HCC
- ✓5a D81.3 Adenosine deaminase [ADA] deficiency**
 AHA: 2019,4Q,5-6
- D81.30 Adenosine deaminase deficiency, unspecified** CC HCC
 ADA deficiency NOS
- D81.31 Severe combined immunodeficiency due to adenosine deaminase deficiency** CC HCC
 ADA deficiency with SCID
 Adenosine deaminase [ADA] deficiency with severe combined immunodeficiency
- D81.32 Adenosine deaminase 2 deficiency** CC HCC
 ADA2 deficiency
 Adenosine deaminase deficiency type 2
 Code also, if applicable, any associated manifestations, such as:
 polyarteritis nodosa (M30.0)
 stroke (I63.-)
- D81.39 Other adenosine deaminase deficiency** CC HCC
 Adenosine deaminase [ADA] deficiency type 1, NOS
 Adenosine deaminase [ADA] deficiency type 1, without SCID
 Adenosine deaminase [ADA] deficiency type 1, without severe combined immunodeficiency
 Partial ADA deficiency (type 1)
 Partial adenosine deaminase deficiency (type 1)
- D81.4 Nezelof's syndrome** CC HCC
- D81.5 Purine nucleoside phosphorylase [PNP] deficiency** CC HCC
- D81.6 Major histocompatibility complex class I deficiency** CC HCC
 Bare lymphocyte syndrome
- D81.7 Major histocompatibility complex class II deficiency** CC HCC
- ✓5a D81.8 Other combined immunodeficiencies**
- ✓6a D81.81 Biotin-dependent carboxylase deficiency**
 Multiple carboxylase deficiency
EXCLUDES 1 biotin-dependent carboxylase deficiency due to dietary deficiency of biotin (E53.8)
- D81.810 Biotinidase deficiency**
- D81.818 Other biotin-dependent carboxylase deficiency**
 Holocarboxylase synthetase deficiency
 Other multiple carboxylase deficiency
- D81.819 Biotin-dependent carboxylase deficiency, unspecified**
 Multiple carboxylase deficiency, unspecified
- D81.89 Other combined immunodeficiencies** CC HCC
- D81.9 Combined immunodeficiency, unspecified** CC HCC
 Severe combined immunodeficiency disorder [SCID] NOS

✓4a D82 Immunodeficiency associated with other major defects

EXCLUDES 1 ataxia telangiectasia [Louis-Bar] (G11.3)

- D82.0 Wiskott-Aldrich syndrome** CC HCC
 Immunodeficiency with thrombocytopenia and eczema
- D82.1 Di George's syndrome** CC HCC
 Pharyngeal pouch syndrome
 Thymic aplasia
 Thymic aplasia or hypoplasia with immunodeficiency
 AHA: 2019,3Q,14
- D82.2 Immunodeficiency with short-limbed stature** HCC
- D82.3 Immunodeficiency following hereditary defective response to Epstein-Barr virus** HCC
 X-linked lymphoproliferative disease
- D82.4 Hyperimmunoglobulin E [IgE] syndrome** HCC
- D82.8 Immunodeficiency associated with other specified major defects** HCC
- D82.9 Immunodeficiency associated with major defect, unspecified** HCC

✓4N **D83 Common variable immunodeficiency**

- D83.0 Common variable immunodeficiency with predominant abnormalities of B-cell numbers and function** CC HCC
- D83.1 Common variable immunodeficiency with predominant immunoregulatory T-cell disorders** CC HCC
- D83.2 Common variable immunodeficiency with autoantibodies to B- or T-cells** CC HCC
- D83.8 Other common variable immunodeficiencies** CC HCC
- D83.9 Common variable immunodeficiency, unspecified** CC HCC

✓4N **D84 Other immunodeficiencies**

- D84.0 Lymphocyte function antigen-1 [LFA-1] defect** HCC
- D84.1 Defects in the complement system** HCC
- C1 esterase inhibitor [C1-INH] deficiency

▲ ✓5N **D84.8 Other specified immunodeficiencies**

- D84.81 Immunodeficiency due to conditions classified elsewhere** CC

Code first underlying condition, such as:
 chromosomal abnormalities (Q90-Q99)
 diabetes mellitus (E08-E13)
 malignant neoplasms (C00-C96)
EXCLUDES 1 certain disorders involving the immune mechanism (D80-D83, D84.0, D84.1, D84.9)
 human immunodeficiency virus [HIV] disease (B20)

● ✓6N **D84.82 Immunodeficiency due to drugs and external causes**● **D84.821 Immunodeficiency due to drugs** CC

Immunodeficiency due to (current or past) medication
 Use additional code for adverse effect if applicable, to identify adverse effect of drug (T36-T50 with fifth or sixth character 5)
 Use additional code, if applicable, for associated long term (current) drug therapy drug or medication such as:
 long term (current) drug therapy
 systemic steroids (Z79.52)
 other long term (current) drug therapy (Z79.899)

● **D84.822 Immunodeficiency due to external causes** CC

Code also, if applicable, radiological procedure and radiotherapy (Y84.2)
 Use additional code for external cause such as:
 exposure to ionizing radiation (W88)

● **D84.89 Other immunodeficiencies** CC

- D84.9 Immunodeficiency, unspecified** CC HCC
- Immunocompromised NOS ◀
 - Immunodeficient NOS ◀

AHA: 2015,3Q,22

Chapter 4. Endocrine, Nutritional and Metabolic Diseases (E00–E89)

Chapter-specific Guidelines with Coding Examples

The chapter-specific guidelines from the ICD-10-CM Official Guidelines for Coding and Reporting have been provided below. Along with these guidelines are coding examples, contained in the shaded boxes, that have been developed to help illustrate the coding and/or sequencing guidance found in these guidelines.

a. Diabetes mellitus

The diabetes mellitus codes are combination codes that include the type of diabetes mellitus, the body system affected, and the complications affecting that body system. As many codes within a particular category as are necessary to describe all of the complications of the disease may be used. They should be sequenced based on the reasons for a particular encounter. Assign as many codes from categories E08–E13 as needed to identify all of the associated conditions that the patient has.

Patient is seen for poorly controlled diabetes, type 2, with diabetic polyneuropathy and diabetic retinopathy with macular edema

E11.65 Type 2 diabetes mellitus with hyperglycemia

E11.311 Type 2 diabetes mellitus with unspecified diabetic retinopathy with macular edema

E11.42 Type 2 diabetes mellitus with diabetic polyneuropathy

Explanation: Use as many codes to describe the diabetic complications as needed. Many are combination codes that describe more than one condition. Code first the reason for the encounter. "Poorly controlled" is described as "with hyperglycemia." Diabetes documented as "uncontrolled" is not assumed to be hyperglycemic but can be classified to either hyperglycemia or hypoglycemia. If documentation is not clear, the provider must be queried so that the appropriate code can be reported.

1) Type of diabetes

The age of a patient is not the sole determining factor, though most type 1 diabetes develop the condition before reaching puberty. For this reason type 1 diabetes mellitus is also referred to as juvenile diabetes.

A 45-year-old patient is diagnosed with type 1 diabetes

E10.9 Type 1 diabetes mellitus without complications

Explanation: Although most type 1 diabetes are diagnosed in childhood or adolescence, it can also begin in adults.

2) Type of diabetes mellitus not documented

If the type of diabetes mellitus is not documented in the medical record the default is E11.-, Type 2 diabetes mellitus.

H & P lists diabetes and hypertension on patient problem list

E11.9 Type 2 diabetes mellitus without complications

I10 Essential (primary) hypertension

Explanation: Since the type of diabetes was not documented and no complications were noted, the default code is E11.9.

3) Diabetes mellitus and the use of insulin, oral hypoglycemics, and injectable non-insulin drugs

If the documentation in a medical record does not indicate the type of diabetes but does indicate that the patient uses insulin, code E11.-, Type 2 diabetes mellitus, should be assigned. An additional code should be assigned from category Z79 to identify the long-term (current) use of insulin or oral hypoglycemic drugs. If the patient is treated with both oral medications and insulin, only the code for long-term (current) use of insulin should be assigned. **If the patient is treated with both insulin and an injectable non-insulin antidiabetic drug, assign codes Z79.4, Long-term (current) use of insulin, and Z79.899, Other long term (current) drug therapy. If the patient is treated with both oral hypoglycemic drugs and an injectable non-insulin antidiabetic drug, assign codes Z79.84, Long-term (current) use of oral hypoglycemic drugs, and Z79.899, Other long-term (current) drug therapy. Code Z79.4 should not be assigned if insulin is given temporarily to bring a type 2 patient's blood sugar under control during an encounter.**

Type 2 diabetic patient on daily metformin and Victoza is admitted in ketoacidosis, insulin given to stabilize blood sugars and discontinued at discharge

E11.10 Type 2 diabetes mellitus with ketoacidosis without coma

Z79.84 Long term (current) use of oral hypoglycemic drugs

Z79.899 Other long term (current) drug therapy

Explanation: Documentation indicates the patient is on an oral antidiabetic medication (metformin) and an injectable noninsulin antidiabetic medication (Victoza). Although insulin was given to the patient during the encounter, it was discontinued at discharge, indicating that the patient does not regularly use insulin. A Z code representing long-term use of the oral drug and long-term use of the injectable medication can be applied. Applying code Z79.4 to represent long-term use of insulin would be inappropriate.

4) Diabetes mellitus in pregnancy and gestational diabetes

See Section I.C.15. Diabetes mellitus in pregnancy.

See Section I.C.15. Gestational (pregnancy induced) diabetes

5) Complications due to insulin pump malfunction

(a) Underdose of insulin due to insulin pump failure

An underdose of insulin due to an insulin pump failure should be assigned to a code from subcategory T85.6, Mechanical complication of other specified internal and external prosthetic devices, implants and grafts, that specifies the type of pump malfunction, as the principal or first-listed code, followed by code T38.3X6-, Underdosing of insulin and oral hypoglycemic [antidiabetic] drugs. Additional codes for the type of diabetes mellitus and any associated complications due to the underdosing should also be assigned.

A 24-year-old type 1 diabetic male treated in ED for hyperglycemia; insulin pump found to be malfunctioning and underdosing

T85.614A Breakdown (mechanical) of insulin pump, initial encounter

T38.3X6A Underdosing of insulin and oral hypoglycemic [antidiabetic] drugs, initial encounter

E10.65 Type 1 diabetes mellitus with hyperglycemia

Explanation: The complication code for the mechanical breakdown of the pump is sequenced first, followed by the underdosing code and type of diabetes with complication. Code all other diabetic complication codes necessary to describe the patient's condition.

(b) Overdose of insulin due to insulin pump failure

The principal or first-listed code for an encounter due to an insulin pump malfunction resulting in an overdose of insulin, should also be T85.6-, Mechanical complication of other specified internal and external prosthetic devices, implants and grafts, followed by code T38.3X1-, Poisoning by insulin and oral hypoglycemic [antidiabetic] drugs, accidental (unintentional).

A 24-year-old type 1 diabetic male found down with diabetic coma, brought into ED and treated for hypoglycemia; insulin pump found to be malfunctioning and overdosing

T85.614A Breakdown (mechanical) of insulin pump, initial encounter

T38.3X1A Poisoning by insulin and oral hypoglycemic [antidiabetic] drugs, accidental (unintentional), initial encounter

E10.641 Type 1 diabetes mellitus with hypoglycemia with coma

Explanation: The complication code for the mechanical breakdown of the pump is sequenced first, followed by the poisoning code and type of diabetes with complication. All the characters in the combination code must be used to form a valid code and to fully describe the type of diabetes, the hypoglycemia, and the coma.

6) Secondary diabetes mellitus

Codes under categories E08, Diabetes mellitus due to underlying condition, E09, Drug or chemical induced diabetes mellitus, and E13, Other specified diabetes mellitus, identify complications/manifestations associated with secondary diabetes mellitus. Secondary diabetes is always caused by another condition or event (e.g., cystic fibrosis, malignant neoplasm of pancreas, pancreatectomy, adverse effect of drug, or poisoning).

(a) Secondary diabetes mellitus and the use of insulin or oral hypoglycemic drugs

For patients with secondary diabetes mellitus who routinely use insulin or oral hypoglycemic drugs, an additional code from category Z79 should be assigned to identify the long-term (current) use of insulin or oral hypoglycemic drugs. If the patient is treated with both oral medications and insulin, only the code for long-term (current) use of insulin should be assigned. **If the patient is treated with both insulin and an injectable non-insulin antidiabetic drug, assign codes Z79.4, Long-term (current) use of insulin, and Z79.899, Other long term (current) drug therapy. If the patient is treated with both oral hypoglycemic drugs and an injectable non-insulin antidiabetic drug, assign codes Z79.84, Long-term (current) use of oral hypoglycemic drugs, and Z79.899, Other long-term (current) drug therapy.** Code Z79.4 should not be assigned if insulin is given temporarily to bring a secondary diabetic patient's blood sugar under control during an encounter.

The patient, maintained on metformin and insulin, was admitted for treatment of diabetic gangrene. The patient developed diabetes secondary to Nelson's syndrome.

E24.1 Nelson's syndrome

E08.52 Diabetes mellitus due to underlying condition with diabetic peripheral angiopathy with gangrene

Z79.4 Long term (current) use of insulin

Explanation: When diabetes is caused by an underlying condition, the underlying condition should always be sequenced before any codes representing the diabetes. Patients with secondary diabetes may be maintained on both insulin and an oral hypoglycemic. Report only the code for the long-term use of insulin when both oral hypoglycemic and insulin are prescribed.

(b) Assigning and sequencing secondary diabetes codes and its causes

The sequencing of the secondary diabetes codes in relationship to codes for the cause of the diabetes is based on the Tabular List instructions for categories E08, E09 and E13.

(i) Secondary diabetes mellitus due to pancreatectomy

For postpancreatectomy diabetes mellitus (lack of insulin due to the surgical removal of all or part of the pancreas), assign code E89.1, Postprocedural hypoinsulinemia. Assign a code from category E13 and a code from subcategory Z90.41, Acquired absence of pancreas, as additional codes.

Patient with newly diagnosed diabetes after surgical removal of part of pancreas is discharged with referral for consult to initiate insulin.

E89.1 Postprocedural hypoinsulinemia

E13.9 Other specified diabetes mellitus without complications

Z90.411 Acquired partial absence of pancreas

Explanation: Sequence the postprocedural complication of the hypoinsulinemia due to the partial removal of the pancreas as the first-listed code, followed by the other specified diabetes (NEC) with or without complications and the partial or total acquired absence of the pancreas. Code Z79.4 Long term (current) use of insulin, is not added because the insulin has not yet been started.

(ii) Secondary diabetes due to drugs

Secondary diabetes may be caused by an adverse effect of correctly administered medications, poisoning or sequela of poisoning.

See section I.C.19.e for coding of adverse effects and poisoning, and section I.C.20 for external cause code reporting.

Initial encounter for corticosteroid-induced diabetes mellitus

E09.9 Drug or chemical induced diabetes mellitus without complications

T38.0X5A Adverse effect of glucocorticoids and synthetic analogues, initial encounter

Explanation: If the diabetes is caused by an adverse effect of a drug, the diabetic condition is coded first. If it occurs from a poisoning or overdose, the poisoning code causing the diabetes is sequenced first.

Chapter 4. Endocrine, Nutritional and Metabolic Diseases (E00-E89)

NOTE

All neoplasms, whether functionally active or not, are classified in Chapter 2. Appropriate codes in this chapter (i.e. E05.8, E07.0, E16-E31, E34.-) may be used as additional codes to indicate either functional activity by neoplasms and ectopic endocrine tissue or hyperfunction and hypofunction of endocrine glands associated with neoplasms and other conditions classified elsewhere.

EXCLUDES 1 *transitory endocrine and metabolic disorders specific to newborn (P70-P74)*

AHA: 2018.2Q.6

This chapter contains the following blocks:

- E00-E07 Disorders of thyroid gland
- E08-E13 Diabetes mellitus
- E15-E16 Other disorders of glucose regulation and pancreatic internal secretion
- E20-E35 Disorders of other endocrine glands
- E36 Intraoperative complications of endocrine system
- E40-E46 Malnutrition
- E50-E64 Other nutritional deficiencies
- E65-E68 Overweight, obesity and other hyperalimentation
- E70-E88 Metabolic disorders
- E89 Postprocedural endocrine and metabolic complications and disorders, not elsewhere classified

Disorders of thyroid gland (E00-E07)

✓4E E00 Congenital iodine-deficiency syndrome

Use additional code (F70-F79) to identify associated intellectual disabilities

EXCLUDES 1 *subclinical iodine-deficiency hypothyroidism (E02)*

- E00.0 Congenital iodine-deficiency syndrome, neurological type**
Endemic cretinism, neurological type
- E00.1 Congenital iodine-deficiency syndrome, myxedematous type**
Endemic hypothyroid cretinism
Endemic cretinism, myxedematous type
- E00.2 Congenital iodine-deficiency syndrome, mixed type**
Endemic cretinism, mixed type
- E00.9 Congenital iodine-deficiency syndrome, unspecified**
Congenital iodine-deficiency hypothyroidism NOS
Endemic cretinism NOS

✓4E E01 Iodine-deficiency related thyroid disorders and allied conditions

EXCLUDES 1 *congenital iodine-deficiency syndrome (E00.-)
subclinical iodine-deficiency hypothyroidism (E02)*

- E01.0 Iodine-deficiency related diffuse (endemic) goiter**
- E01.1 Iodine-deficiency related multinodular (endemic) goiter**
Iodine-deficiency related nodular goiter
- E01.2 Iodine-deficiency related (endemic) goiter, unspecified**
Endemic goiter NOS
- E01.8 Other iodine-deficiency related thyroid disorders and allied conditions**
Acquired iodine-deficiency hypothyroidism NOS

E02 Subclinical iodine-deficiency hypothyroidism

✓4E E03 Other hypothyroidism

EXCLUDES 1 *iodine-deficiency related hypothyroidism (E00-E02)
postprocedural hypothyroidism (E89.0)*

DEF: Hypothyroidism: Underproduction of thyroid hormone.

- E03.0 Congenital hypothyroidism with diffuse goiter**
Congenital parenchymatous goiter (nontoxic)
Congenital goiter (nontoxic) NOS
EXCLUDES 1 *transitory congenital goiter with normal function (P72.0)*
- E03.1 Congenital hypothyroidism without goiter**
Aplasia of thyroid (with myxedema)
Congenital atrophy of thyroid
Congenital hypothyroidism NOS
- E03.2 Hypothyroidism due to medicaments and other exogenous substances**
Code first poisoning due to drug or toxin, if applicable (T36-T65 with fifth or sixth character 1-4 or 6)
Use additional code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)
- E03.3 Postinfectious hypothyroidism**
- E03.4 Atrophy of thyroid (acquired)**
EXCLUDES 1 *congenital atrophy of thyroid (E03.1)*
- E03.5 Myxedema coma**
- E03.8 Other specified hypothyroidism**

E03.9 Hypothyroidism, unspecified Myxedema NOS

✓4E E04 Other nontoxic goiter

EXCLUDES 1 *congenital goiter (NOS) (diffuse) (parenchymatous) (E03.0)
iodine-deficiency related goiter (E00-E02)*

E04.0 Nontoxic diffuse goiter

Diffuse (colloid) nontoxic goiter
Simple nontoxic goiter

E04.1 Nontoxic single thyroid nodule

Colloid nodule (cystic) (thyroid)
Nontoxic uninodular goiter
Thyroid (cystic) nodule NOS
DEF: Enlarged thyroid, commonly due to decreased thyroid production, with a single nodule. No clinical hypothyroidism.

E04.2 Nontoxic multinodular goiter

Cystic goiter NOS
Multinodular (cystic) goiter NOS
DEF: Enlarged thyroid, commonly due to decreased thyroid production with multiple nodules. No clinical hypothyroidism.

E04.8 Other specified nontoxic goiter

E04.9 Nontoxic goiter, unspecified

Goiter NOS
Nodular goiter (nontoxic) NOS

✓4E E05 Thyrotoxicosis [hyperthyroidism]

EXCLUDES 1 *chronic thyroiditis with transient thyrotoxicosis (E06.2)
neonatal thyrotoxicosis (P72.1)*

DEF: Excessive quantities of hormones from the thyroid gland caused by overproduction or loss of storage ability.

✓5E E05.0 Thyrotoxicosis with diffuse goiter

Exophthalmic or toxic goiter NOS
Graves' disease
Toxic diffuse goiter
DEF: Diffuse thyroid enlargement accompanied by hyperthyroidism, bulging eyes, and dermopathy.

E05.00 Thyrotoxicosis with diffuse goiter without thyrotoxic crisis or storm

E05.01 Thyrotoxicosis with diffuse goiter with thyrotoxic crisis or storm

Goiter

✓5E E05.1 Thyrotoxicosis with toxic single thyroid nodule

Thyrotoxicosis with toxic uninodular goiter
DEF: Symptomatic hyperthyroidism with a single nodule on the enlarged thyroid gland. Onset of symptoms can be abrupt and include extreme nervousness, insomnia, weight loss, tremors, and psychosis or coma.

E05.10 Thyrotoxicosis with toxic single thyroid nodule without thyrotoxic crisis or storm

E05.11 Thyrotoxicosis with toxic single thyroid nodule with thyrotoxic crisis or storm

✓5E E05.2 Thyrotoxicosis with toxic multinodular goiter

Toxic nodular goiter NOS

E05.20 Thyrotoxicosis with toxic multinodular goiter without thyrotoxic crisis or storm

E05.21 Thyrotoxicosis with toxic multinodular goiter with thyrotoxic crisis or storm

✓5E E05.3 Thyrotoxicosis from ectopic thyroid tissue

E05.30 Thyrotoxicosis from ectopic thyroid tissue without thyrotoxic crisis or storm

E05.31 Thyrotoxicosis from ectopic thyroid tissue with thyrotoxic crisis or storm

E13 Other specified diabetes mellitus

(INCLUDES) diabetes mellitus due to genetic defects of beta-cell function
 diabetes mellitus due to genetic defects in insulin action
 postpancreatectomy diabetes mellitus
 postprocedural diabetes mellitus
 secondary diabetes mellitus NEC

Use additional code to identify control using:

insulin (Z79.4)
 oral antidiabetic drugs (Z79.84)
 oral hypoglycemic drugs (Z79.84)

(EXCLUDES) diabetes (mellitus) due to autoimmune process (E10.-)
 diabetes (mellitus) due to immune mediated pancreatic islet beta-cell destruction (E10.-)
 diabetes mellitus due to underlying condition (E08.-)
 drug or chemical induced diabetes mellitus (E09.-)
 gestational diabetes (O24.4-)
 neonatal diabetes mellitus (P70.2)
 type 1 diabetes mellitus (E10.-)

AHA: 2018,3Q,4; 2016,1Q,11-13

TIP: Use this category when the diabetes is documented as diabetes type 1.5. Synonymous terms used in the documentation may also include combined diabetes type 1 and type 2, latent autoimmune diabetes of adults (LADA), slow-progressing type 1 diabetes, or double diabetes.

TIP: When postprocedural or postpancreatectomy hypoinsulinemia (E89.1) is documented with postprocedural or postpancreatectomy diabetes mellitus (E13.-), code E89.1 should be sequenced first.

E13.0 Other specified diabetes mellitus with hyperosmolarity

DEF: Diabetic hyperosmolarity: Extremely high levels of glucose in the blood without ketones.

E13.00 Other specified diabetes mellitus with hyperosmolarity without nonketotic hyperglycemic-hyperosmolar coma (NKHHC) **MCC** **HA** **NCC**

(INCLUDES) type 2 diabetes mellitus (E11.-)

E13.01 Other specified diabetes mellitus with hyperosmolarity with coma **MCC** **HA** **NCC**

E13.1 Other specified diabetes mellitus with ketoacidosis

AHA: 2016,2Q,10; 2013,1Q,26

DEF: Diabetic ketoacidosis: Potentially life-threatening complication due to a shortage of insulin in which the body switches to burning fatty acids and producing acidic ketone bodies.

E13.10 Other specified diabetes mellitus with ketoacidosis without coma **MCC** **HA** **NCC**

E13.11 Other specified diabetes mellitus with ketoacidosis with coma **MCC** **NCC**

E13.2 Other specified diabetes mellitus with kidney complications

AHA: 2019,3Q,3; 2018,4Q,88

E13.21 Other specified diabetes mellitus with diabetic nephropathy **NCC**

Other specified diabetes mellitus with intercapillary glomerulosclerosis

Other specified diabetes mellitus with intracapillary glomerulonephrosis

Other specified diabetes mellitus with Kimmelstiel-Wilson disease

E13.22 Other specified diabetes mellitus with diabetic chronic kidney disease **NCC**

Use additional code to identify stage of chronic kidney disease (N18.1-N18.6)

E13.29 Other specified diabetes mellitus with other diabetic kidney complication **NCC**

Other specified diabetes mellitus with renal tubular degeneration

E13.3 Other specified diabetes mellitus with ophthalmic complications

AHA: 2016,4Q,11-13

One of the following 7th characters is to be assigned to codes in subcategories E13.32, E13.33, E13.34, E13.35, and E13.37 to designate laterality of the disease:

- 1 right eye
- 2 left eye
- 3 bilateral
- 9 unspecified eye

E13.31 Other specified diabetes mellitus with unspecified diabetic retinopathy

DEF: Diabetic retinopathy: Diabetic complication from damage to the retinal vessels resulting in vision problems that can progress to blindness.

E13.311 Other specified diabetes mellitus with unspecified diabetic retinopathy with macular edema **NCC**

E13.319 Other specified diabetes mellitus with unspecified diabetic retinopathy without macular edema **NCC**

Other disorders of glucose regulation and pancreatic internal secretion (E15-E16)

- E15 Nondiabetic hypoglycemic coma** **CC M9 MCC**
[INCLUDES] drug-induced insulin coma in nondiabetic hyperinsulinism with hypoglycemic coma
hypoglycemic coma NOS
- ✓ 4th E16 Other disorders of pancreatic internal secretion**
- E16.0 Drug-induced hypoglycemia without coma**
[EXCLUDES 1] diabetes with hypoglycemia without coma (E09.649)
Use additional code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)
- E16.1 Other hypoglycemia**
Functional hyperinsulinism
Functional nonhyperinsulinemic hypoglycemia
Hyperinsulinism NOS
Hyperplasia of pancreatic islet beta cells NOS
[EXCLUDES 1] diabetes with hypoglycemia (E08.649, E10.649, E11.649, E13.649)
hypoglycemia in infant of diabetic mother (P70.1)
neonatal hypoglycemia (P70.4)
- E16.2 Hypoglycemia, unspecified**
[EXCLUDES 1] diabetes with hypoglycemia (E08.649, E10.649, E11.649, E13.649)
AHA: 2016,3Q,42
TIP: Assign for nondiabetic hypoglycemic encephalopathy not further clarified in the documentation.
- E16.3 Increased secretion of glucagon**
Hyperplasia of pancreatic endocrine cells with glucagon excess
- E16.4 Increased secretion of gastrin**
Hypergastrinemia
Hyperplasia of pancreatic endocrine cells with gastrin excess
Zollinger-Ellison syndrome
- E16.8 Other specified disorders of pancreatic internal secretion**
Increased secretion from endocrine pancreas of growth hormone-releasing hormone
Increased secretion from endocrine pancreas of pancreatic polypeptide
Increased secretion from endocrine pancreas of somatostatin
Increased secretion from endocrine pancreas of vasoactive-intestinal polypeptide
- E16.9 Disorder of pancreatic internal secretion, unspecified**
Islet-cell hyperplasia NOS
Pancreatic endocrine cell hyperplasia NOS

Disorders of other endocrine glands (E20–E35)

- EXCLUDES 1** galactorrhea (N64.3)
gynecomastia (N62)
- ✓4N E20 Hypoparathyroidism**
- EXCLUDES 1** Di George's syndrome (D82.1)
postprocedural hypoparathyroidism (E89.2)
tetany NOS (R29.0)
transitory neonatal hypoparathyroidism (P71.4)
- E20.0 Idiopathic hypoparathyroidism** **MCC**
DEF: Abnormally low secretion of parathyroid hormones, with unknown cause, which causes decreased calcium and increased phosphorus in the blood, resulting in muscle cramps, tetany, tingling, or burning in the lips, fingers, and toes, and cataracts.
- E20.1 Pseudohypoparathyroidism**
- E20.8 Other hypoparathyroidism** **MCC**
- E20.9 Hypoparathyroidism, unspecified** **MCC**
Parathyroid tetany
- ✓4N E21 Hyperparathyroidism and other disorders of parathyroid gland**
- EXCLUDES 1** adult osteomalacia (M83.-)
ectopic hyperparathyroidism (E34.2)
familial hypocalciuric hypercalcemia (E83.52)
hungry bone syndrome (E83.81)
infantile and juvenile osteomalacia (E55.0)
- E21.0 Primary hyperparathyroidism** **MCC**
Hyperplasia of parathyroid
Osteitis fibrosa cystica generalisata [von Recklinghausen's disease of bone]
DEF: Parathyroid dysfunction commonly caused by hyperplasia of two or more glands. Symptoms include hypercalcemia and increased parathyroid hormone levels.
- E21.1 Secondary hyperparathyroidism, not elsewhere classified** **MCC**
EXCLUDES 1 secondary hyperparathyroidism of renal origin (N25.81)
- E21.2 Other hyperparathyroidism** **MCC**
Tertiary hyperparathyroidism
EXCLUDES 1 familial hypocalciuric hypercalcemia (E83.52)
- E21.3 Hyperparathyroidism, unspecified** **MCC**
- E21.4 Other specified disorders of parathyroid gland** **MCC**
- E21.5 Disorder of parathyroid gland, unspecified** **MCC**
- ✓4N E22 Hyperfunction of pituitary gland**
- EXCLUDES 1** Cushing's syndrome (E24.-)
Nelson's syndrome (E24.1)
overproduction of ACTH not associated with Cushing's disease (E27.0)
overproduction of pituitary ACTH (E24.0)
overproduction of thyroid-stimulating hormone (E05.8-)
- E22.0 Acromegaly and pituitary gigantism** **MCC**
Overproduction of growth hormone
EXCLUDES 1 constitutional gigantism (E34.4)
constitutional tall stature (E34.4)
increased secretion from endocrine pancreas of growth hormone-releasing hormone (E16.8)
DEF: Acromegaly: Chronic condition caused by overproduction of the pituitary growth hormone resulting in enlarged skeletal parts and facial features.
- E22.1 Hyperprolactinemia** **CC MCC**
Use additional code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)
- E22.2 Syndrome of inappropriate secretion of antidiuretic hormone** **CC MCC**
- E22.8 Other hyperfunction of pituitary gland** **CC MCC**
Central precocious puberty
- E22.9 Hyperfunction of pituitary gland, unspecified** **CC MCC**

✓4N E23 Hypofunction and other disorders of the pituitary gland

- (INCLUDES)** the listed conditions whether the disorder is in the pituitary or the hypothalamus
- EXCLUDES 1** postprocedural hypopituitarism (E89.3)
- E23.0 Hypopituitarism** **CC MCC**
Fertile eunuch syndrome
Hypogonadotropic hypogonadism
Idiopathic growth hormone deficiency
Isolated deficiency of gonadotropin
Isolated deficiency of growth hormone
Isolated deficiency of pituitary hormone
Kallmann's syndrome
Lorain-Levi short stature
Necrosis of pituitary gland (postpartum)
Panhypopituitarism
Pituitary cachexia
Pituitary insufficiency NOS
Pituitary short stature
Sheehan's syndrome
Simmonds' disease
- E23.1 Drug-induced hypopituitarism** **MCC**
Use additional code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)
- E23.2 Diabetes insipidus** **CC MCC**
EXCLUDES 1 nephrogenic diabetes insipidus (N25.1)
- E23.3 Hypothalamic dysfunction, not elsewhere classified** **MCC**
EXCLUDES 1 Prader-Willi syndrome (Q87.11)
Russell-Silver syndrome (Q87.19)
- E23.6 Other disorders of pituitary gland** **MCC**
Abscess of pituitary
Adiposogenital dystrophy
- E23.7 Disorder of pituitary gland, unspecified** **MCC**
- ✓4N E24 Cushing's syndrome**
- EXCLUDES 1** congenital adrenal hyperplasia (E25.0)
DEF: Abdominal striae, acne, hypertension, decreased carbohydrate tolerance, moon face, obesity, protein catabolism, and psychiatric disturbances resulting from increased adrenocortical secretion of cortisol caused by ACTH-dependent adrenocortical hyperplasia or tumor, or by steroid effects.
- E24.0 Pituitary-dependent Cushing's disease** **CC MCC**
Overproduction of pituitary ACTH
Pituitary-dependent hypercortisolism
- E24.1 Nelson's syndrome** **MCC**
- E24.2 Drug-induced Cushing's syndrome** **CC MCC**
Use additional code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)
- E24.3 Ectopic ACTH syndrome** **CC MCC**
- E24.4 Alcohol-induced pseudo-Cushing's syndrome** **CC MCC**
- E24.8 Other Cushing's syndrome** **CC MCC**
- E24.9 Cushing's syndrome, unspecified** **CC MCC**
- ✓4N E25 Adrenogenital disorders**
- (INCLUDES)** adrenogenital syndromes, virilizing or feminizing, whether acquired or due to adrenal hyperplasia consequent on inborn enzyme defects in hormone synthesis
female adrenal pseudohermaphroditism
female heterosexual precocious pseudopuberty
male isosexual precocious pseudopuberty
male macrogenitosomia praecox
male sexual precocity with adrenal hyperplasia
male virilization (female)
- EXCLUDES 1** indeterminate sex and pseudohermaphroditism (Q56)
chromosomal abnormalities (Q90-Q99)
- E25.0 Congenital adrenogenital disorders associated with enzyme deficiency** **MCC**
Congenital adrenal hyperplasia
21-Hydroxylase deficiency
Salt-losing congenital adrenal hyperplasia
- E25.8 Other adrenogenital disorders** **MCC**
Idiopathic adrenogenital disorder
Use additional code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)
- E25.9 Adrenogenital disorder, unspecified** **MCC**
Adrenogenital syndrome NOS

✓4ⁿ E26 Hyperaldosteronism	
✓5ⁿ E26.0 Primary hyperaldosteronism	
E26.01 Conn's syndrome HCC	
Code also adrenal adenoma (D35.0-)	
E26.02 Glucocorticoid-remediable aldosteronism HCC	
Familial aldosteronism type I	
DEF: Rare autosomal dominant familial form of primary aldosteronism in which the secretion of aldosterone is under the influence of adrenocorticotrophic hormone (ACTH) rather than the renin-angiotensin mechanism. Moderate hypersecretion of aldosterone and suppressed plasma renin activity that are rapidly reversed by administration of glucocorticoids. Symptoms include hypertension and mild hypokalemia.	
E26.09 Other primary hyperaldosteronism HCC	
Primary aldosteronism due to adrenal hyperplasia (bilateral)	
E26.1 Secondary hyperaldosteronism HCC	
✓5ⁿ E26.8 Other hyperaldosteronism	
E26.81 Bartter's syndrome HCC

Aldosteronism NOS	
Hyperaldosteronism NOS	
✓4ⁿ E27 Other disorders of adrenal gland	
E27.0 Other adrenocortical overactivity CC HCC	
Overproduction of ACTH, not associated with Cushing's disease	
Premature adrenarche	
EXCLUDES 1 Cushing's syndrome (E24.-)	
E27.1 Primary adrenocortical insufficiency CC HCC	
Addison's disease	
Autoimmune adrenalitis	
EXCLUDES 1 Addison only phenotype adrenoleukodystrophy (E71.528)	
amyloidosis (E85.-)	
tuberculous Addison's disease (A18.7)	
Waterhouse-Friderichsen syndrome (A39.1)	
E27.2 Addisonian crisis CC HCC	
Adrenal crisis	
Adrenocortical crisis	
DEF: Life-threatening condition that occurs when there is not enough cortisol excreted from the adrenal glands. This condition may be due to injury to the adrenal glands or to the pituitary gland, which controls adrenal hormone secretion, or when a patient stops hydrocortisone treatment too quickly or too early.	
E27.3 Drug-induced adrenocortical insufficiency CC HCC	
Use additional code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)	
✓5ⁿ E27.4 Other and unspecified adrenocortical insufficiency	
EXCLUDES 1 adrenoleukodystrophy [Addison-Schilder] (E71.528)	
Waterhouse-Friderichsen syndrome (A39.1)	
E27.40 Unspecified adrenocortical insufficiency CC HCC	
Adrenocortical insufficiency NOS	
Hypoadosteronism	
E27.49 Other adrenocortical insufficiency CC HCC	
Adrenal hemorrhage	
Adrenal infarction	
E27.5 Adrenomedullary hyperfunction CC HCC	
Adrenomedullary hyperplasia	
Catecholamine hypersecretion	
E27.8 Other specified disorders of adrenal gland HCC	
Abnormality of cortisol-binding globulin	
E27.9 Disorder of adrenal gland, unspecified HCC	
✓4ⁿ E28 Ovarian dysfunction	
EXCLUDES 1 isolated gonadotropin deficiency (E23.0)	
postprocedural ovarian failure (E89.4-)	
E28.0 Estrogen excess ♀	
Use additional code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)	
E28.1 Androgen excess ♀	
Hypersecretion of ovarian androgens	
Use additional code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)	
E28.2 Polycystic ovarian syndrome ♀	
Sclerocystic ovary syndrome	
Stein-Leventhal syndrome	
DEF: Common hormonal disorder among women of reproductive age that involves enlarged ovaries with numerous small cysts located along the outer ovarian edge.	
✓5ⁿ E28.3 Primary ovarian failure	
EXCLUDES 1 pure gonadal dysgenesis (Q99.1)	
Turner's syndrome (Q96.-)	
✓6ⁿ E28.31 Premature menopause	
E28.310 Symptomatic premature menopause A ♀	
Symptoms such as flushing, sleeplessness, headache, lack of concentration, associated with premature menopause	
E28.319 Asymptomatic premature menopause A ♀	
Premature menopause NOS	
E28.39 Other primary ovarian failure ♀	
Decreased estrogen	
Resistant ovary syndrome	
E28.8 Other ovarian dysfunction ♀	
Ovarian hyperfunction NOS	
EXCLUDES 1 postprocedural ovarian failure (E89.4-)	
E28.9 Ovarian dysfunction, unspecified ♀	
✓4ⁿ E29 Testicular dysfunction	
EXCLUDES 1 androgen insensitivity syndrome (E34.5-)	
azoospermia or oligospermia NOS (N46.0-N46.1)	
isolated gonadotropin deficiency (E23.0)	
Klinefelter's syndrome (Q98.0-Q98.1, Q98.4)	
E29.0 Testicular hyperfunction ♂	
Hypersecretion of testicular hormones	
E29.1 Testicular hypofunction ♂	
Defective biosynthesis of testicular androgen NOS	
5-delta-Reductase deficiency (with male pseudohermaphroditism)	
Testicular hypogonadism NOS	
Use additional code for adverse effect, if applicable, to identify drug (T36-T50 with fifth or sixth character 5)	
EXCLUDES 1 postprocedural testicular hypofunction (E89.5)	
E29.8 Other testicular dysfunction ♂	
E29.9 Testicular dysfunction, unspecified ♂
